## About us...

Established in 1989, Abacus is one of the UK's leading manufacturers and distributors of bathroom and wetroom products.

### OUR PRODUCTS

Developed alongside some of the world's most prestigious bathroom brands, our comprehensive product range offers stunning contemporary designs, twinned with market-leading guarantees, which will suit all bathroom needs.

### OUR PHILOSOPHY

Our approach to completing a bathroom through both product and design innovations makes us one of the only manufacturers and specialist distributors to supply every product required in a bathroom from conception to completion.

ELEMENTS

Wetrooms Solved

...as well as the bit you do...

Abacus don't just sell bathrooms, we've developed waterproofing and insulation innovations, backed with outstanding build quality 'behind the tiles' to ensure your investment stands the test of time.

World-class German-manufactured designer sanitaryware

•

The UK's most comprehensive wetroom and bathroom waterproofing specialists

•

Stunning furniture design and accessories

•

Manufacturing innovation throughout the product range

•

Industry-leading brassware and shower technology

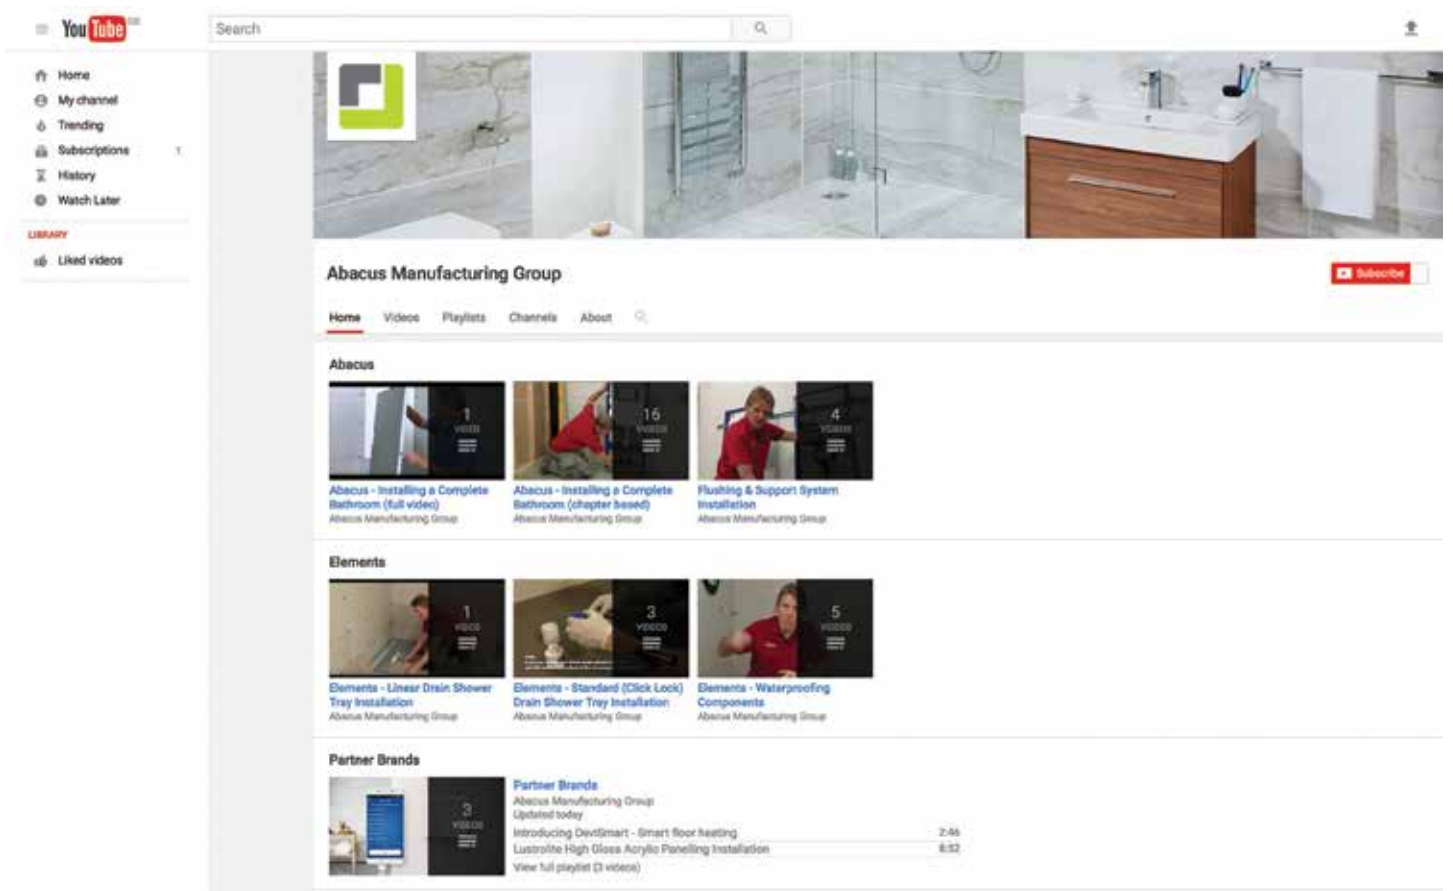

All backed with a 15 year guarantee\*

\*Does not include electrical components and wear & tear items. See terms and conditions.

# Go to our YouTube channel for invaluable help and expertise, presented by top 'skill builder', Roger Bisby

Abacus have teamed up with Roger Bisby to produce a series of best-practice videos enabling our customers to achieve the highest level of build quality in their bathroom installations when using the innovative Abacus product range.

Roger Bisby entered the building industry as an apprentice plumber. He went on to train as a college lecturer and has also run his own building company for nearly 30 years. He specialises in trouble shooting and has a dogged determination to get to the bottom of difficult problems. He put these talents to good use as the regular expert on London Broadcasting Company's (LBC) Fix It Phone in which remained one of their most popular shows throughout its 15 year run.

His television work includes appearances as the resident expert on The Terrace (BBC) Watchdog Home Improvement Series (BBC) Rogue Traders (BBC) and House of Horrors (ITV). He currently works for trade publications including Professional Builder, Professional Electrician, Professional Heating and Plumbing Installer, and Professional Housebuilder and Property Developer.

---

## Examples of our installation videos include:

- how to fit a complete Abacus bathroom with wall-mounted sanitaryware

(video length: 1 hour)

- installing a professional wetroom

(video length: 13 mins)

- installing a wall-mounted WC

(video length: 11 mins)

- waterproofing a bathroom prior to tiling

(video length: 10 mins)

...and many more useful videos.

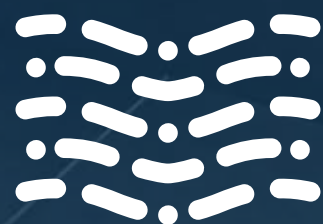

Subscribe to our YouTube channel to get the latest updates and new videos as soon as they're uploaded.

Search for Abacus Manufacturing Group – and get the best tips, hints and advice for all aspects of your bathroom or wetroom installation.

## D-STYLE BASIN & VANITY

## D-Style solid surface basins – protected by Evermite Protective Coating

Completely safe for users and environmentally friendly.

Evermite is a polymer-based material, which makes cast marble products more durable and resistant than composite products covered with standard gelcoats. A unique formula of components builds a protective barrier, thus minimizing the risk of use-related defects.

## D-STYLE 50cm & 60cm BASIN & VANITY UNIT

# Pure Range

# PURE BASIN & VANITY

## Pure solid surface basins – protected by Evermite Protective Coating

Completely safe for users and environmentally friendly.

Evermite is a polymer-based material, which makes cast marble products more durable and resistant than composite products covered with standard gelcoats. A unique formula of components builds a protective barrier, thus minimizing the risk of use-related defects.

## PURE F 60 BASIN & VANITY UNIT (60cm)

- Slim basin with Evermite coating
- Sleek under-basin furniture
- Single drawer
- Unit dimensions - 560(w) x 450(h) x 450(d) mm
- Overall dimensions with basin - 565(w) x 490(h) x 452(d) mm

# Complementary Furniture

# The ultimate solution for stylish bathroom storage.

Trio Recessed Cabinet – a classic mirrored cupboard and shelving combination designed to be installed in a pre-wall designed bathroom, which utilises all available space in a practical yet fashionable way.

To make the installation of the recessed cabinets as simple as possible, we offer a unique range of installation frames. These frames can be installed whilst building the void wall and create a tile guide to achieve an exact sized opening for the cabinet. This means the installation of the cabinet can be done very easily at the final stage of the bathroom installation.

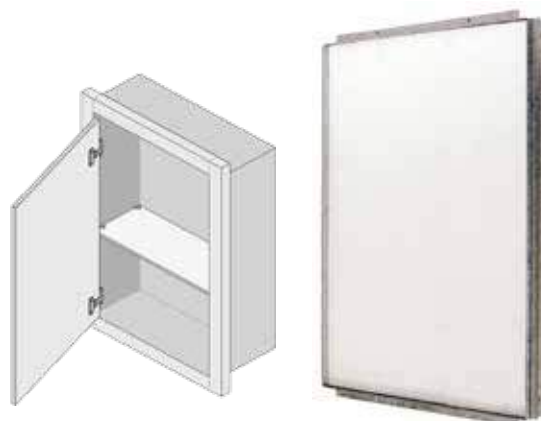

## TRIO RECESSED CABINET INSTALLATION FRAME

(EPCA-05-1505)

The installation frame is not necessarily required to fit the cabinets, but it is recommended to ease installation.

- Galvanised steel installation frame
- For Trio recessed cabinet
- 761(h) x 498(w) mm

**£54.00**

### BASIN / BIDET MIXER FLOW LIMITERS

DESCRIPTION	COLOUR INDICATOR	PRODUCT CODE	PRICE
5L FLOW LIMITER INSERT	ORANGE	VEAC-10-0005	£7.20
3L FLOW LIMITER INSERT	LILAC	VEAC-10-0003	£7.20

To be installed within the mono basin mixer aerator.

Note: Only to be installed with compatible Abacus brassware marked with the 'ECO' logo

### EXPOSED MIXER / WALL OUTLET FLOW LIMITERS

DESCRIPTION	COLOUR INDICATOR	PRODUCT CODE	PRICE
9L FLOW LIMITER	ORANGE	VEAC-12-0009	£9.00
6L FLOW LIMITER	BROWN	VEAC-12-0006	£9.00

To be installed on the shower outlet.

Note: Only to be installed with compatible Abacus brassware marked with the 'ECO' logo

Look out for this logo for compatible brassware products.

### Why go Eco?

#### The Environment

Reducing water consumption helps preserve our natural resources and lower the impact on climate change.

#### Government Legislation

Changes to Building Regulations Part G requires that all new build domestic property and change of use renovation be subject to maximum daily water consumption per person. In addition, the Code for Sustainable Homes is a requirement that planning authorities use to grant permission for social housing developments and again, maximum daily water consumption levels must be achieved. The use of flow limiters help achieve these levels.

