THE COLLECTION  
MAY 2015

To ensure the continuous development and improvement of our products, we reserve the right to make changes to the colour, design and descriptions or methods of manufacture of our furniture. Such changes may be made without prior notice and without incurring liability. In many of our products we use wood, a natural living material which will reflect a variety of grains and textures and so variances must be allowed for. Styles that feature timber, PVC, laminates and melamine finishes may incur a slight colour change over the years. The term 'solid timber' applies to door and drawer fronts only. Colour reproduction in this brochure is as accurate as printing techniques will allow. Not every showroom contains all the products featured in this brochure. ## HOW TO USE THIS GUIDE

Lindo. The Collection offers four independent portfolios of bathroom furniture and a portfolio of common accessories. Browse through our range of products and select the one that suits your home best. Then select the units to create your bathroom paradise.

We recommend that you visit your local retailer for expert design advice and to see all the products we have to offer.

## HOW TO ORDER

- 1 Select your portfolio: Lindo, Linear, Inline or Naples
- 2 Select the style/colour
- 3 Select your units and cabinet colour. Remember to state handing of your units (if applicable)
- 4 Choose your handles
- 5 Decide on your countertop
- 6 Pick your accessories

Now you have an idea of what you want, simply contact your local retailer to design your dream bathroom.

We hope you enjoy creating the perfect bathroom with us.

## MODULAR VS FITTED

All The Lindo Collection and Linear finishes are available with either fitted or wall-hung modular options.

Take a look at the units over the following pages to see the range content.

## REPLACEMENT END PANELS

To enhance the finish of a selection of our bathrooms, replacement cabinet end panels are available to order at no extra cost if ordered with a unit.

**The replacement end panels are designed to be fitted to the exposed ends of a unit run only.**

On base and tall storage units, the replacement cabinet end panel is a full length panel extending to the floor and therefore additional end blender panels will not be required.

Replacement cabinet ends are easy to order, simply add on one of the following suffixes to the standard unit code:

- For a replacement cabinet end to the **left** hand side of a unit add **GL** - for example BC338GL
- For a replacement cabinet end to the **right** hand side of a unit add **GR** - for example BC338GR
- For replacement cabinet ends to **both left** and **right** sides of a unit add **G2** - for example BC338G2

**LINEAR**

The Linear Collection is a stunning design style that creates a handleless finish, perfect for today's modern bathrooms.

Linear handleless bathroom units are available as floorstanding units, wall units and modular wall hung units. The integrated trim needs to be ordered separately for base and modular units, it is pre-fitted to wall units.

**HOW TO ORDER**

- 1 Select your preferred range
- 2 Select your units and cabinet colour.  
Remember to state handing of your units (if applicable)
- 3 Order the appropriate length of trim (includes fixing clips)
- 4 On base units only, select either blender panels or end clips to finish the run of units
- 5 Decide on your countertop
- 6 Pick your accessories

Please refer to pages 140-141 for a detailed explanation of how to fit the Linear trim.

## NAPLES

The Naples painted range includes 14 individual units which can be ordered in a freestanding or fitted configuration. The freestanding option includes two planked blender panels and the plinth with each unit for ease of ordering. These need to be ordered separately for the fitted option.

Also available are a matching framed mirror, blender panel, plinth and bath panels. All doors, blenders and plinths are painted to order on a four week lead time in either Clay or Stone.

Countertops should be ordered separately.

## HOW TO ORDER

- 1 Select your preferred range
- 2 Select your units and cabinet colour.  
Remember to state handing of your units (if applicable)
- 3 Choose your handles
- 4 Decide on your countertop
- 5 Pick your accessories

\*The Chrome and Crystalized™ Swarovski Elements pull handle (LUXURY01) is offered as an optional upgrade and is not free of charge. Because this is not offered as part of the standard handle offer you must first order your required units without handles. You will then be required to order the number of LUXURY01 handles you require separately for the items of furniture which you are ordering.

N.B. All handles shown above are not to scale. All handle centres are in mm. Please specify handle choice when ordering. Handles are only free of charge if ordered at the same time as your units.

## TECHNICAL GUIDE

All Lindo Collection furniture is supplied in an assembled format only.  
Aquadri bathroom furniture is subject to a ten year guarantee.

