abode

*“ Change is everywhere we look.
Gone are the days when the bathroom
was a place for pure functionality;
it has become a room and a space
that has been transformed. Now it is
more inclined to provide a haven from
hectic lifestyles, a place for wellness
or to experience the latest in bathing
technology. Every time we design new
ranges for the bathroom, our aim is to
provide that perfect balance between
style, performance, innovation and
sheer indulgence “*

Paul Illingworth – Abode Designer

DESIGNED FOR YOU

The Abode ranges of bathroom brassware and showering solutions are created for people who want the perfect blend of design, performance and sheer quality in their homes without an enormous price tag. All Abode products are lovingly hand finished, assembled and tested in our factories prior to the journey to the centre of your bathroom and daily life.

DESIGNED FOR LIFE

"We're passionate about what we do. For some we are a hidden gem discovered for the first time, for many we are there in the background providing unrivalled design, quality and service to rely on."

DISTINCTLY ABODE

Here's the story behind the name:-

Established in 2002 we are a UK based company who design and engineer innovative bathroom and kitchen products.

We now manufacture well over half a million products a year, all specifically designed for the UK market.

We work very closely with our network of manufacturing partners to deliver high quality, design leading products, all of which we aim to achieve without the big price tag.

In all our products, we invest in the very best parts and components and are so confident in the quality of our products that they carry a comprehensive five year warranty.

Design innovation is in our blood here at Abode and we are honoured to have had our work recognised through numerous industry awards.

Our thirst for innovation, design, quality and service continues to remain as strong as it did at our company birth so why not come in and take a look, you'll be pleasantly surprised that beautiful and well manufactured products need not break the bank.

" Good ideas turn into great designs fairly quickly. If you are messing too much with shapes, angles and treatments to bring a design together, chances are the problem lies somewhere deeper "

FUNKTIONALITY ASSURED

All Abode products use the finest components, from silky smooth valve cartridges to our anti splash aerators at the end of the spout – all are designed to improve the experience of using our brassware. These small things might not be immediately noticeable but add up, collectively to make a good design, great.

VALVE CARTRIDGES

All Abode cartridge designs are tested for over 200,000 cycles before we will pass them for use within our taps. Why? Well this means that under normal use conditions your tap valves have proven that they will work for many years to come.

WATER EFFICIENCY

We recognise we all have a responsibility to do our bit towards water saving, so we give you the choice to decide what's best for you. All our products can be either installed with flow restriction valves, therefore regulating the flow to a maximum of 6, 8 or 12 litres per minute or you could choose to opt for a flow restriction aerator which will regulate up to 3.8 litres per minute... the choice is yours.

FINISHING QUALITY

We use traditional artisan hand polishing techniques which ensure perfect blemish free surfaces and crisp edges. Our hand treatment does not end there – we even use hand plating on some ranges. Yes we know it's more expensive to do it this way, but it means that the finish is richer, the plating deeper and ultimately more durable.

LUXURY PACKAGING

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straightforward installation.

COMPREHENSIVE WARRANTY

Such is our dedication and reputation for quality, we offer a comprehensive 5 Year Warranty on all our brassware products.

Cyclo (ci-clo) n.

A combining form meaning 'cycle'

CYCLO

COOL, CONTEMPORARY AND BOASTING LOTS OF PERSONALITY. Cyclo with its elongated handle with an optional black finish creates a unique and characterful appearance that is sure to deliver a designer touch to any bathroom. Combining rectangular and cylindrical forms this sleek collection would be equally suited to geometric or the more organic softer bathroom styling.

A close-up photograph of a modern, polished chrome faucet mounted on a white ceramic sink. The faucet has a sleek, curved design with a single-lever handle. The background is a textured, light brown wall. A dark, circular mirror is partially visible at the top of the frame. A bar of soap is tucked behind the faucet.

Loop (Lu-p) n.

A curved or circular shape

LOOP

CURVES OF DESIRE The beautifully curved design of the Loop range results in a very stylish option for your bathroom brassware, offering low pressure functionality with a high visual impact.

“ Introducing Tempeau, Abode’s revolutionary new thermostatic product providing the perfect solution for both the bath and shower with minimum installation requirements ”

tempeau®

tempeau®

INTRODUCING TEMPEAU

The concept of tempeau was born partially from legislation changes to thermostatic bathing safety and partially from on-going conversations with the public and installers.

Thermostatic showers have long since been increasing in popularity in the UK, but when thermostatic regulations came into force there were, and still remains, very few options available.

At the heart of our product is the tempeau thermostatic valve design, which has been designed and created with the following points in mind:

- To ensure thermostatic safety is delivered to both bathing and showering experiences alike.
- To allow the user to obtain the best possible flow performance from the UK's notoriously low pressure hot water systems.
- To be significantly faster and easier to install as tempeau is connected to the underside of the bath.
- To be intrinsically simple to understand and easy to order.