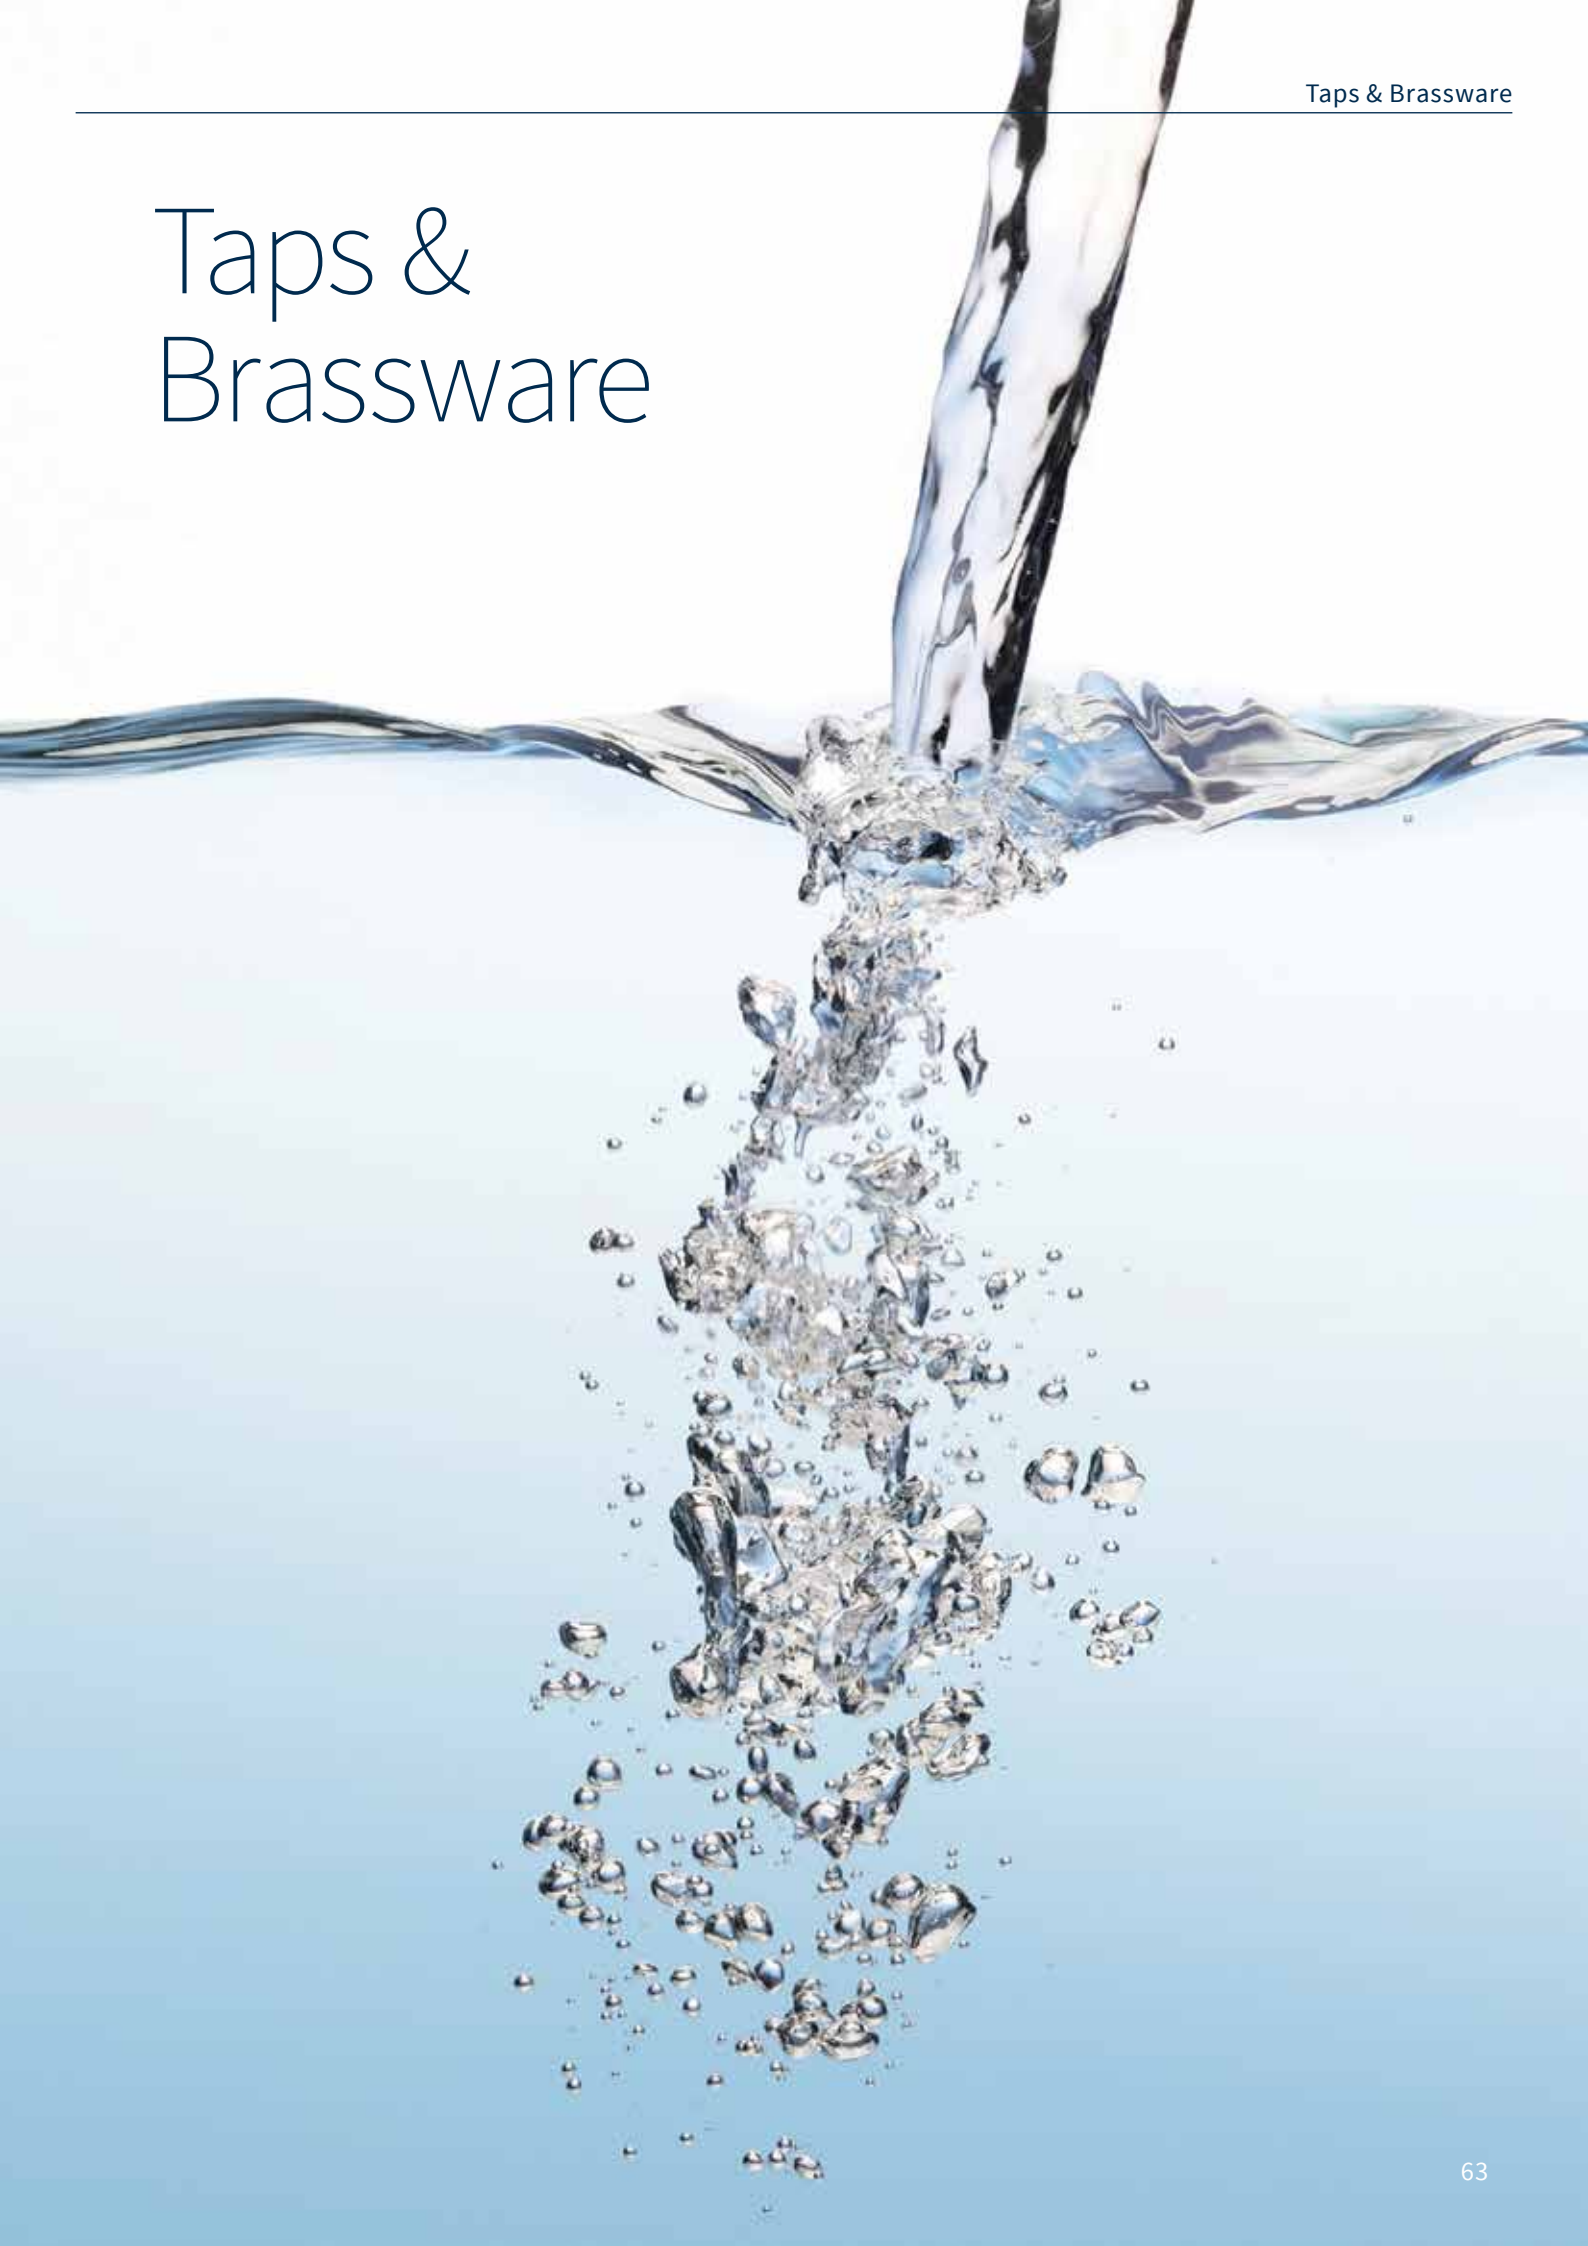

#### Money Saving

Fitting flow limiters within a domestic household can save hundreds of pounds in water bills annually. In addition, it can also help reduce energy bills since less water is needed to be heated during showering etc.

# Baths & Bath Screens

## SERIES 1 SINGLE-ENDED BATHS

WITH SUPER STRENGTH ARMOUR+

Can be drilled for overflow to give flexible overflow positions.

DESCRIPTION	DEPTH	CAPACITY	COLOUR	PRODUCT CODE	PRICE
SINGLE-ENDED BATH 1700 x 700mm	450mm	206 ltr	WHITE	VEBA-05-0507	<b>£379.00</b>
SINGLE-ENDED BATH 1700 x 750mm	450mm	215 ltr	WHITE	VEBA-05-0512	<b>£429.00</b>
SINGLE-ENDED BATH 1800 x 800mm	470mm	225 ltr	WHITE	VEBA-05-0517	<b>£649.00</b>

### What is Armour+ ?

Armour+ baths have more strength and are heavier than standard acrylic baths. The extra layers created during the Armour+ process give a significantly reinforced product. The finished Armour+ bath offers a higher degree of comfort and luxury, backed with an unbeatable 30 year guarantee. Due to their enhanced rigidity, Armour+ baths are recommended for showering.

With Armour +  
super strength acrylic

### ARMOUR+ The Benefits

#### Lucite acrylic:

The world's most used sanitaryware cast acrylic sheet

- warm to touch
- easy to clean
- scratch & chemical resistant

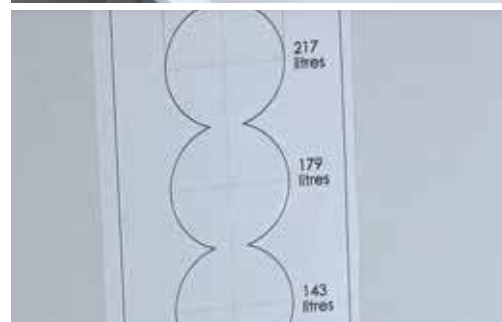

**increased insulation**  
keeps your bath water warmer for longer

**totally encapsulated baseboard**

**Armour +**  
High performance reinforcement for super strength acrylic baths

**YouTube**

# The benefits of stainless steel – lifetime guarantee

Leading the way in the UK's expanding stainless steel market

## LIFE CYCLE

A durable and low maintenance material, stainless steel will last a lifetime and in the long run will often turn out to be the most inexpensive option.

## HEAT OUTPUT

Offers a higher output than equivalent sizes in chrome finish.

## CORROSION RESISTANCE

A robust material offering high resistance to chemicals and pressures.

## RESISTANCE TO EXTREME TEMPERATURES

Stainless steel has the ability to withstand extreme temperature fluctuations.

## AESTHETIC APPEAL

A range of radiators in both polished and brushed stainless steel which are timeless in their beauty and function.

## IDEAL FOR COMMERCIAL PROJECTS

Stainless steel is a perfect material for commercial projects.

# Electric Heating Options

There are two options for electrically heating towel warmers:

## ELECTRIC ONLY

Factory filled and sealed with a special heating solution. Allows the towel rail to be fitted without connection to the central heating system.

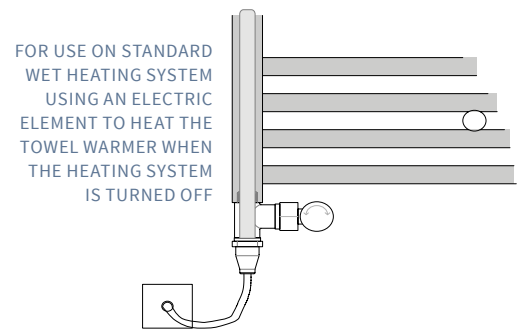

(Please check summer element rating for your rail)

## DUAL FUEL KITS

For heating towel warmers during summer months, or when the central heating system is turned off, supplied with a chrome T piece.

(Please check summer element rating for your rail)

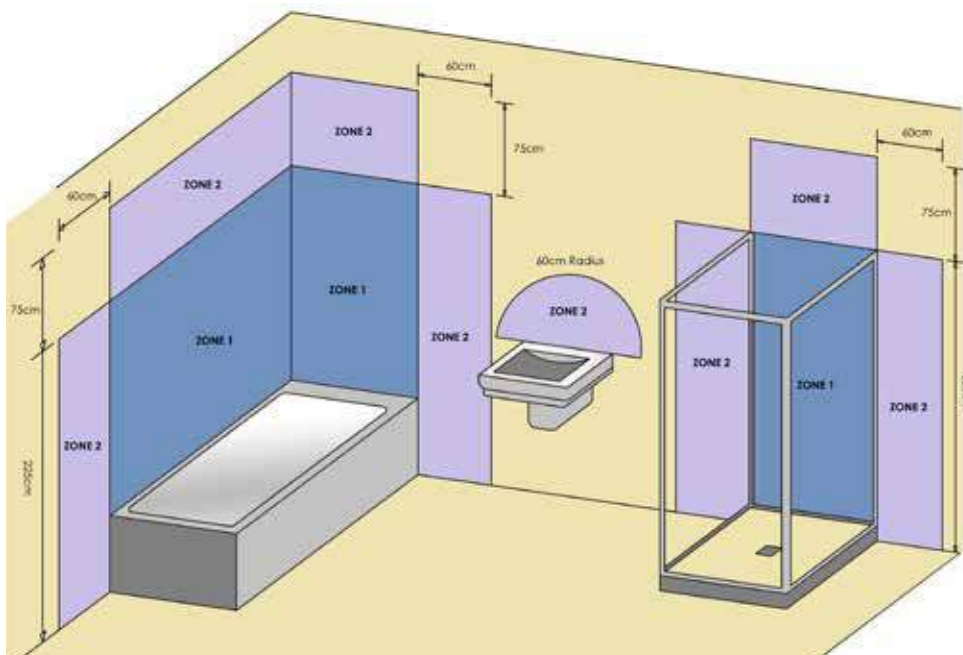

### DISCLAIMER

When an electrical element is used to heat a towel warmer or radiator you will not get identical performance as you would connected to a central heating system. There is no circulation and it will therefore take longer to heat up and will be noticeably hotter near the element. After 1 to 2 hours of continuous use the heat would have spread but there will still be temperature variances across the surface. This is not a fault.

NOTE: All electrical elements carry a 12 month guarantee

# Bathroom Zones & IP Ratings

The bathroom is divided into zones based on a level of risk. Each zone has specific requirements regarding the installation of electrical equipment in that zone. The diagram below is only a guide. Please refer to I.E.E. Wiring Regulations for detailed information.

### IP RATINGS

- IP Rating: 'X' denotes level of security against dust particles. The second digit denotes level of 'watertightness'.
- IPX5: protected against low pressure water jets.
  - IPX4: protected against splashing water.

### ZONES

- Zone 0: the area inside the bath, sink or shower tray. Not recommended for radiator fitting.
- Zone 1: the area above the bath/shower tray to a height of 2.25m. Minimum rating of IPX4 should be used unless water spray will be present. In this case, a rating of IPX5 should be used.
- Zone 2: the area stretching 0.6m from zone 1 and above the sink to a radius of 0.6m. Minimum rating of IPX4 should be used here.
- Zone 3: the area outside zones 1 & 2. Assuming water jets are not to be used for cleaning this area, lower IP ratings can be used.

# Types of Heating Elements

## STANDARD ELEMENT

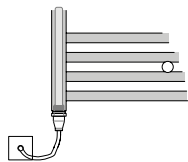

- NON-ADJUSTABLE (unless used with digital wall controller below)
- IP55 RATED (suitable for installation into IEE Zone 1, 2 or 3)
- PERFECT FOR USE WITH DIGITAL WALL CONTROLLER (see below)

With a standard heating element the wattage of the element is matched according to the size of the radiator. It will then heat the liquid inside the radiator and the heat is dispersed by the surface area of the radiator. It has the protection of a thermal 'cut out' should the element become too hot, however there is no control over the radiator or the room temperature.