GETTING STARTED  
PLANNING GUIDE  
CABINET SPECIFICATIONS  
TECHNICAL INFORMATION

### Getting started

To begin with take an accurate measurement of your bathroom. Check the height from the floor to window sill to make sure that base units will fit underneath the window.

Check the dimensions and positions of windows, doors and any other obstructions, e.g. radiators, towel rails, soil and vent pipes and light switches, as these will determine the layout of your bathroom.

Transfer your room dimensions on to graph paper so that you can produce a scale drawing (use 1:10 or 1:20 scale). Mark the position of any waste pipes, soil pipes and incoming water supplies. The location of plumbing affects everything else, so this must be highlighted at the

start. Remember though that the beauty of fully fitted bathroom furniture is that your bathroom can be designed to completely conceal unsightly pipework.

#### Top Tip

If you are using wall units, try to get them to co-ordinate in size with your base units as this will be pleasing to the eye.

#### Top Tip

Always remember to allow for filler panels between a fitted unit and a wall. This prevents the unit door handle clashing against the wall and makes certain that the run of furniture will fit into your chosen space.

The next step is to list all the items you would like to have in your bathroom: shower, bath, hand basin, W/C, bidet, furniture pieces and storage units, mirror,

towel rail, etc. Obtain measurements of all these items and then add them to your plan. Full dimensions for all Aquadi bathroom furniture can be found in this Price Guide.

Once you have positioned your furniture on the plan you will be able to take final measurements of the runs of furniture and work out what size of countertop you will need.

Finally you can think about accessories. One of the most important things to consider is lighting. Aquadi offers a number of bathroom lighting options which are all IP regulated. You could choose LED Chrome Spotlights set into a flyover shelf, or flexible LED strip lighting underneath wall units. The illuminated mirrors are a 'must have' for any contemporary bathroom.

## PLANNING GUIDE

### Space

The bathroom can often be one of the smallest rooms in the house, so if space is an issue or you are planning a cloakroom you may like to consider reduced depth bathroom furniture.

Aquadi offers a wide selection of base units with a depth of only 200mm across all ranges\*. You may also like to consider the Cloakroom basin unit, a compact storage and basin solution which is perfect for smaller spaces.

### Simple steps to select your furniture

Now that you have seen the style and choice that Aquadi has to offer and you have thought about the planning of your bathroom, simply follow the steps below to order your bathroom via your retailer.

1. Select your range.
2. Select style/colour.
3. Select your units and cabinet colour. Remember to state the handing of your units (if applicable).
4. Choose your handles.
5. Decide on your countertop.
6. Pick your accessories.

\*Except Linear and Naples

## LINDO, INLINE AND NAPLES

The Lindo Collection represents the latest design trends and features our unique fitted furniture concept. A 90mm high continuous plinth runs flush with the doors to give a contemporary linear styling and the 18mm cabinets are available in gloss black, gloss white and oak.

The Naples Collection incorporates the same high quality cabinet as Lindo with traditionally painted frontals. The 18mm cabinets are available in gloss white and oak.

The Inline Collection includes the same high quality modular and wall hung cabinet designs as Lindo with the chrome wave trim already attached.

The cabinet is designed to maximise storage space and features a concealed void at the back to allow for waste pipes.

All furniture is supplied in an assembled format only. Aquadi bathroom furniture is non-returnable and subject to a ten year guarantee.

