

CARRONITE

Strength and Beauty

What do comprehensive tests prove about Carronite™ baths?

Unique Design

Carronite™ baths have a unique support system; this has been designed to cope with the additional weight of the Carronite™ material. Once installed, the bath's stability and rigidity prevent movement, thus offering the perfect solution to the problem of sealing.

Industry Standard

These test results are the reason that more industry professionals would recommend a Carronite™ bath over any other currently available.

Amazingly Strong

They are demonstrably stronger than standard acrylic baths. Based on measuring the extent to which a cut section of a bath will bend when a 1kg weight is attached to it. A standard bath will bend to 56mm and the Carronite™ bath will bend to 45mm.

Retain Heat

They will retain heat for approximately 20 minutes longer than a standard acrylic bath. This is based on a starting temperature of 55 degrees Celsius and reducing to 45 degrees Celsius.

Four Carronite baths easily take the weight of a 7½ tonne van.

Six Carronite baths easily take the weight of a tri-axle tractor unit.

Carronite™

Carronite is an advanced reinforcement applied to Carron acrylic baths, developed and patented by Carron Bathrooms. A Carron bath reinforced with Carronite is capable of withstanding far greater stresses than a conventional acrylic bath. After a bath has been reinforced with Carronite, it has a strength and rigidity normally associated with a cast iron or heavy gauge steel bath, while enjoying all the benefits in finish, design and ease of care of modern acrylic baths.

Carronite™ samples available

How does Carronite™ work?

The demonstrable strength of a Carronite™ bath comes from a unique triple layer reinforcement system. This additional weight means the bath requires to be fitted with a unique cradle support system. The combination of the material itself and the cradle system ensure the rigidity and stability of the bath.

Acrylic - Warm, durable, high gloss, easy clean finish, formed from 5mm acrylic.
Carronite™ - High technology, rigid reinforcement.
18mm Baseboard - Totally encapsulated for total rigidity.

Why choose Carronite™?

- **Amazing strength**

The Carronite™ reinforcement can be applied to any Carron bath or panel making them stronger than any other conventional acrylic bath or panel available on the market

- **Unique installation**

Properly installed, a Carronite™ bath can last a lifetime

- **Enhanced insulation**

Due to the superior qualities of the Carronite™ material the water in the bath stays warmer for longer

- **Great designs**

Every bath in our range is available in the Carronite™ specification, providing customers with a wide range of designs to suit every bathroom

- **Traditional craftsmanship**

Carronite™ was developed and patented by Carron Bathrooms, a company with 250 years of experience in the design and manufacturing of premium quality products

- **Proven track record**

Carronite™ has a proven track record in the luxury hotel business where design and durability are essential

- **30 year manufacturer's warranty**

Every Carronite™ bath is backed by a 30 year manufacturer's warranty, offering you valuable peace of mind

Optional headrest available on some baths - look at the features boxes

Carronite panels also available - the perfect partner for a Carronite bath. See pages 114-115 for list of panels.