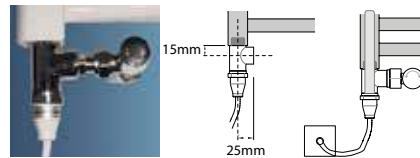

## STANDARD ELEMENT - ELECTRIC ONLY

WATTS	TYPE	PRODUCT CODE	PRICE
75W	Standard E75	ELEO-05-05WC	<b>£120.00</b>
150W	Standard E150	ELEO-05-10WC	<b>£123.00</b>

600W	Standard E600	ELEO-05-20WC	<b>£129.00</b>

## STANDARD ELEMENT - DUAL FUEL

WATTS	TYPE	PRODUCT CODE	PRICE
75W	Standard DE75	ELDF-05-05WC	<b>£78.00</b>
150W	Standard DE150	ELDF-05-10WC	<b>£78.00</b>
300W	Standard DE300	ELDF-05-15WC	<b>£81.00</b>
600W	Standard DE600	ELDF-05-20WC	<b>£84.00</b>

### DUAL FUEL

Note: Valve centres when using a dual fuel element will alter. Please see central image (left) for dimensions.

## DIGITAL WALL CONTROLLER

IP44

Option for use with standard element

- Digital Wall Controller with four button control plate
- CE Approved
- For use with standard elements
- Controls towel rail surface temperature
- Alternative to thermostatic element
- Fits standard UK single back box
- Temperature 'increase/decrease' buttons
- 'Eco' control reduces power consumption by 15% or more
- Can be fitted inside the bathroom

# The next generation of towel warmer control

# Towel Warmer Care

It is very important for the care and guarantee of your towel warmer that it is looked after in the following two ways:

## 1. INTERNAL PROTECTION OF THE TOWEL WARMER / HEATING SYSTEM

It is a requirement of our guarantee (and all new heating systems) that the water within a heating system is cleaned and protected in accordance with BS7593. This is very important for all components of the heating system in addition to the towel warmer.

Abacus recommend the use of Fernox water treatment chemicals for the protection of our towel warmers. Fernox are world leaders in the treatment of heating systems. To protect a system in accordance with BS7593 the system should first be flushed with Fernox F5 cleanser (or similar) and then re-filled with the addition of Fernox F1 Protector (or similar).

### Eliminating magnetite

If your heating system suffers from magnetite (black sludge) we would recommend the installation of a Fernox TF1 Magnetic Filter which will not only protect your towel warmer and radiators but also make your heating system more efficient.

Magnetite (sludge) is a major problem with many heating systems and is caused by a build-up of oxides within the heating system. This can largely be eliminated by the installation of a Fernox TF1 Magnetic Filter. These filters will not only enhance the efficiency of a heating system but also remove the harmful and corrosive magnetite which is a major cause of problems and failures. This is available in an 'installer pack' and comes complete with the F1 inhibitor and F5 cleanser which are required for protecting the system.

**FOR PRICING, PLEASE SEE OUR 'PARTNER BRANDS' SECTION (Page 338)**

## 2. EXTERNAL CLEANING AND PROTECTION OF THE SURFACE FINISH

It is very important that consumers are aware that chrome, stainless steel and painted towel warmers are not self-cleaning.

Mains water can often contain many oxides and if a towel warmer is left wet for long periods of time then surface oxidation (rust) can form on the surface of the product. This can be avoided by using the cleaner supplied with your towel warmer as a sample.

It is important that towel warmers are periodically cleaned externally to maintain the finish of the chrome, painted or stainless steel. For this purpose, we supply a sample of Peek surface polishing chemical with all our towel warmers from new.

Further quantities of this can be purchased as detailed opposite. Just like cleaning the chrome parts on a car this cleaner is designed to protect surface finishes from chemical attack in a damp environment.

DESCRIPTION	PRODUCT CODE	PRICE
Peek Metal Polish 100ml tube	ELSP-25-0010	£9.00

# Bespoke Colour Options

Pick a colour...any colour!

## TOWEL WARMER COLOUR OPTIONS

We can supply any of our powder coated radiators or towel warmers in a RAL colour of your choice. For a fixed price, regardless of model or size, we can powder coat in any RAL colour. Delivery normally takes 7 to 10 days and all you need to do is order a standard colour product with a custom colour option and tell us the RAL code that you require. For example;

1 x ELR112060WH Radius  
1120mm x 600mm White

£168.00

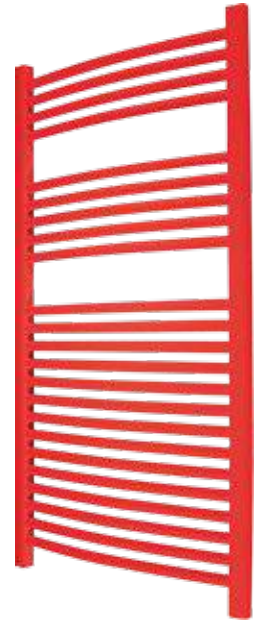

Select the custom RAL colour of  
your choice (e.g. Traffic Red)

Traffic Red  
RAL 3020

1 x ELAC-80-0000 Custom Colour Option  
RAL3020 Red

£120.00

1 x ELR112060WH Radius  
1120mm x 600mm in Bespoke Traffic Red

£288.00

### PLEASE NOTE::

Custom colour option items are specially made to order and cannot be cancelled or returned. Unless otherwise specified, custom colour towel warmers will be supplied with chrome-finished brackets.

- Designer lockshield valve

# Complete Sanitary Fixing Solutions

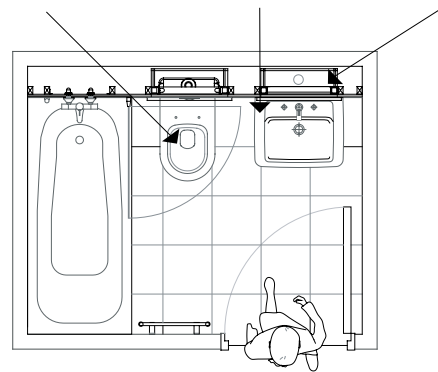

- Easi-plan is an ultra flexible range of concealed sanitaryware installation frames that allow the bathroom designer to design with flair and imagination with no need to compromise installation quality.
- The hidden frames cover all aspects of sanitaryware and brassware installation including WCs, basins and bidets. They create a pre-wall fixing system eliminating the need for unsightly pipe boxing and exposed pipes.
- Easi-plan has been designed specifically for the UK market and its innovative design and installation features make this the future of bathroom design.

## PRE-WALL INSTALLATION PLANNING

The key to any stylish bathroom is in the planning. With Easi-plan any bathroom structure is possible and space can be used more efficiently. Some examples of innovative use of pre-wall design are shown opposite.

The Easi-plan range is not just restricted to sanitaryware fixing frames. Using the voids created by the Easi-plan frame offers the option of having stylish recessed natural timber cabinets to make maximum use of space within the bathroom. These offer vital storage space, an area often overlooked in bathrooms, whilst giving the room the ultimate designer look.

## STANDARD FRAME FEATURES

Frames supplied complete with extension bolt set & quick fix nuts

Easy install wall brackets for vertical or horizontal fixing

**WRAS**  
APPROVED PRODUCT

WRAS approved dual flush cistern adjustable from 6/3 litre to 4.5/3 litre

0-280mm adjustable feet with rubber sound deadening pads

Wall bracket and top of frame designed for easy shelf installation

All cisterns supplied with easy use water isolation valve

Trend 2

Iso 2

Stainless Steel

Lustrolite

A large selection of designer press panels

Large feet for easy rear fixing (specially designed for UK timber floor)

Frame fully tested to 400kg support weight

# Flushing & Support Systems

# WC frames

## WALL-MOUNTED 0.82m WC FRAME

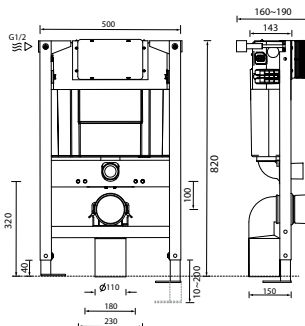

(EPWC-05-1005)

820mm WC frame with dual flush cistern

- Top or front access
- Suitable for all press panels
- Supplied with full pre-wall installation kit (extension bolts included)
- The siphon can be modified to provide a full flush of either 6L/3L (standard) or 4.5L/3L
- Supplied with both straight and angled soil pipe

£315.00

Note: All dimensions are in millimetres

## WALL-MOUNTED 0.98m WC FRAME

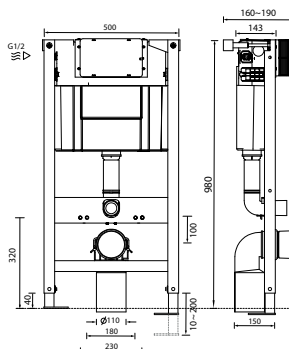

(EPWC-05-1505)

980mm WC frame with dual flush cistern

- Top or front access
- Suitable for all press panels
- Supplied with full pre-wall installation kit (extension bolts included)
- The siphon can be modified to provide a full flush of either 6L/3L (standard) or 4.5L/3L
- Supplied with both straight and angled soil pipe

£315.00

Note: All dimensions are in millimetres

## WALL-MOUNTED 1.18m WC FRAME

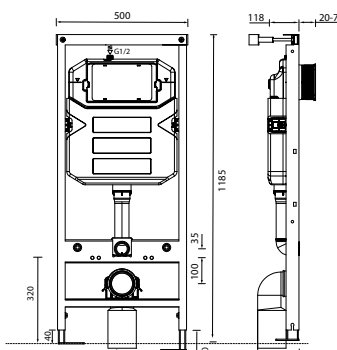

(EPWC-05-2005)

1180mm WC frame with dual flush cistern

- Top or front access
- Suitable for all press panels
- Supplied with full pre-wall installation kit (extension bolts included)
- The siphon can be modified to provide a full flush of either 6L/3L
- Supplied with both straight and angled soil pipe

£299.00

Note: All dimensions are in millimetres

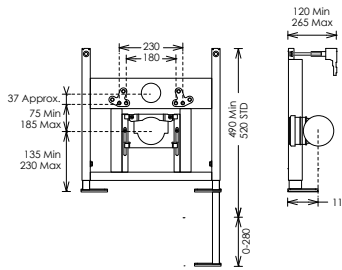

## LOW HEIGHT PAN FIXING FRAME

(EPWC-20-0005)

Wall-hung support frame only

- Requires separate concealed cistern
- Supplied with full pre-wall installation bolt kit

£195.00

Note: All dimensions are in millimetres

# Why use water distribution manifolds?

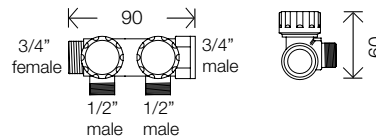

Please note: the use of water distribution manifolds is restricted to installations using mains pressure water supplies and/or combination boilers.

- The use of water distribution manifolds in mains pressure installations is an ideal way of giving ultimate serviceability to all your bathroom products. This offers a very professional installation that is both quiet and easy to install.
- The diagrams below show separate hot and cold water manifolds being positioned within the pre-wall void, so that they are accessible through the over basin shelf.
- Hot and cold water is connected to one end of each manifold which has a 3/4" thread. The separate appliances (i.e. WC system, bath/shower valve and basin) are then piped back to the 1/2" male threads on the manifolds.
- The manifolds can be marked up in either blue or red (i.e. hot or cold) and can also be configured so each outlet has the appliance name (i.e. WC, shower valve, etc.).
- To make plumbing even easier, the Easi-plan range can be plumbed using the Viega range of Profipress fittings for standard UK copper pipe - see page 394.

**15  
YEAR  
GUARANTEE**

\*Guarantee against manufacturing defects, see page 398 for details.

# Raised Showering Concept Kits

## RAISED SHOWERING CONCEPT KITS

The Elements Raised Concept Kit enables you to easily achieve that stylish, designer wetroom look where normal floor drainage systems would be difficult to install.

Create a tiled wet area raised above the standard bathroom floor. The system is lightweight, easy to install and totally flexible in dimensions and drainage types to suit virtually any application. They can even be raised to 140mm so that the drain trap does not need to be installed into the floor.

Supplied with high-capacity drain traps of up to 60 litres/per minute.

Ideal for bath replacements.

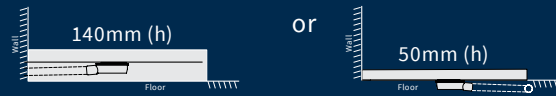

Perfect for apartments or solid floors.

Easy to cut length to exact required size.

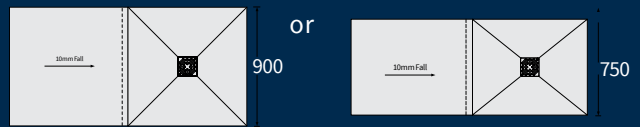

## THREE EASY STEPS

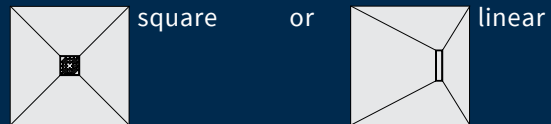

### 1. Choose your height

### 2. Choose your width

### 3. Choose your drain type

Don't forget to consider overboarding your floor. See page 220 for our kit options.

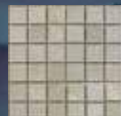

## Complete your wetroom

FOR SHOWERS SEE PAGES 83-114

FOR WETROOM SCREENS SEE PAGES 252-279

FOR TILES SEE PAGES 280-321

## CONCEPT KIT 1 - SQUARE DRAIN

(EMKS-15-1809)

Concept 1 Raised Tray Kit includes complete installation kit

Size (mm) (W x L x H): 900 x 1850 x 130/140

The Concept 1 is designed for use where the customer cannot or chooses not to site the drain within the floor. This system is also suitable where longer runs are required for drainage pipework not achievable within the floor, up to 1.5m from the waste to the soil pipe. This typically will be used for apartment buildings or awkward joist locations on timber floors.

**£838.00**

Note:

- 1) Trays can be reduced in length & width by cutting with a hand saw, however we do not recommend cutting more than 80mm off each side of the tray when reducing the width.
- 2) Tray lengths can be extended by purchasing additional extension kit.

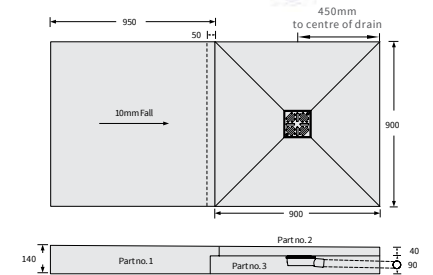

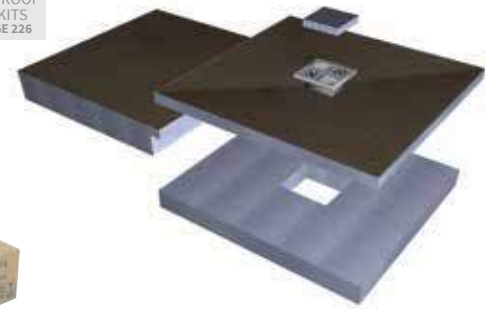

OPTIONAL:

## CONCEPT KIT 4 - SQUARE DRAIN

(EMKS-15-1807)

Concept 4 Raised Tray Kit includes complete installation kit

Size (mm) (W x L x H): 750 x 1850 x 130/140

The Concept 4 is designed for use where the customer cannot or chooses not to site the drain within the floor. This system is also suitable where longer runs are required for drainage pipework not achievable within the floor, up to 1.5m from the waste to the soil pipe. This typically will be used for apartment buildings or awkward joist locations on timber floors.