# TECHNICAL INFORMATION

## LINDO FITTED UNIT DIMENSIONS (INCLUDING NAPLES)†

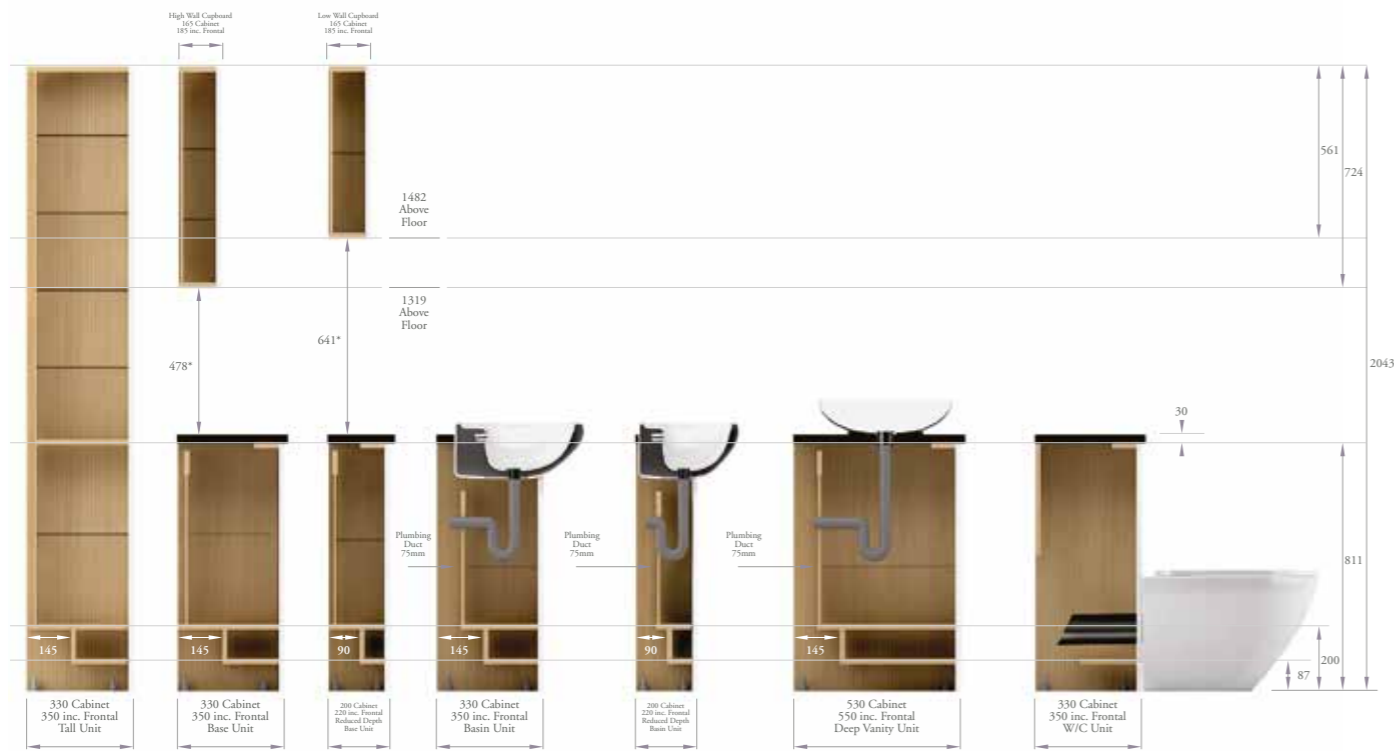

†Naples only available in 300mm and 600mm base units, 600mm basin unit and 600mm WC unit.

## LINEAR FITTED UNIT DIMENSIONS

## Fitted Units/Heights and Depths (mm)

\*Height based on nominal 30mm countertop.

## Installation Guide

Always check for electrical wires, water pipes or other services before drilling the wall.

### Lindo Base Units

Set height for base units at 811mm on wall above lowest point. Plumb and secure firmly through back rail and brackets. Adjust leg for base support. Scribe into side panels and plinth as required. It is recommended to seal plinth with plinth seal (PLINTHS). Continue adding adjoining units, screwing or bolting together and fixing as above. The Lindo Collection base units are boxed out at the rear to allow waste pipes to be run along the back of the units. In this scenario cut out the back of the side panel as required to fit/hold waste pipes (see below).

### Lindo Wall Units

Determine the exact location of the unit(s) and mark a horizontal line 1831mm from the floor. Mark the position of each unit.

Fit the hanging bracket plates to the wall as illustrated and use adjustment to level. Secure with additional fixings through back support rail or bracket. Continue adding adjoining units, screwing or bolting together and fixing as above.

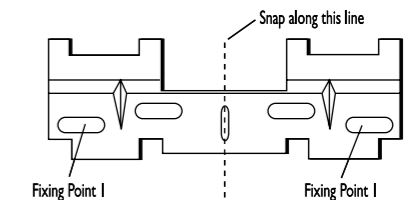

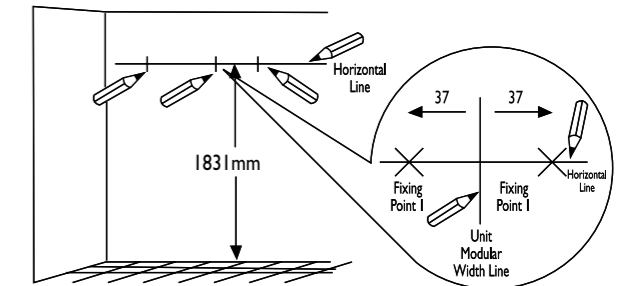

### Modular Units

Firmly screw brackets to wall and use adjustment to level. Secure with additional fixings through back support rail or bracket.

