

Clean & Clear™
Easy Clean Glass Treatment

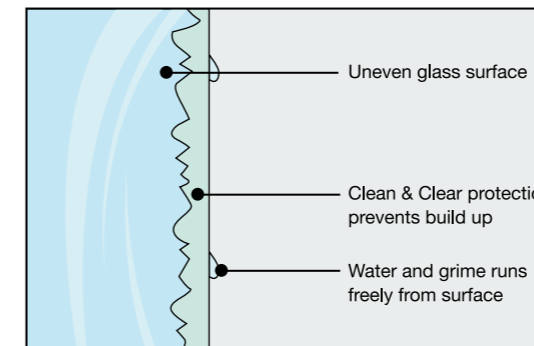

Clean & Clear™ benefits:

- Creates a 'non-stick' surface
- Resists lime scale build-up and water spots
- Easier to clean and keep clean
- Maintains the pristine appearance for longer
- Hinders bacteria growth for a more hygienic environment

Normal Glass

Clean & Clear™ Glass

Description	Code	RRP inc VAT (20%)
Clean & Clear™ Reapplication Kit	KIT01	£47.00

The Clean & Clear™ glass protection system is both innovative and highly beneficial creating a protective barrier on the glass.

The Problem with Untreated Glass

The surface of glass is not completely smooth; under a microscope glass has a rough surface of peaks and potholes. Water, limescale and mineral salts can quickly build up in this uneven surface causing permanent staining and damage.

How Clean & Clear™ Works

Clean & Clear™ nano-molecules chemically fuse with the surface of glass and acts as a long lasting protective barrier. The hydrophobic or repellent properties stop limescale and other residue from bonding to the glass. It is completely transparent, non-hazardous and unlike traditional coating applications, Clean & Clear™ will never discolour, peel or crack.

Kinder to the Environment

Typically Clean & Clear™ reduces the frequency of cleaning by half. Just like 'non-stick' cookware, the maintenance of Clean & Clear™ protected glass does not require harsh and abrasive cleaning chemicals which can be expensive and damaging to the environment.

Aftercare

Clean & Clear™ glass can be cleaned with any suitable non-abrasive glass cleaner - with a PH value of between 3-11; the coating will not be damaged. Avoid surfactants and heavily perfumed products. Vinegar and water based products are very effective. Do not use abrasive scrubbing cleaners or equipment for cleaning.