**£825.00**

Note:

- 1) Trays can be reduced in length & width by cutting with a hand saw, however we do not recommend cutting more than 80mm off each side of the tray when reducing the width.
- 2) Tray lengths can be extended by purchasing additional extension kit.

## EXTENSION KIT – 900 x 750 x 140mm

(EMAP-40-0505)

140mm Height Extension Kit

Elements extension piece, waterproof tape, FIX-KST, Pro-SEAL extends by 750mm for kit 1, extends by 900mm for kit 4

**£216.00**

## CONCEPT KIT 3 - SQUARE DRAIN

(EMKS-05-1809)

Concept 3 Raised Tray Kit includes complete installation kit  
 Size (mm) (W x L x H): 900 x 1850 x 40/50

The Concept 3 is designed for two principal applications where a distinctive shower tray i.e. 50mm off the ground is required. Some customers prefer a small step between the shower area and the rest of the bathroom floor. If a customer wishes to achieve a level floor system on a screeded floor this can be achieved by sitting the 40mm tray within the screed. You must have sufficient clearance in the floor to achieve this.

**£724.00**

Note:  
 Trays can be reduced in length & width by cutting with a hand saw, however we do not recommend cutting more than 80mm off each side of the tray when reducing the width.

## EXTENSION KIT – 900 x 750 x 140mm

(EMAP-40-0505)

140mm Height Extension Kit

Elements extension piece, waterproof tape, FIX-KST, Pro-SEAL extends by 750mm for kit 1, extends by 900mm for kit 4

**£216.00**

## CONCEPT KIT 3L - LINEAR DRAIN 300mm

(EMK3-05-1809)

Linear Concept 3L Raised Tray Kit includes complete installation kit  
 Size (mm) (W x L x H): 900 x 1850 x 40/50

The Concept 3L is designed for two principal applications where a distinctive shower tray i.e. 50mm off the ground is required. Some customers prefer a small step between the shower area and the rest of the bathroom floor. Secondly if a customer wishes to achieve a level floor system on a screeded floor this can be achieved by sitting the 40mm tray within the screed. You must have sufficient clearance in the floor to achieve this.

**£768.00**

Note:  
 Trays can be reduced in length & width by cutting with a hand saw, however we do not recommend cutting more than 80mm off each side of the tray when reducing the width.

OPTIONAL:

# Level Access Shower Tray Kits

## LEVEL ACCESS SHOWER TRAY KITS

Specifically designed for the UK market where bathroom floors are over boarded with either plywood or Element board. These trays are 30mm in height and give a completely flush tiled floor after installation.

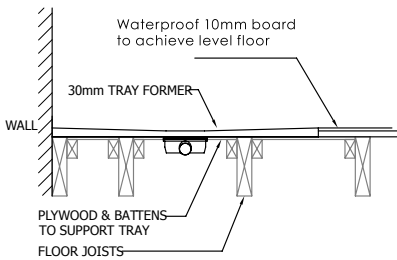

If your desired shape or size of shower tray is not included in the standard shower tray range don't worry! Abacus Elements have the ability to make custom Shower Trays to your design. Virtually any shapes are possible - simply send your requirements to your Abacus Elements dealer.

Supplied with high-capacity drain traps of up to 42 litres/per minute.

Ideal for either timber or screeded floors.

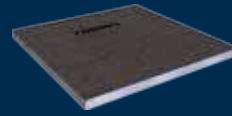

A comprehensive range of tray sizes and drain options.

Easy installation.

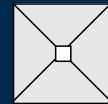

## TWO EASY STEPS

1. Choose your shower tray size

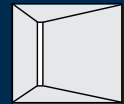

2. Choose your drain type

square

300 linear

600 linear

It is recommended to overboard your floor with 10mm Abacus Elements boards. See page 220 for our kit options.

# Infinity Single Fall Level Access Wetroom System

## INFINITY SINGLE FALL WETROOM TRAYS

Infinity gives the ultimate wetroom look for those who want to tile with large format tiles.

The Infinity range offers four standard shower tray sizes and Abacus Elements can also manufacture bespoke sizes to your specific needs.

The drains are flush with the wall and offer a stylish, minimalist look. There are two drain lengths, 700mm and 1000mm, and both come with a high capacity drain trap of 40 litres per minute.

The infinity trays are all supplied complete with waterproofing tapes attached and a comprehensive installation kit for total piece of mind and installation ease, all backed with a 15 year guarantee.

All trays are supplied with Lustrolite tapered tile trim.

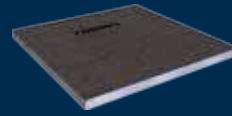

# 15 year guarantee\*

\*Guarantee against manufacturing defects, see page 398 for details.

## TWO EASY STEPS

1. Choose your shower tray size

2. Choose your installation position

# Elements Building Boards 6mm – 100mm

## ELEMENTS

Kind to the Environment

High Compressive Strength

Lightweight & Easy to Handle

Waterproof Properties

Insulating Properties

Easy to Cut

Economical Construction Product

## Features & benefits

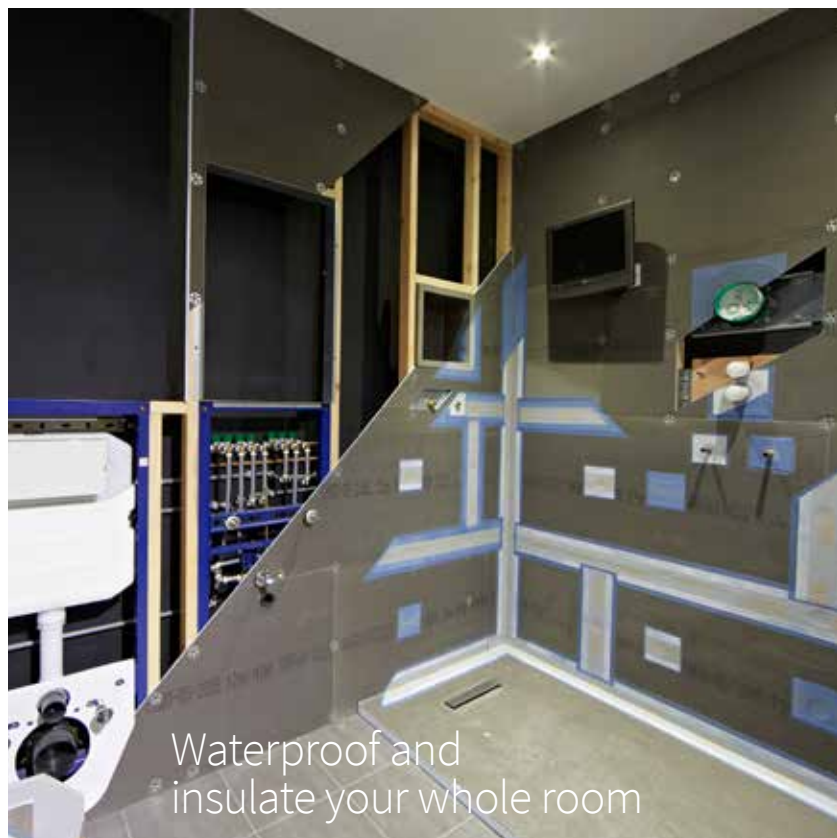

- More stable in moist environments than timber
- Can be used for cladding walls and floors
- Can be used both internally and externally
- Can be either mechanically fixed, glued with Abacus Elements adhesive or both
- Cut easily with a hand saw to correct size, shape and around obstacles
- Good insulating product to help reduce condensation
- Offers higher adhesion to tiles than either timber or plasterboard
- Can be fixed onto almost any surface
- Has a high compressive strength of over 25 Tonnes per sq.m making it incredibly strong when tiled
- Can either be tiled or plastered
- A perfect product for the fast creation of tiled partition walls anywhere within the home
- Recommended for use with electric under tile heating systems

The most comprehensive wetroom and waterproofing system available in the UK.

all backed with a 15 year guarantee

## ELEMENTS BESPOKE

The only limit is your imagination.

## WETROOM GLASS PANELS

The ultimate in wetroom luxury.

X Series offers a range of twelve sizes of 10mm toughened glass panels all with Easi-Clean coating.

Together with a comprehensive range of support bars and channels, X Series lets you be totally creative in your wetroom design whilst offering outstanding value.

Easi-Clean:

- Keeps glass looking like new
- Reduces water spots (limescale and mineral deposits)
- Is always easier to clean
- Stays cleaner for longer
- Significantly reduces the growth of bacteria

# Wetroom Glass

X SERIES

# How to order X Series Wetroom Glass in 5 easy steps

THE POSSIBILITIES ARE TRULY LIMITLESS WITH THE NEW X SERIES RANGE OF GLASS, CHANNELS, CLAMPS AND SUPPORT BARS.

## 1. Create your design

By combining one or more pieces of X Series glass together with our range of vertical channels, you have the ability to create anything from a simple piece of glass to complex screens with return panels.

## 2. Choose your glass size

The X range of 10mm toughened glass covers a variety of sizes from 290mm right up to 1190mm in width and 2000mm height so you can be sure to find a size to suit.

X Series glass is supplied with Easi-Clean technology at no extra charge which helps reduce limescale deposit build-up and keeps your glass cleaner for longer.

## 3. Choose your preferred glass channel

Your X Series glass should be supported within a floor and wall channel and the range offers three options of floor and wall channel:

- Our X Surface Channel has a clever two layered base so that the glass is raised higher than the screw head. This channel is best suited for applications where the tile has already been laid.
- Alternatively our X Recessed Floor & Wall Channel can be installed when tiling to give a minimalistic look.
- Our innovative new V Fix channel allows you to use channelling without the need for silicone which is a great time-saving option.

## 4. Choose your wall/ceiling support

Depending on the size of the glass you are installing we would recommend that you give the glass panel additional support with an X Series Support Bar. These are available in both horizontal and vertical options and can be cut down to suit your application. See opposite for a guide to choosing glass supports.

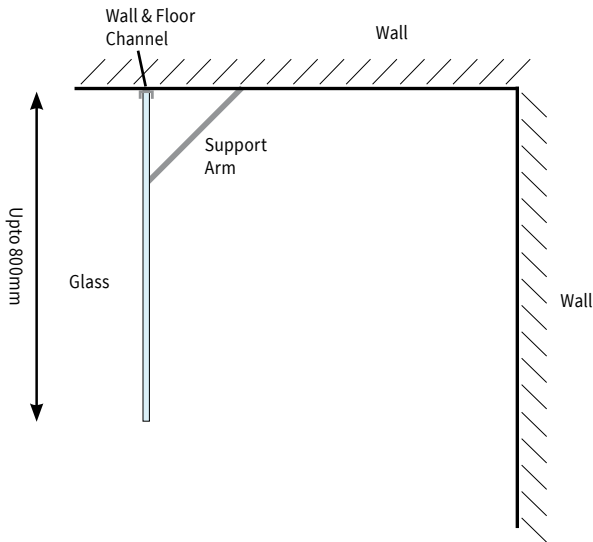

## 5. Finish the look

The X Series includes a range of complementary accessories to give that final touch to your design. Why not add a Double Robe Hook or Towel Hanging Bar with Glass Shelf?

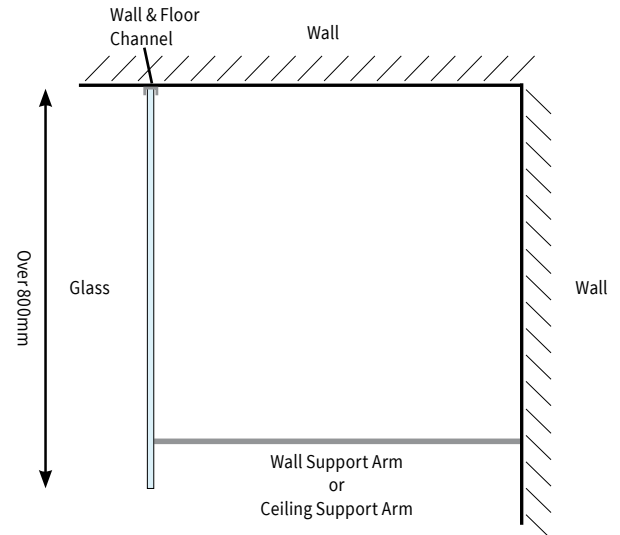

# A Guide to Choosing Glass Support

1.

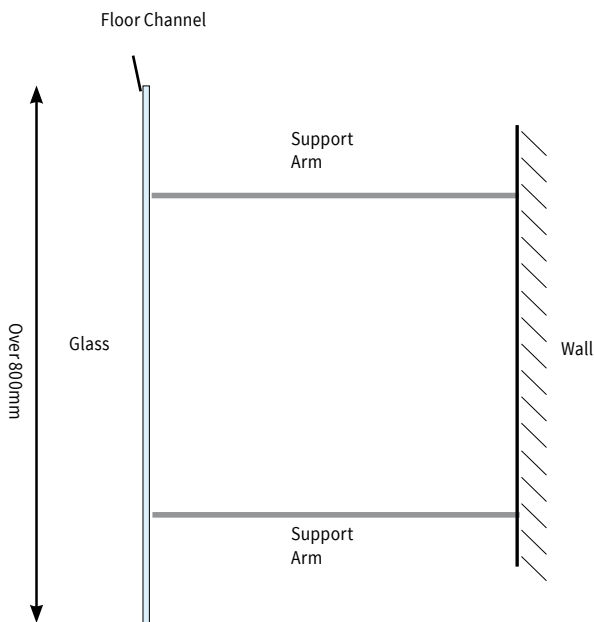

2.

General option for glass over 800mm

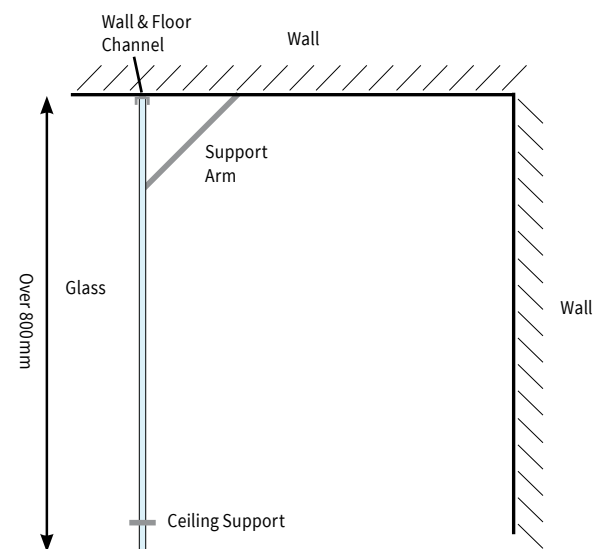

3.