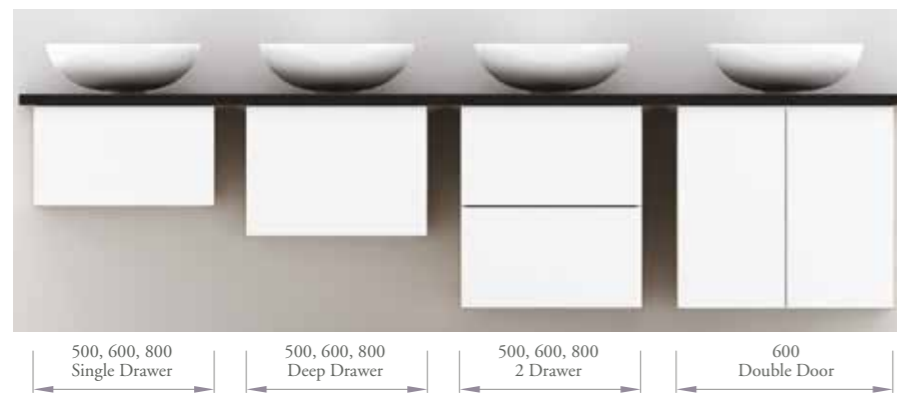

### IMPORTANT

All units should be fitted by a qualified fitter. Any screws and other fixings used must be suitable to support the units when loaded into the material they are to be fitted.

When fitting handles please be aware that doors are not pre-drilled for the handle. The drillings on the doors may be different between two doors in the same range, so we strongly recommend that each handle is measured and the door marked and drilled to fit the handle.

## Modular Wall Hung Units/Available Widths (mm)

## Cloakroom Units - Internal Specification Modular Cloakroom Unit

## Installation Sequence

1. All hot and cold services turned off at appropriate positions.
2. Locate waste outlets according to the plan.
3. Fix base units to the wall.
4. Fit countertops.
5. Fit sanitaryware.
6. Fit wall units where appropriate.
7. Connect and check plumbing.
8. Fit continuous plinth if used, scribing as necessary.

## Corner Planning

### Base Units

The Base Corner Unit is offset either 60mm or 75mm from the wall depending on the range ordered. The adjacent unit needs to be offset either 360mm or 375mm from this wall.

Ranges: Sizzano Grey, Sizzano Dakar, Carrara, Granada, Aviano, Fiora Anthracite and Cashmere

### Wall Units

The Wall Units should be offset 210mm from the adjacent wall.