SUPPORTER OF

THE RANGE

The result is a carefully selected combination of bathing and showering kits which have been selected by our designers to make life simpler and safer. All you have to do is choose the style of kit configuration and the design of the hand wheels. Really simple. tempeau simple!

For any bespoke combination requirements please contact us for further information.

SHOWERING

The Abode range of showers and accessories are designed to give you the best possible start to each day, and to help wash the strains of the day away at the end. Relax and enjoy.

abode

SHOWERING **FUNKTIONALITY**

Searching for that ultimate showering experience, then look no further than Abode's stunning array of showering solutions.... Pure indulgence!

SHOWERHEADS

All Abode showerheads are supplied with easy to clean nozzles, making life easier, logical really,...hydrological.

As the showerhead becomes progressively blocked with limescale the flow rate will reduce, by simply rubbing the jet nozzles, calcium deposits flake away restoring showerhead performance.

RIGID RISERS

For complete flexibility and adjustability, all Abode rigid risers allow the overhead shower to adjust in height and to swivel 180°.

THERMOSTATIC SAFETY

Abode thermostatic showers are manufactured to EN1287 & EN1111 design guidelines. All thermostatic showers have an automatic anti scald shutdown mechanism as standard that will become operational if the cold water supply fails, eliminating the chance of scalding.

SHOWER HOSES

All Abode showering products where applicable utilise the latest smoothflex hose design, ensuring an anti-tangle, easy to clean, anti-fracture solution... what more could you ask for.

WATER EFFICIENCY

We recognise we all have a responsibility to do our bit towards water saving, so we give you the choice to decide what's best for you. All our showers can be installed with a ½" shower head flow limiter, therefore regulating the flow to a maximum of 6 litres per minute.

COMPREHENSIVE WARRANTY

Such is our dedication and reputation for quality, we offer a comprehensive 5 Year Warranty on all our brassware products.

For more details please refer to page 258

SELECTING THE SHOWER VALVE THAT'S RIGHT FOR YOU

In order to help you select the right shower valve for your needs, we have highlighted below the four main types of showering valve available with a brief explanation of their features, choose the one that suits your needs the best and then turn to the page to see what family of styles that product is available in.

All Abode concealed thermostatic shower valves are supplied with a superior brass back plate as standard providing that all important finishing touch and feel.

Once you have selected your showering valve, team it with one of our many options of fixed showerheads, sliding rails, rigid risers and other options. Alternatively to view a selection of complete showering kits please turn to page 242 for Abode's recommendations.

CONCEALED THERMOSTATIC SHOWER VALVE (1 exit)

1 exit concealed thermostatic shower valves provides a low pressure option if you only require to operate one outlet.

The top handle controls the water flow and the bottom handle controls the water temperature.

see pages 202-203

CONCEALED THERMOSTATIC SHOWER VALVE (2 exit)

2 exit concealed thermostatic shower valves allows for the control of 2 separate outlets.

The top handle controls the water flow via a diverter between the two outlets, the bottom handle controls the water temperature.

see pages 204-207

SHOWER CONTROL SELECTION

3 CONTROL THERMOSTATIC SHOWER VALVE

(2 independent exits)

The 2 independent exit 3 control thermostatic shower valves allow for the option of two independently controlled outlets, which can either be used simultaneously or separately. A low pressure alternative perfect for the addition of body jets or a handshower to sit alongside your overhead shower.

see pages 208-209

3 CONTROL THERMOSTATIC SHOWER VALVE

(3 exit)

The 3 exit 3 control thermostatic shower valve allows for the control of 3 separate outlets of which 2 can be operational simultaneously. A perfect solution for the addition of a handshower and bath filler to sit alongside your main overhead shower.

see pages 208-209

EXPOSED THERMOSTATIC BAR SHOWER VALVE

The bar shower valve is a surface mounted exposed thermostatic shower valve, which sits proud of your wall. This style of valve reduces installation time and sits perfectly with a choice of one of Abode's many sliding rail kits.

see pages 210-211

Min 0.3 bar pressure required

Require more from your showering experience, then select from either the 2 independent exit shower valve or the 3 exit shower valve from the Harmonie and Zeal ranges.

This example demonstrates that the 3 control 2 independent exit shower valve, has the functionality to allow for two outlets to be operational either simultaneously or separately. Pictured is a showerhead and body jets configuration however, the combination of products is down to you. The top handle controls the water flow to one outlet whilst the bottom handle allows for the control independently to a second outlet.

EXPOSED THERMOSTATIC BAR SHOWER VALVES

The ideal solution, a surface mounted exposed thermostatic shower valve, which reduces installation time and sits perfectly with a choice of one of Abode's many sliding rail kits.

This slimline bath overflow filler kit has been custom designed to provide a low pressure bath filling option.