General option for glass over 800mm

4.

General option for glass over 800mm

Note: These general options are suggestions only, there is no right or wrong way to support bespoke glass panels. Abacus Direct cannot be held responsible for the suggestions shown above as the designers and installers need to be comfortable with the correct level of support required for each project.

# X Series Glass Panels

**290mm - 1190mm WIDTH**  
**10mm TOUGHENED SAFETY GLASS - 2.0m HIGH**

The X Series begins with a range of 12 glass panels which can be used collectively or independently to create any shower combination you wish for. Specifically designed for use in wet rooms the X Series brings a timeless elegance to any shower setting.

## X Series Bespoke Option

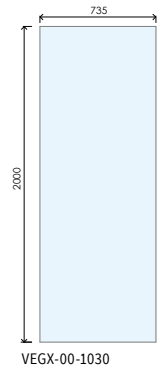

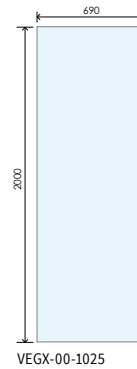

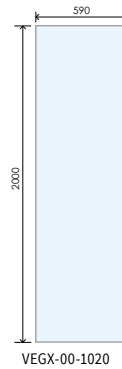

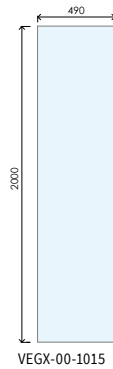

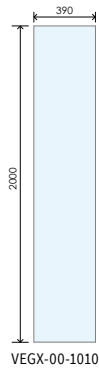

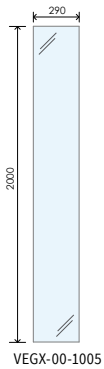

If you require a glass option outside our standard sizes please ring our sales office who will be pleased to quote you on any bespoke size. Options can include glass in different shapes and thicknesses and etched designs to your specification.

# Designer Bathroom Tiles

NATURAL STONE

PORCELAIN

SPECIALIST MOSAICS

# The timeless beauty of natural stone

## ADVICE ON NATURAL STONE PRODUCTS

### Colour

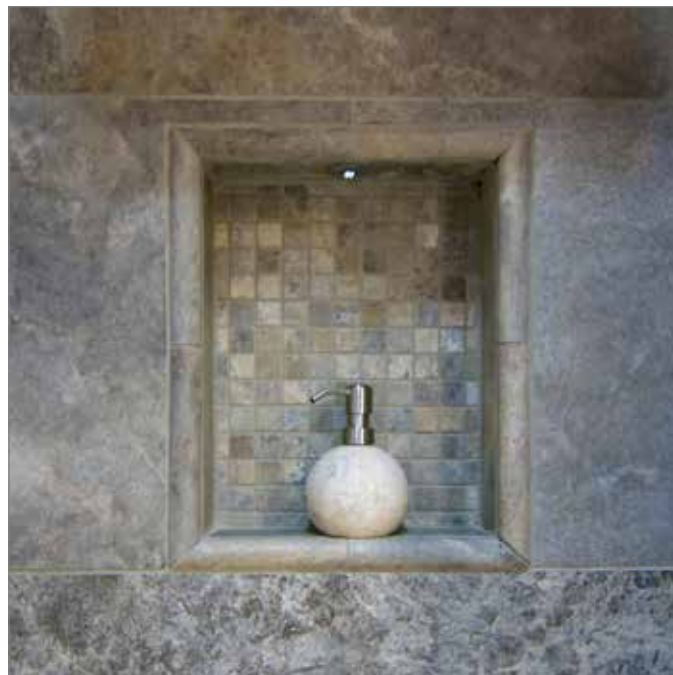

Stone tiles are manufactured from natural materials so it is normal to experience colour variations within each pallet of material. This is part of the beauty of natural stone. Should you wish to enhance the colour of your stone then it should be sealed with colour enhancing sealer which greatly accentuates the colour of the stone.

### Sealing

Natural stone tiles require sealing to protect them from staining. It is recommended that this be done twice - once prior to grouting and again after grouting. Ongoing additional cleaning and sealing may be required dependent on use.

### Fixing

Stone tiles and large porcelain tiles can be quite heavy. We recommend that they are fixed onto a suitable substrate. The strength of the substrate should be checked prior to installation. For floors we recommend 10mm Elements Board. For walls we recommend a minimum of 12mm Elements Board.

# Beige Travertine

Our Travertine is 1st grade premium quality and is supplied in a 'honed' finish and filled to give an even surface.

Also unlike most other Travertine our tiles have chamfered edges to avoid sharp edges.

Natural stone tiles are formed geologically over millions of years and part of their beauty is their colour and shading variations. This should be appreciated before making your purchase. In addition it is important that your installer blends your natural tiles prior to installation to ensure that the shades are distributed evenly.

# Silver Travertine

Silver Travertine, formed by the deposition of calcium carbonate by springs and rivers is a beautiful and unique colour of Travertine. Its bold shading and banding is caused by a mixture of iron and organic compounds.

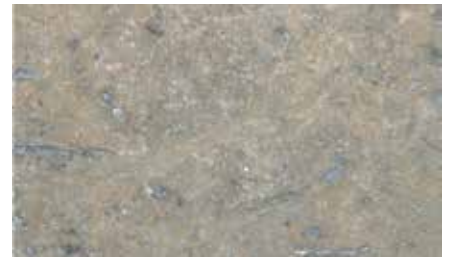

Natural stone tiles are formed geologically over millions of years and part of their beauty is their colour and shading variations. This should be appreciated before making your purchase. In addition it is important that your installer blends your natural tiles prior to installation to ensure that the shades are distributed evenly.

## SILVER TRAVERTINE MARBLE TILE

# Porcelain stoneware

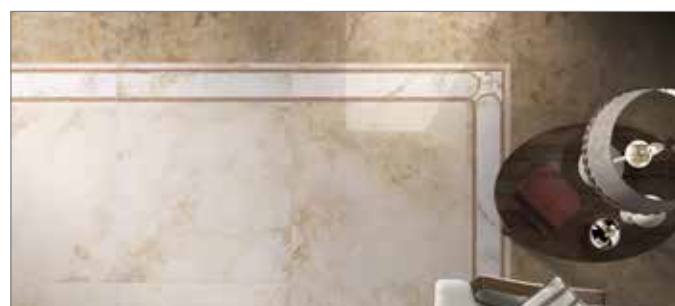

## RE-CREATING THE BEST OF NATURAL MARBLE & LIMESTONES

A stylish and practical alternative to natural stone, porcelain makes for a low maintenance floor or wall covering. Look out for our exciting ranges; whether they cleverly replicate the beauty of natural stone or offer that urban, minimalistic look, our Porcelain collection covers all bases.

Porcelain tiles are a type of ceramic with a very low absorbency. They are usually made from kaolin clays and fired at around 1,200°C, due to this high firing temperature and high density they are very hardwearing. A majority of our Porcelains are 'rectified', which means there will be little variation in size.

Porcelains are usually colour glazed to give a matt or gloss finish. Unlike natural stone they do not require continuous sealing. We recommend just one coat after installation.

As with all tiles, due to the manufacturing process, shading variation may occur between batches.

Left hand hinge only

**£499.00**

# Recessed Cabinets

Trio Recessed Cabinet – a classic mirrored cupboard and shelving combination designed to be installed in a pre-wall to utilise all available space in a practical yet fashionable way.

To make the installation of the recessed cabinets as simple as possible, we offer a unique range of installation frames. These frames can be installed whilst building the void wall and create a tile guide in order to achieve an exact sized opening for the cabinet. This means the installation of the cabinet can be done very easily at the final stage of the bathroom installation.

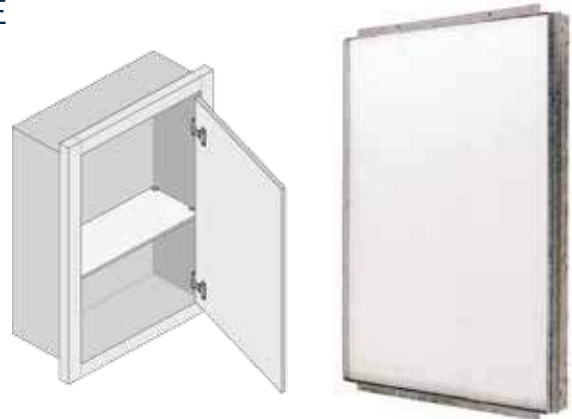

### TRIO RECESSED CABINET INSTALLATION FRAME

(EPCA-05-1505)

The installation frame is not necessarily required to fit the cabinets, but it is recommended to ease installation.

- Galvanised Steel Installation Frame
- For Trio recessed cabinet
- 761(h) mm x 498(w) mm

**£54.00**

### TRIO RECESSED STORAGE CABINET

- Recessed cabinet
- Pre-wall installation
- Left or right hand hinge opening
- 535(w) x 800(h) x 215(d) mm
- Optional lighting available

**FROM £399.00**

High performance drainage and plumbing solutions

# Lustrolite glass-effect panelling

## THE AWARD WINNING LUSTROLITE PANEL BRINGS LIFE TO SHOWER WALLS AND KITCHEN SPLASHBACKS

Lustrolite® is an advanced multi-layer acrylic sheet that looks just like glass. Lustrolite applications include shower walls, bathrooms and kitchens.

Weighing less than a quarter of a traditional glass sheet, Lustrolite has 20 times the impact strength. The colour is permanently fused to the clear layer and cannot be separated by moisture. Its unique hard coated surface is highly resistant to typical shower and glass cleaners, and also offers a high scratch resistance.

## EFFORTLESS TO INSTALL

Lustrolite is easy to work with and can be installed rapidly over new or existing wall finishes.

- Can be cut and drilled on site with standard wood working tools
- Typical panel install takes about a third of the time of ceramic tiles
- Joints can be sealed with neutral cure silicone or specially designed profiles

## EASY TO MAINTAIN

Lustrolite is easy to clean using warm water and a soft microfibre cloth or chamois. Strong chemicals are not required.

- No grouting and less joints
- Non-stick surface will not promote mould, bacteria, soap or calcium build-up
- Highly resistant to typical shower and glass cleaners

## LUXURIOUS AND ELEGANT FINISH

Each Lustrolite polymer panel is meticulously finished, perfectly smooth, and looks just like glass.

- High gloss lustrous surface
- Glass like depth of colour
- Will transform and add colour to any bathroom or kitchen

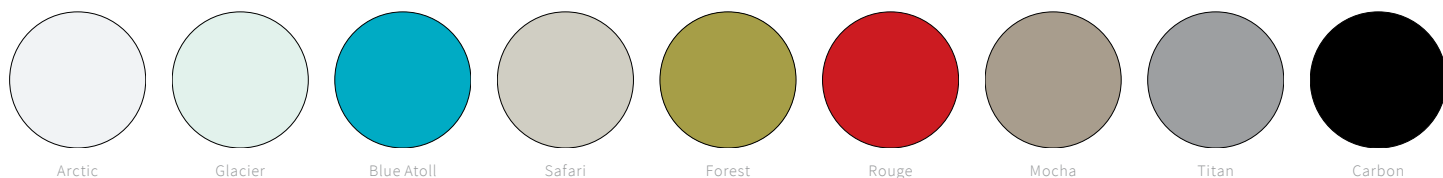

# Lustrolite

THE FULLY WORKABLE ACRYLIC  
ALTERNATIVE TO GLASS

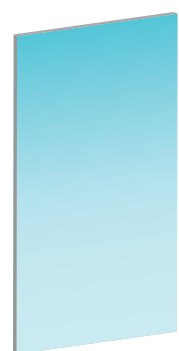

# Colour range

Lustrolite is available in both kitchen and bathroom specific sizes in all 9 high gloss colours

# Kitchen panels\*

\*suitable for ceramic, electric or induction hobs. Panels are not to be used directly behind or adjacent to a heat source above a continuous service temperature of 77°C. When used behind electric, ceramic or induction hobs a clearance of at least 50mm is essential between the edge of the hob and the panel. Lustrolite is NOT TO BE USED behind a gas hob (naked flame). Please see page 346 for the gas hob installation options.

£129.00

## DEVI mat

FOR AN EVEN, LUXURIOUS  
WARM FLOOR.

DEVI mat is ultra-thin, easy to install within the tile adhesive, adding no extra height to the bathroom floor.

Selecting your Devimat system is as easy as 1, 2, 3

### 1. Select the Devimat type

For timber floors use Devimat 100  
For concrete and Abacus  
Elements floors use Devimat 150

### 2. Select the Devimat size

Match the free floor area of the room to the nearest Devimat size, always rounding down the requirement.  
i.e. If your floor area measures at 4.3m<sup>2</sup> then select 4m<sup>2</sup> Devimat

### 3. Select the controller

Generally only one controller will be required, but for larger areas the following applies:

- For timber floors use one controller per 35m<sup>2</sup>
- For concrete floors use one controller per 23m<sup>2</sup>

## DEVI mat

FOR AN EVEN, LUXURIOUS  
WARM FLOOR.

TLTA-20-2006	5 LITRE	<b>£179.00</b>
TLTA-20-2004	1 LITRE	<b>£34.50</b>

## ROCATEX C10 ULTIMATE SEALER SPRAY

(TLTA-20-2008) 500ml

A high performing VOC free water-based impregnating sealer designed using the very latest technology in Fluorochemistry. This versatile and easy to apply penetrating and invisible sealer provides a durable non-film-forming, protective barrier against oil and water on porous acid sensitive surfaces including polished and unpolished natural stone, paving, concrete, render and grout. C-10 Ultimate Sealer allows the surface to breathe and provides excellent oil, grease and water repellency, stain resistance and ease of cleaning.

**£24.50**

## ROCATEX TILE & STONE CLEANER

A high quality liquid soap containing a trace of linseed oil especially formulated to clean without damaging the most delicate surfaces. Has a fresh, clean fragrance.

PRODUCT CODE	SIZE	PRICE PER BAG
TLTA-20-2036	5 LITRE	<b>£95.00</b>
TLTA-20-2034	1 LITRE	<b>£19.50</b>

## ROCATEX GROUT & CEMENT REMOVER

(TLTA-20-2026) 1 litre

A rapid action cleaning agent for removing cement residues, grout stain, efflorescence and other similar deposits from glazed and unglazed ceramics, slate, quarry tiles, brick, terracotta and stone.

**£19.50**

## ROCATEX TILE & STONE RENOVATOR

(TLTA-20-2028) 1 litre

Intensive cleaner, effective for removing oil, grease, ingrained dirt, grime and old wax layers. Ideal for intensive stone care and for renovating heavily soiled floors.