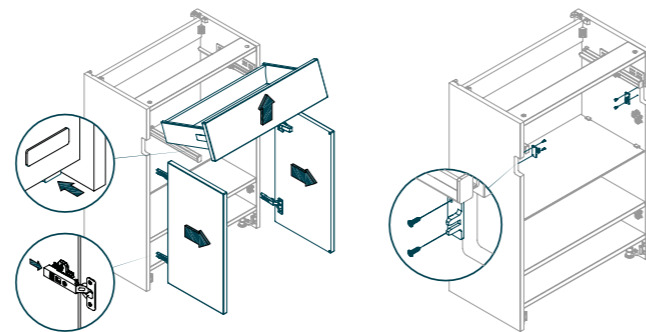

## Modular Wall Hung Units - Internal Specification

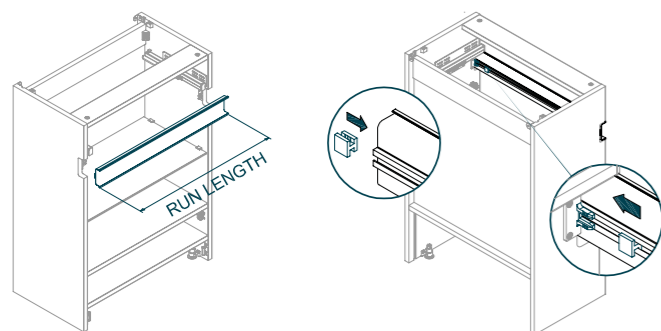

## LINEAR BASE UNITS - HANDLE TRIM FITTING

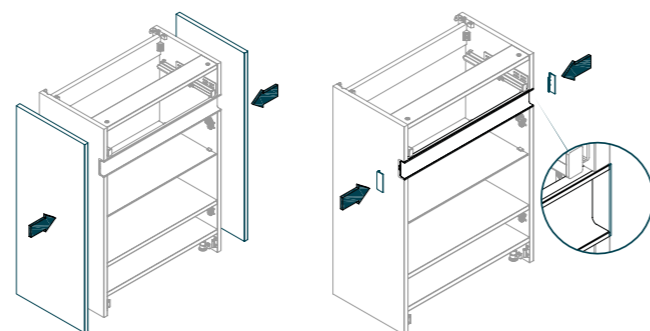

## LINEAR MODULAR UNITS - HANDLE TRIM FITTING

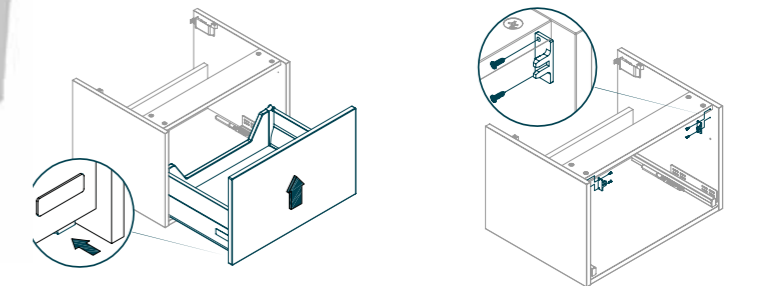

1. Once all units have been fitted, remove all frontal and drawers to allow fitting of the handle trim.
2. Fix the trim fixing brackets to the unit using 2x 0.5"x6 screws.

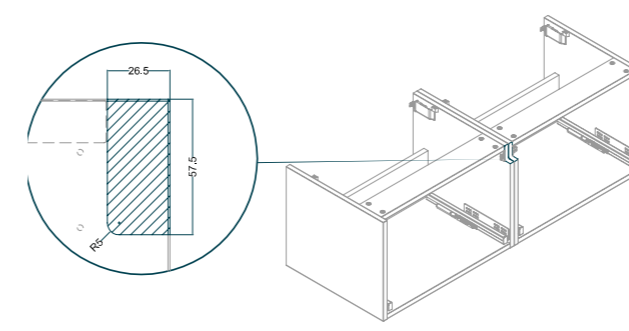

3. Determine the run length and cut the trim to suit.  
**Note:** If using end caps the trim will be smaller than the total run length by 2mm per cap.
4. Insert the fixing bracket lugs into the back of the trim, position the trim and fix by clipping the lugs into the fixing brackets.

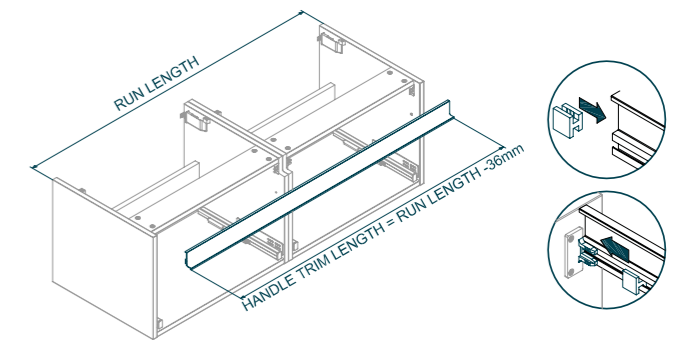

5. It is recommended to finish a run by using blender panels.
6. Alternatively, end caps can be used to finish a run.

1. Once all units have been fitted, remove the drawers to allow fitting of the handle trim. **Note:** The handle trim should be fitted prior to fitting the countertop.
2. Fix the trim fixing brackets to the unit using 2x 0.5"x6 screws.

3. (Optional) To achieve a continuous handle trim when joining multiple units together, the joining side panels require notching.

4. (Optional) Determine the run length and cut the trim to suit.