Providing the latest in bathing technology, this kit not only provides the outlet for filling your bath but it also features an integrated overflow too. Logical really, hydro-logical you might say.

A perfect solution as an alternative to a deck or wall mounted spout, if an uncluttered streamlined look is what you strive for.

DIMENSION SPECIFICATIONS

Throughout the brochure we have added a number of key dimensions within the product information section to help you with your product selection.

Detailed below is an explanation and diagrammatical reference to each dimension key.

Should you require further details then please contact our Technical Support Team or visit our website www.abode.eu

- L** = Length
- W** = Width
- FD** = Fitting Depth
- H** or **P** = Height or Projection
- C** = Centres
- SER** = Spout exit reach
- SEH** = Spout exit height

 = Water efficient products as a result of inbuilt flow restricters

Monobloc

Bath Filler

Shower Valve

Wall Mounted

WATER PRESSURE GUIDE

To ensure you achieve the best possible performance from your chosen brassware or showering product, you need to be able to identify your existing plumbing system and therefore your water pressure.

The following information provides a general overview on water pressures and a guide to ensure you choose the right product for you and your home.

If you have 'LOW WATER PRESSURE' you should take care to choose a product that is suitable, otherwise you might find that the flow rate is poor. It will be difficult to achieve a mixed temperature.

If you have 'HIGH WATER PRESSURE' you can choose any product with the same or lower pressure requirement.

As a general guide only, when connecting multiple products you should work to the product with the highest pressure rating.

Throughout our brochure we have highlighted by each product, a simple key outlining whether the product is low pressure (LP), medium pressure (MP) or high pressure (HP) along with stating the minimum pressure required to achieve the best result. The following diagram explains the pressure required for each level.

Please note all products marked LP and MP are also suitable for HP water systems.

GRAVITY FED CYLINDER - VENTED SYSTEM

Most commonly found in older UK housing

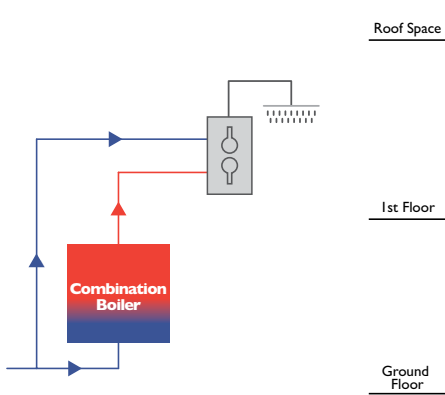

- Hot and cold pressures are typically unbalanced (the cold water pressure is higher than the hot)
- Cold water pressure is as per incoming mains
- Hot water pressure (head pressure) is distance 'a' in metres divided by 10. For examples if 'a' is 1 metre then the hot water pressure is approximately 0.1 bar
- This type of system is generally considered as low pressure

PUMPED GRAVITY FED CYLINDER - VENTED SYSTEM

Most commonly found in older UK housing that has been modernised

- Hot and cold pressures are typically unbalanced (depending on the cold mains pressure and the rating of the hot water pump)
- Cold water pressure is as per incoming mains
- Hot water pressure is as per the pump rating
- This type of system is generally considered as high pressure

COMBINATION BOILER - UNVENTED SYSTEM

Most commonly found in newer UK houses

- The 'combi' boiler is generally located in the kitchen
- Hot and cold pressures are typically almost balanced (the cold water pressure may be marginally higher than the hot)
- Cold water pressure is as per incoming mains
- Hot water pressure is as per incoming mains but generally reduced slightly due to pressure reducing valves, filters and flow limiters
- This type of system is generally considered as medium - high pressure

PRESSURISED CYLINDER - UNVENTED SYSTEM

Most commonly referred to by the brand 'megaflo'

- The cylinder(s) can be located anywhere in the house.
- Hot and cold pressures are typically balanced (the hot and cold water pressures are equal)
- Hot and cold water pressure is typically 3 bar (as shown), otherwise the hot and cold pressure will be approximately the same as the incoming mains cold pressure
- This type of system is generally considered as high pressure

WARRANTY & CARE

WARRANTY

Comprehensive 5 Year Warranty

In the unlikely event that you should experience any defect in the materials or workmanship of your new Abode product within 5 years of purchase, the purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective. All working parts, valves and decorative surface finishes are guaranteed for a period of 5 years from purchase with the exception of specialist finishes such as Matt Black and Rose Gold which are guaranteed for 1 year. O rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used. This is provided that the product has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

CUSTOMER CARE

Water Regulations

All products are designed in accordance with European Water Regulations and are manufactured to WRAS or other applicable European standards. All products should be installed in accordance with Local Water By Laws.

Technical Support

Choosing the right brassware for your home is an important choice as the product will be one of the most used in the home. Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a product will be suitable for your application, please contact our Technical Support team or visit our website www.abode.eu for more details.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your product, please contact our Technical Support team or visit our website for further technical information.