**£19.50**

## ROCATEX MOULD REMOVER

(TLTA-20-2032) 500ml

Targets and removes mould spores, fungus, algae and moss from grout joints, tiles, silicone surfaces and other damp places. Antibacterial properties help to prevent re-growth.

**£18.50**

# Grundfos Home Booster

BE. THINK. INNOVATE.

The Home Booster is available in two models:

**Home Booster 3.0 Bar**  
is fitted with the CM 3-4 l

**Home Booster 4.5 Bar**  
is fitted with the CM 3-6 l

**Home Booster**  
**180 litre Slave Unit**  
for additional water  
capacity if required

The Home Booster is a compact, efficient and quiet solution for meeting the demands of modern pressurised domestic hot and cold water systems.

The Grundfos Home Booster is a self-contained cold water booster set, designed for domestic properties where the existing mains water supply is insufficient to meet the demand requirements of pressurised hot and cold water systems.

The Home Booster is suitable for most domestic properties with one or two standard bathrooms with standard fittings, or en-suite, and cloakroom, plus other normal household appliances.

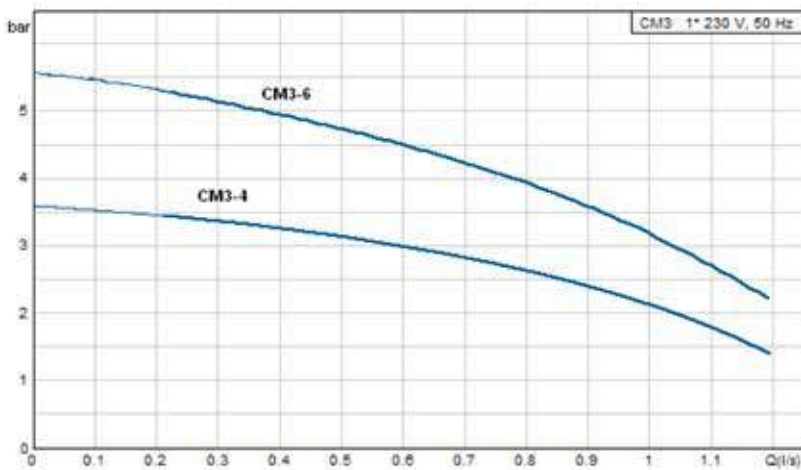

- Integrated 200 litre storage tank (180 litres usable volume)
- Electronically on/off controlled
- Nominal performance 3.0 bar or 4.5 bar at 0.5 l/s (depending on model)
- Packaged set ready for installation
- Dry run protection
- WRAS Approved Components

find out more at [www.grundfos.co.uk](http://www.grundfos.co.uk)

# Grundfos Home Booster

BE. THINK. INNOVATE.

The unit features an integral 200 litre storage tank with Type AB air gap, in accordance with Water Byelaws regulations. The high quality stainless steel pump delivers high efficiency, sustained performance, long working life and quiet operation. The Grundfos PM2 controller on/off controls the pump, and also provides dry run protection should the storage tank run out of water.

The Home Booster has been developed to provide a compact and cost-effective solution. It is self-contained and its compact size makes it ideal for domestic installations where space is at a premium, and may be typically installed in a utility room or a garage.

For larger properties, the Max-E Boost should be considered, it is not recommended to install two Home Boosters operating together to achieve increased flow.

Installation is straightforward, requiring connection of mains cold water supply, discharge pipe, overflow pipe and electrical connections.

For properties with 4 to 5 occupants, or where the storage tank refills very slowly due to poor mains water pressure, an additional 180 litre water storage slave tank option is recommended to increase the storage capacity.

The Home Booster is controlled by the PM2 pressure manager.

The PM2 is the all-round control solution, offering adjustable pump start at 1.5 to 5 bar. This enables customisation to different types of installation and desired comfort levels. The start pressure is set inside the unit, whereas current pressure is read on the intuitive LED display on the front of the Pressure Manager.

# Silent 100 Design

EnviroVent's stylish SILENT 100 DesignFan is ideal for bathrooms, utility rooms and WCs.

It is available in two colours, white or silver and has four smart looking interchangeable front panel trims in four evocative shades. What's more, by incorporating whisper-quiet silent technology, the presence of the SILENT 100 Design Fan promises never to ruin the ambiance of the room it is installed in.

In 2013, the SILENT 100 Design Fan received the Noise Abatement's Society's seal of approval - the Quiet Mark. This versatile little number can be wall or ceiling mounted and is also available with timer and humidity sensor options.

# Advantix Vario

THE FIRST TAILOR-MADE SHOWER CHANNEL

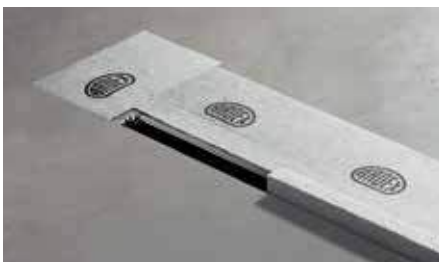

Viega Advantix Vario is the first shower channel which can be shortened exactly to the required length.

Whether installed directly on the wall or free-standing in the room, whether straight, corner or U-shape – the Advantix Vario shower channel makes it easy to design your bathroom individually, while satisfying all the structural demands.

#### 1. Simple, quick assembly

Step 1: Shorten the channel base unit using a hacksaw and a saw guide, deburr the cut edges, attach the protective caps and screw on. Step 2: Determine the construction height, shorten the height adjustment piece and mount the drain set and support feet. Step 3: Align the shower channel, connect to the drain pipe and fasten the feet.

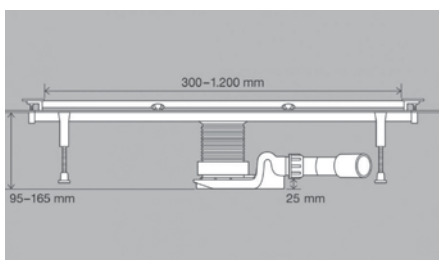

#### 2. Secure sealing concept

A durable and practicable seal is the most important feature of a floor level shower. All of the materials required, such as special adhesive and sealing strip, are included in the scope of delivery.

#### 3. Height adjustable

Using an adjustable bridge bracket, the grate height can be adjusted to tile heights of 5 to 20 mm. For thicker floor coverings (e.g. natural stone), Viega offers an accessories kit, with which the metal grate can be adjusted to between 15 and 30mm. For corner, U and long designs, there are additional connectors available. The connections to the channel are sealed with a special sealant which guarantees a secure connection.

#### 4. Variable installation height

The installation height of the Advantix Vario is between 95 and 165mm. In its flattest installation state, the height difference between the drain support and foundation is just 25mm. For standard inclines, this means 250cm of connecting pipes can be installed without having to raise the shower channel. The drainage capacity for each individual channel is 0.4 to 0.8l/s depending on the installation height.

- Prize-winning design
- Attractive colours
- Limitless design options
- Permits all channel lengths from 30cm to 280cm
- Quick and simple assembly
- Variable installation height
- Secure sealing concept
- Height-adjustable grate
- Self-cleaning drain
- Drainage capacity of up to 2.4l/s
- Extensive accessories

# Viega Visign

## ELECTRONIC MIXERS FOR BATHS & SHOWERS

The electronic bathtub fittings Multiplex Trio E are characterised by the comfort they offer in terms of fully-automated tub filling as well as their long service life, easy operation, and award-winning design. Timelessly beautiful and made of chrome and glass, their shape and materials complement any bathroom design.

# Viega Visign

## NEW COMFORT - ELECTRONIC MIXER UNITS

### Fully automated bathtub filling

The multi-functional operating elements of the Multiplex Trio E fittings (MT E) regulate and save the water temperature, volume and filling level. The settings can be accessed at any time – there's no need to watch the bath filling up. In addition, the electrical valve cone of the optional Viega drainage and overflow fittings can be opened and closed using the MT E controls.

### Multiplex Trio E3: with display and control element

The display element makes it intuitive to operate. It shows the individual default settings, water temperature and water inlet volume and a user menu is displayed when you press lightly, allowing you to select all further functions to do with filling the bath. The temperature selection and On/Off function are combined into one chrome-plated control element.

#### MULTIPLEX TRIO E3 CONTROL ELEMENTS

The rotatable display element with a glass surface and the element made completely of chrome ensure intuitive handling. That makes Trio E3 especially attractive for use in semi-public buildings (hotel or medical uses).

### Multiplex Trio E2: with two control elements

The bath is filled using two control elements. One controls the On/Off function and water temperature. Another regulates the water inlet volume and the switchover to the adjustable shower head.

#### MULTIPLEX TRIO E2 CONTROL ELEMENTS

A clear separation of the functions in two control elements, but optically identical. The Multiplex Trio E2 stands for clarity in control and function.

### Multiplex Trio E: with all functions in one control element

One button for everything: all functions can be called up using one control element.

#### MULTIPLEX TRIO E CONTROL ELEMENT

Everything is concentrated in one central control element. Information about the water temperature and the flow volume can be seen on the lighting.

## MULTIPLEX TRIO E MIXER UNIT

(VIE-662295)

- For filling a bathtub (electronically controlled), in connection with Multiplex Trio, Multiplex Trio F, Rotaplex Trio or Rotaplex Trio F (optional electric driven), electrical opening/closing of a Viega drain fitting

# Viega Profipress

## PIPE FITTINGS

Viega Profipress sets standards in quality and hygiene. High quality materials and intelligent technology guarantee the necessary quality of drinking water at any extraction point.

## Copper and gunmetal: ideal materials for drinking water hygiene.

Drinking water regulations stipulate that materials must not be able to cause any unauthorised change to the properties of the drinking water. For this reason, only copper and gunmetal are used in the Profipress system. Quality materials, which are both long lasting and corrosion-resistant. All the connectors are delivered, hygienically packaged in a bag.

## Recommended: installation as closed circular and series pipelines.

To avoid any risk to the drinking water quality caused by stagnation, a constant exchange of water must be ensured in all areas of the drinking water installation. For this reason, extraction points that are not in regular use must be installed in either closed circular or series pipelines. Viega has the right technology on offer for both of these.

## Profipress connections in 15mm, 22mm and 28mm sizes to suit the UK market.

The low pressure losses of Profipress connections make it possible to tailor the dimensioning to demand. There are economic and hygienic advantages to this. The Profipress fittings are for use with UK standard copper tube manufactured to BS 2871.

# Viega Pressgun

## VIEGA PRESSGUN PICCO

(VIE-735456)

- with rechargeable battery
- with press jaws for metallic press connector systems
- equipped with Press jaws: 15mm, 22mm, 28mm
- lithium ion rechargeable battery technology
- rechargeable battery 18 V/2.0 Ah
- battery charger 230 V/18 V
- patented safety mechanism
- automatic maintenance display
- LED lamp for lighting of press position
- case with space saver for power pack

£ POA

## FERNOX F1 EXPRESS PROTECTOR 265ml

(MSFE-01-0001)

- Quick and convenient – doses in 30 seconds
- Simple to use with no mess
- Protects against corrosion and limescale
- 100% recyclable can
- Maintains system efficiency and extends boiler life
- Suitable for use with all metals and materials including aluminium
- Non toxic, environmentally friendly

£23.50

## FERNOX F5 EXPRESS CLEANER 280ml

(MSFE-05-0005)

- Quick, convenient and simple to use – doses in 30 seconds
- 100% recyclable cans
- Added via a radiator adapter or filling loop supplied
- Compatible with all metals and materials including aluminium
- Removes sludge and scale and restores heating efficiency
- Removes flux residues and other debris
- Neutral, non-hazardous and environmentally formulation

£26.50

## FERNOX TF1 INSTALLER PACK WITH FILTER

(MSFE-20-0005)

- Award winning Total Filter TF1's unique action removes magnetic and non-magnetic contaminants
- Easy to fit and clean – the TF1 makes servicing simple
- Fernox Express doses via the TF1 in 30 seconds to save time spent on-site
- Fernox best in class for innovative design, formulations, and applications

£139.50

### Prices

The prices displayed throughout this catalogue supersede all other previous publicised price lists. All prices include VAT and are subject to change without prior notice.

### Returns

Goods may be returned for credit only following written approval by Abacus.

Special-order or bespoke items are non-returnable.

Order cancellation will be subject to a 25% re-stocking charge.

Abacus reserve the right to refuse credit on goods returned damaged or in a condition unfit for resale.

Also there may be an applicable charge for the re-boxing of a returned product.

### Delivery

All orders below a nett invoice value of £100 (ex. VAT) will incur a £6.95 delivery charge.

The Company must be notified within 14 days of any claim for a product not delivered.

Abacus will do our best to deliver all orders on time and complete, however we cannot accept any liability for delays or failure to deliver products.

## Care and maintenance

Abacus products are manufactured to exacting standards and following the care and cleaning guidelines below will ensure that your bathroom will give you years of effective use.

### Sanitaryware

Ceramic items such as wash basins, WCs and bidets should be cleaned with a cream type bathroom cleaner applied with a damp cloth or sponge using warm water.

Resin cast basins have a protective 'Evermite' surface to help against the build-up of dirt and limescale. They should be cleaned using diluted detergent in warm water and applied with a non-abrasive cloth.

Toilet seats should be cleaned using a mild detergent and a non-abrasive cloth. Cleaning products containing bleach should not be used on toilet seats as this may cause discolouring.

### Furniture

Our furniture is a high quality timber product and needs to be installed in a bathroom with appropriate extraction/ventilation. It should not be sited in a position within the bathroom where it will become constantly wet. For best results, any standing water left on the furniture should be removed daily with a moist microfibre cloth.

### Taps & Brassware

Taps and brassware products should be cleaned with a diluted mild detergent such as washing up liquid applied with a soft sponge or cloth, and then buffed dry with a microfibre cloth.

Avoid using acids, rough sponges or steel wool and do not leave detergent on the products for long periods of time.

### Towel Warmers

Both mild steel and stainless steel towel warmers should be cleaned only when cold with a moist soft or microfibre cloth. Any surface oxidation on the products should be removed using a metal polishing cream such as 'PEEK'. We also recommend that towel warmers are polished with a PEEK type product on an annual basis to give long-lasting surface protection.

### Natural & Porcelain Tiles

Both natural and porcelain tiles should be cleaned and protected with the appropriate Rocatex cleaner or sealer (found within our Partner Brands Section), and as directed by the specific instructions for the individual product.

### Glass

Our glass wetroom screens are protected by an easyclean nano-technology coating to make cleaning easier. We recommend that glass screens are cleaned with a diluted detergent and dried with a microfibre cloth. We recommend regular wiping of glass screens in order to remove excess water, which in some areas can be quite aggressive.

### GENERAL

NEVER use products containing bleach on bathroom products or any cleaners or cloths of an abrasive nature.

## Product Guarantee\*

Unless stated below all Abacus products carry a 15 year guarantee.

- The guarantee covers products which have been installed to the manufacturer's instructions, and if used in a bathroom, the room is deemed to have suitable ventilation in accordance with UK building regulations.
- The guarantee is available to original purchasers who have proof of purchase and is non-transferable.
- Abacus operate a policy of continued product development. In the event that a faulty product has been superseded, Abacus will replace the product with the nearest equivalent item. Abacus reserve the right to change designs and specifications without prior notice.
- In the event of a product fault after installation, Abacus must be given the opportunity to inspect the item in its installed state.
- The guarantee does not cover consequential loss. (Your statutory rights are not affected).
- The guarantee does not cover products that have been modified in any way.
- The guarantee does not cover any products that have previously been on display in a showroom.
- The guarantee covers products in normal use. Faults or damage caused by neglect, misuse, wilful or accidental damage, inappropriate cleaning and incorrect installation are not covered under the guarantee.
- The guarantee covers UK installations only.

\*Exceptions to the Abacus 15 Year Guarantee

\* Mild Steel Towel Warmers – 10 years

\* Furniture & Cabinets - 5 years

\* Cistern Fittings, Toilet Seats & Light Bulbs – 1 year

# Terms and conditions

## 1. INTERPRETATION

### 1.1 Definitions

In these Conditions, the following definitions apply:

Abacus: Abacus Direct Limited a company registered in England and Wales with company number 04331572 whose registered office is at Abacus House Jubilee Court, Copgrove, Harrogate, North Yorkshire, HG3 3TB.

Business Day: a day (other than a Saturday, Sunday or public holiday) when banks in London are open for business.

Conditions: the terms and conditions set out in this document as amended from time to time in accordance with condition 13.9 and all other documents referred to therein including, but not limited to, the Returns Policy and the Delivery Guide.  
Contract: the contract between Abacus and the Customer for the sale and purchase of the Goods in accordance with these Conditions.

Customer: the person or firm who purchases the Goods from Abacus.

Delivery Guide: Abacus' guide to delivery costs and services which is available online at [www.abacus-bathrooms.co.uk](http://www.abacus-bathrooms.co.uk).

End-User: the person or firm to which the Customer re-sells the Goods.

Force Majeure Event: an event beyond the reasonable control of the affected party including but not limited to strikes, lock-outs or other industrial disputes (whether involving the workforce of the party or any other party), failure of a utility service or transport network, act of God, war, riot, civil commotion, malicious damage, compliance with any law or governmental order, fire, regulation or direction, accident, breakdown of plant or machinery, telecommunications failure (including problems with internet transmission) fire, flood, storm or default of suppliers or subcontractors.

Goods: the goods (or any part of them) set out in the Order.

OEM Branding: the OEM Customer's brand.

OEM Customer: a Customer who requests Abacus to manufacture the Goods to include OEM Branding.

Order: the Customer's order for the Goods that can be placed either by email, telephone, fax or such other electronic means as Abacus and the Customer may agree from time to time.

Product Portfolio: Abacus' catalogue listing all the Goods supplied by Abacus and setting out the description of the Goods, the prices and the Product Warranty as may be amended or updated by Abacus from time to time.

Product Warranty: the warranty provided by Abacus (or the manufacturer of the Goods) in respect of each of the Goods as set out in the Product Portfolio.

Returns Policy: Abacus' returns policy which is available online at [www.abacus-bathrooms.co.uk](http://www.abacus-bathrooms.co.uk).

Services: dealing with enquiries or complaints raised by End-Users, the processing of returns of Goods and/or showroom design and fitting services.

Specification: any specification for the Goods, including OEM Branding and any related plans and drawings that is agreed in writing by the Customer and Abacus.

VAT: value added tax.

Warranty Period: has the meaning set out in condition 5.1.

Website: Abacus' website at [www.abacusedirecttd.com](http://www.abacusedirecttd.com).

### 1.2 Construction

In these Conditions, the following rules apply:

1.2.1 A person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality).

1.2.2 A reference to a party includes its personal representatives, successors or permitted assigns.

1.2.3 A reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted.

1.2.4 Any phrase introduced by the terms including, include, in particular or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

1.2.5 A reference to writing or written includes faxes and e-mails.

## 2. BASIS OF CONTRACT

2.1 These Conditions apply to the Contract to the exclusion of any other terms that the Customer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing.

2.2 The Order constitutes an offer by the Customer to purchase the Goods in accordance with these Conditions. The Customer is responsible for ensuring that the terms of the Order and any applicable Specification submitted by the Customer are complete and accurate.

2.3 The Order shall only be deemed to be accepted when Abacus issues a written order acknowledgement, at which point the Contract shall come into existence.

2.4 The Contract constitutes the entire agreement between the parties. The Customer acknowledges that it has not relied on any statement, promise, representation, assurance or warranty made or given by or on behalf of Abacus which is not set out in the Contract.

2.5 Any samples, drawings, descriptive matter, or advertising produced by Abacus and any descriptions or illustrations contained in the Product Portfolio and/or the Website are produced for the sole purpose of giving an approximate idea of the Goods described in them. They shall not form part of the Contract or have any contractual force.

## 3. GOODS

3.1 The Goods are described in the Product Portfolio and the Website as modified by any applicable Specification.

3.2 To the extent that the Goods are to be manufactured in accordance with a Specification supplied by the Customer, the Customer shall indemnify Abacus against all liabilities, costs, expenses, damages and losses (including any direct, indirect or consequential losses, loss of profit, loss of reputation and all interest, penalties and legal and other professional costs and expenses) suffered or incurred by Abacus in connection with any claim made against Abacus for actual or alleged infringement of a third party's intellectual property rights arising out of or in connection with Abacus' use of the Specification. This condition 3.2 shall survive termination of the Contract.

3.3 Abacus reserves the right to amend the Specification if required by any applicable statutory or regulatory requirements.

## 4. DELIVERY

4.1 All deliveries shall be carried out in accordance with this condition 4 and the Delivery Guide.

4.2 Abacus shall deliver the Goods to the location set out in the Order or such other location as the parties may agree (Delivery Location).

4.3 Delivery of the Goods shall be completed on the Goods' arrival at the Delivery Location.

4.4 On delivery, the Customer shall check the Goods. If the Goods were damaged during transport or delivery, or if the quantity of Goods delivered is different to the quantity of Goods ordered, then the Customer must report any issues to Abacus' sales office as soon as possible and in any event no later than 2 Business Days after delivery.

4.5 Any dates quoted for delivery are approximate only, and the time of delivery is not of the essence. Abacus shall not be liable for any delay in delivery of the Goods that is caused by a Force Majeure Event or the Customer's failure to provide Abacus with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

4.6 If Abacus fails to deliver the Goods, its liability shall be limited to the costs and expenses incurred by the Customer in obtaining replacement goods of similar description and quality in the cheapest market available, less the price of the Goods. Abacus shall have no liability for any failure to deliver the Goods to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide Abacus with adequate delivery instructions or any other instructions that are relevant to the supply of the Goods.

4.7 If the Customer fails to accept delivery of the Goods within three Business Days of Abacus notifying the Customer that the Goods are ready, then, except where such failure or delay is caused by a Force Majeure Event or Abacus' failure to comply with its obligations under the Contract:

4.7.1 delivery of the Goods shall be deemed to have been completed at 9.00 am on the third Business Day after the day on which Abacus notified the Customer that the Goods were ready; and

4.7.2 Abacus shall store the Goods until delivery takes place, and charge the Customer for all related costs and expenses (including insurance).

4.8 If 10 Business Days after the day on which Abacus notified the Customer that the Goods were ready for delivery the Customer has not accepted delivery of them, Abacus may resell or otherwise

dispose of part or all of the Goods and, after deducting reasonable storage and selling costs, account to the Customer for any excess over the price of the Goods or charge the Customer for any shortfall below the price of the Goods.

4.9 Abacus may deliver the Goods by instalments, which shall be invoiced and paid for separately. Each instalment shall constitute a separate Contract. Any delay in delivery or defect in an instalment shall not entitle the Customer to cancel any other instalment.

## 5. QUALITY

5.1 Abacus warrants that on delivery, and for the period specified by each Product Warranty (warranty period), the Goods shall:

5.1.1 conform in all material respects with their description and any applicable Specification;

5.1.2 be of satisfactory quality; and

5.1.3 be fit for any purpose held out by Abacus.

5.2 Subject to condition 5.3, if:

5.2.1 the Customer gives notice in writing to Abacus during the warranty period within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out in condition 5.1;

5.2.2 Abacus is given a reasonable opportunity of examining such Goods; and

5.2.3 the Customer (if asked to do so by Abacus) returns such Goods to the Abacus' place of business at the Customer's cost, Abacus shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods in full.

5.3 Abacus shall not be liable for any failure of the Goods to comply with the warranty set out in condition 5.1 in any of the following events:

5.3.1 the Customer makes any further use of such Goods after giving notice in accordance with condition 5.2;

5.3.2 the defect arises because the Customer failed to follow Abacus' oral or written instructions as to the storage, commissioning, installation, use and maintenance of the Goods or (if there are none) good trade practice regarding the same;

5.3.3 the defect arises as a result of Abacus following any drawing, design or Specification supplied by the Customer;

5.3.4 the Customer alters or repairs such Goods without the written consent of Abacus;

5.3.5 the defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal storage or working conditions; or

5.3.6 the Goods differ from their description or the Specification as a result of changes made to ensure they comply with applicable statutory or regulatory requirements.

5.4 Except as provided in this condition 5, Abacus shall have no liability to the Customer in respect of the Goods' failure to comply with the warranty set out in condition 5.1.

5.5 These Conditions shall apply to any repaired or replacement Goods supplied by Abacus and should be read in conjunction with the Returns Policy.

## 6. TITLE AND RISK

6.1 The risk in the Goods shall pass to the Customer on completion of delivery.

6.2 Title to the Goods shall not pass to the Customer until the earlier of:

6.2.1 Abacus receives payment in full (in cash or cleared funds) for the Goods and any other goods that Abacus has supplied to the Customer in respect of which payment has become due, in which case title to the Goods shall pass at the time of payment of all such sums; and

6.2.2 the Customer resells the Goods, in which case title to the Goods shall pass to the Customer at the time specified in condition 6.4.

6.3 Until title to the Goods has passed to the Customer, the Customer shall:

6.3.1 store the Goods separately from all other goods held by the Customer so that they remain readily identifiable as Abacus' property;

6.3.2 not remove, deface or obscure any identifying mark or packaging on or relating to the Goods;

6.3.3 maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;

6.3.4 notify Abacus immediately if it becomes subject to any of the events listed in condition 10.1; and

6.3.5 give Abacus such information relating to the Goods as Abacus may require from time to time.

6.4 Subject to condition 6.5, the Customer may resell or use the Goods in the ordinary course of its business (but not otherwise) before Abacus receives payment for the Goods. However, if the Customer resells the Goods before that time:

6.4.1 it does so as principal and not as Abacus agent; and

6.4.2 title to the Goods shall pass from Abacus to the Customer immediately before the time at which resale by the Customer occurs.

6.5 If before title to the Goods passes to the Customer the Customer becomes subject to any of the events listed in condition 10.1, then, without limiting any other right or remedy Abacus may have:

6.5.1 the Customer's right to resell the Goods or use them in the ordinary course of its business ceases immediately; and

6.5.2 Abacus may at any time:

6.5.2.1 require the Customer to deliver up all Goods in its possession which have not been resold, or irrevocably incorporated into another product; and

6.5.2.2 if the Customer fails to do so promptly, enter any premises of the Customer or of any third party where the Goods are stored in order to recover them.

## 7. PRICE AND PAYMENT

7.1 The price of the Goods shall be the price set out in the Order; or, if no price is quoted, the price set out in the Product Portfolio as at the date of delivery.

7.2 Abacus may, by giving notice to the Customer at any time before delivery, increase the price of the Goods to reflect any increase in the cost of the Goods that is due to:

7.2.1 any factor beyond Abacus' control (including foreign exchange fluctuations, increases in taxes and duties, and increases in labour, materials and other manufacturing costs);

7.2.2 any request by the Customer to change the delivery date(s), quantities or types of Goods ordered, or the Specification; or

7.2.3 any delay caused by any instructions of the Customer or failure of the Customer to give Abacus adequate or accurate information or instructions.

7.3 The price of the Goods is exclusive of the costs and charges of packaging, transport of the Goods (which are set out in the Delivery Guide) and insurance, which shall be invoiced to the Customer.

7.4 The price of the Goods is exclusive of amounts in respect of VAT. The Customer shall, on receipt of a valid VAT invoice from Abacus, pay to Abacus such additional amounts in respect of VAT as are chargeable on the supply of the Goods.

7.5 Abacus may invoice the Customer for the Goods on or at any time after the completion of delivery.

7.6 Payment terms will be agreed in writing by Abacus and the Customer and confirmed in the written order acknowledgement. Abacus shall not be obliged to offer credit terms, and credit terms may be revoked at any time. Payment shall be made to a bank account nominated in writing by Abacus. Time of payment is of the essence.

7.7 If Abacus and the Customer agree any volume rebate or other discount, the Customer agrees that Abacus' calculations of such rebate or discount will be final and binding.

7.8 The Customer shall pay all amounts due under the Contract in full without any set-off, counterclaim, deduction or withholding (except for any deduction or withholding required by law). Abacus may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by the Customer against any amount payable by Abacus to the Customer.

## 8. INTELLECTUAL PROPERTY - OEM CUSTOMERS

8.1 All OEM Customers hereby grant Abacus a non-exclusive licence to use the OEM Branding and any other Intellectual Property Rights necessary to manufacture and supply the Goods in accordance with any Specification.

8.2 Abacus acknowledges and agrees that all rights in the OEM Branding and other relevant Intellectual Property Rights belonging to the OEM Customer shall remain in the OEM Customer.

## 9. SERVICES

9.1 If requested by the Customer and agreed in writing by Abacus, Abacus may supply the Services.

9.2 Abacus shall use all reasonable endeavours to meet any performance dates agreed between the parties, but any such dates shall be estimates only and time shall not be of the essence for performance of the Services.

9.3 Abacus shall have the right to make any changes to the services which are necessary to comply with any applicable law or safety requirement, or which do not materially affect the nature or quality of the Services, and Abacus shall notify the Customer in any such event.

9.4 Abacus warrants to the Customer that the Services will be provided using reasonable care and skill.

## 10. TERMINATION AND SUSPENSION

10.1 Abacus may terminate the Contract without liability immediately on giving notice to the Customer, if the Customer:

10.1.1 commits a material breach of its obligations under this Contract and (if such breach is remediable) fails to remedy that breach within a period of 30 days after receipt of written notice requiring it to do so;

10.1.2 commits a series of persistent minor breaches which, when taken together, amount to a material breach;

10.1.3 (being a natural person) is deemed either unable to pay its debts or as having no reasonable prospect of so doing, in either case, within the meaning of section 268 of the Insolvency Act 1986 or (being a partnership) has any partner to whom any of the foregoing apply;

10.1.4 (being a natural person) is declared bankrupt or makes any arrangement with or for the benefit of his creditors or has a county court administration order made against him under the County Court Act 1984;

10.1.5 enters into compulsory or members voluntary liquidation or passes a resolution for voluntary winding up or its directors convene a meeting of shareholders for that purpose (save for the purposes of solvent amalgamation or reconstruction where the amalgamated or reconstructed company agrees to adhere to this agreement);

10.1.6 has an administrative receiver or receiver appointed over all or any part of its assets or undertaking;

10.1.7 suspends, or threatens to suspend, payment of its debts, is unable to pay its debts as they fall due, admits inability to pay its debts or (being a partnership) has any partner to whom any of the foregoing apply or who is declared bankrupt;

10.1.8 is the subject of any judgment or order made against it or is the subject of any execution, distress, sequestration or other process levied upon or enforced against any of its assets;

10.1.9 has any action, step, legal proceedings or other procedure taken in respect of it by its directors, shareholders, bankers, creditors or any person seeking to appoint a liquidator or an administrator or takes any such act or step itself;

10.1.10 ceases or threatens to cease to carry on business; or

10.1.11 any event occurs, or proceeding is taken, with respect to the other party in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in Condition 10.1.3 to Condition 10.1.9.

10.2 Without limiting its other rights or remedies, Abacus may suspend provision of the Goods under the Contract or any other contract between the Customer and Abacus if the Customer becomes subject to any of the events listed in condition 10.1.3 to condition 10.1.9, or Abacus reasonably believes that the Customer is about to become subject to any of them, or if the Customer fails to pay any amount due under this Contract on the due date for payment.

10.3 On termination of the Contract for any reason the Customer shall immediately pay to Abacus all of Abacus' outstanding unpaid invoices and interest.

10.4 Termination of the Contract, however arising, shall not affect any of the parties' rights, remedies, obligations and liabilities that have accrued as at termination.

10.5 Conditions which expressly or by implication survive termination of the Contract shall continue in full force and effect.

## 11. LIMITATION OF LIABILITY

11.1 Nothing in these Conditions shall limit or exclude Abacus' liability for:

11.1.1 death or personal injury caused by its negligence, or the negligence of its employees, agents or subcontractors (as applicable);

11.1.2 fraud or fraudulent misrepresentation; or

11.1.3 any matter in respect of which it would be unlawful for Abacus to exclude or restrict liability.

11.2 Subject to condition 11.1:

11.2.1 Abacus shall under no circumstances whatever be liable to the Customer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit, or any indirect or consequential loss arising under or in connection with the Contract; and

11.2.2 Abacus' total liability to the Customer in respect of all other losses arising under or in connection with the Contract, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall in no circumstances exceed the price of the Goods.

## 12. PRODUCT WITHDRAWAL/RECALL

12.1 Abacus shall notify the Customer as soon as practicable of any product withdrawal or recall relating to the Goods.

12.2 If Abacus decides to withdraw or recall any of the Goods, the Customer shall co-operate fully and promptly with any request by Abacus in respect of such withdrawal or recall.

12.3 Risk and title in the Goods shall pass to Abacus at the time the decision is made to withdraw or recall.

## 13. GENERAL

13.1 Abacus may assign the Contract or any part of it to any person, firm or company. Abacus shall use all reasonable endeavours to notify the Customer prior to making any such assignment. The Customer shall not be entitled to assign the Contract or any part of it without the prior written consent of Abacus and on such terms as Abacus shall reasonably specify.

13.2 Abacus maintains the right to employ any sub-contractor.

13.3 Notices under these Conditions shall be given in writing and may be given by delivery or first class post to the Customer at the address stated in the Order or as otherwise notified and to Abacus at the address stated in these Conditions or as other address notified. Notices sent by first class post shall be deemed to have been received within forty-eight hours of posting. Notices delivered by hand shall be deemed to have been received at the time of delivery.

13.4 No failure or delay by a party to exercise any right or remedy provided under this agreement or by law shall constitute a waiver of that or any other right or remedy.

13.5 If any court or competent authority finds that any provision of these Conditions (or part of any provision) is invalid, illegal or unenforceable, that provision or part-provision shall, to the extent required, be deemed to be deleted, and the validity and enforceability of the other provisions of these Conditions shall not be affected.

13.6 If any invalid, unenforceable or illegal provision of these Conditions would be valid, enforceable and legal if some part of it were deleted, the provision shall apply with the minimum modification necessary to make it legal, valid and enforceable.

13.7 Nothing in these Conditions is intended to, or shall be deemed to, constitute a partnership or joint venture of any kind between any of the parties, nor constitute any party the agent of another party for any purpose. No party shall have authority to act as agent for, or to bind, the other party in any way.

13.8 A person who is not a party to the Contract shall not have any rights under or in connection with it.

13.9 Except as set out in these Conditions, any variation, including the introduction of any additional terms and conditions, to the Contract, shall only be binding when agreed in writing and signed by Abacus.

13.10 The Contract shall be governed by, and construed in accordance with, English law, and the parties irrevocably submit to the exclusive jurisdiction of the English courts.

# Abacus suggested bathroom design tips

1. Storage is important. Try to design storage into your bathroom. There are three main ways –
- under the basin
  - in the shower area
  - within a pre-wall

2. Consider pre-wall bathroom design using wall-mounted sanitaryware. This gives a very clean and modern look. It is easier to clean and service than traditional close-coupled WCs and basins with pedestals.

3. Try to avoid placing the basin directly beneath a window, it is much better design practice (and more practical for the end-user) to site a mirror above a washbasin.

4. Carefully consider how you use lighting in the bathroom. Lights over basins are particularly important and the use of low-level LED 'night lights' can create a particularly pleasant ambience, ideal for night time use.

5. Don't try to overcrowd a bathroom. Carefully consider your requirements. Sometimes it may be better to have a large walk-in shower than trying to fit a separate shower cubicle and bath within a room. Remember, make your bathroom suit your lifestyle!

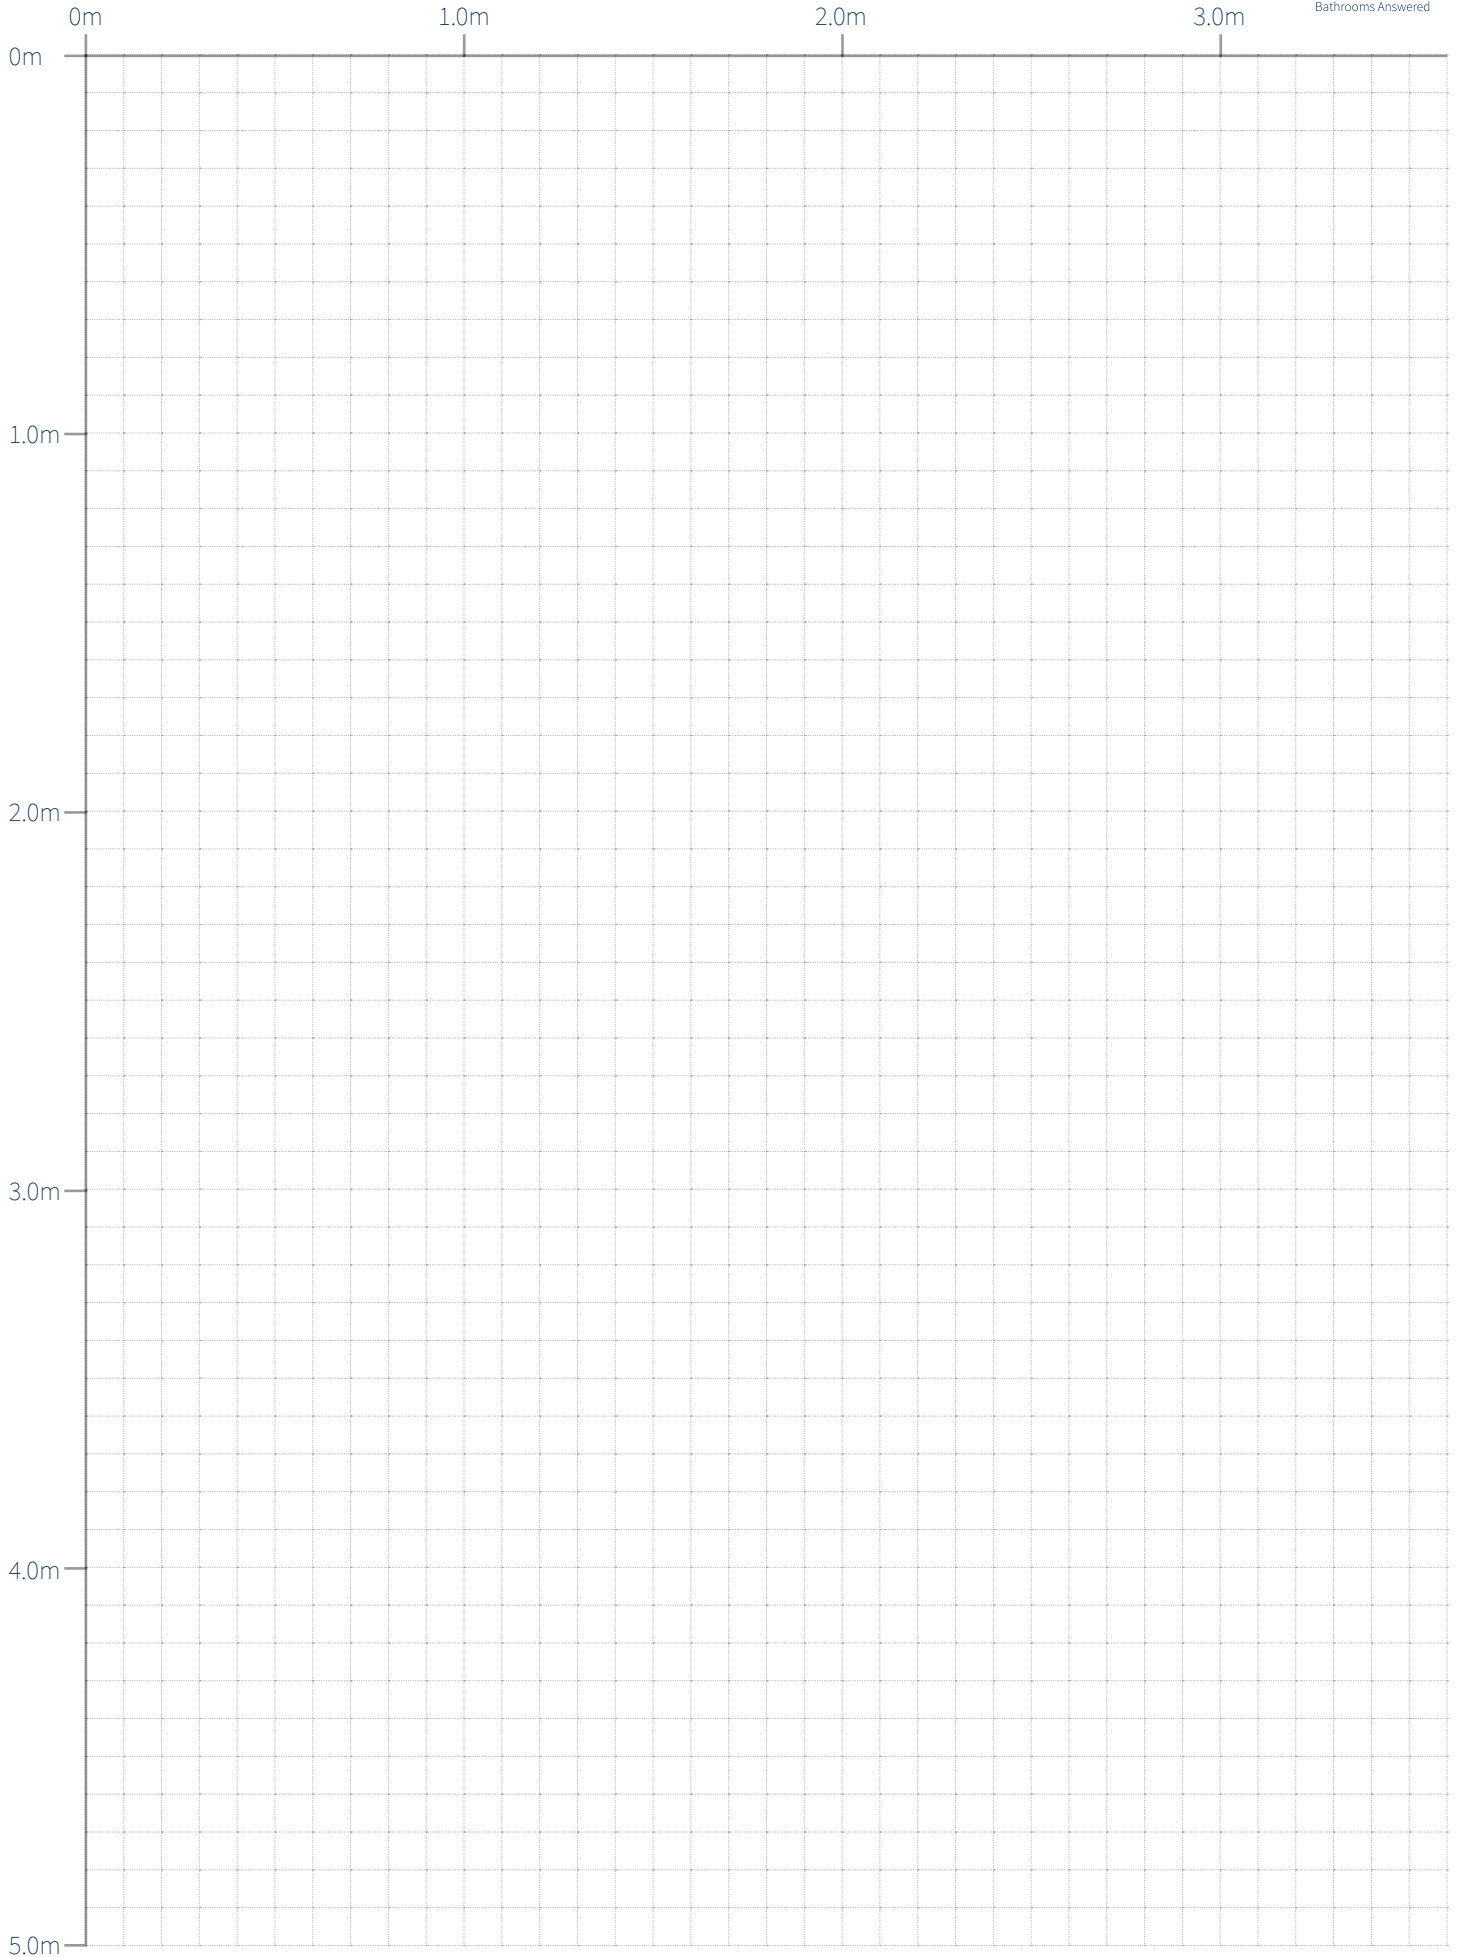

6. Consider the use of electric under-tile heating in your bathroom. This is very controllable in both winter and summer and offers a luxurious warm feeling underfoot as well as helping to control condensation and thereby enhancing the life of your bathroom.

7. And finally, most important of all...  
...use Elements waterproof tile boards for walls and floors. These will insulate and waterproof your bathroom and make it last much longer than traditional building methods, protecting your investment for many years to come.
