BATH WASTES

april | bath waste guide

With so many different wastes to choose from picking the right one can be daunting. With the aid of our Bath Waste Guide we hope to help you choose the right waste for your bath.

Non Exposed

A non exposed waste fits to the bath but cannot be seen. Waste 7401 is a non exposed Plug & Chain waste, 7402 is a non exposed Pop Up waste and 7403 is a non exposed Click Clack waste. These wastes are manufactured in plastic and the only parts seen are the parts which will be fitted to the inside of the bath.

Exposed Wastes

These wastes are manufactured with the intention of being seen, these have to be pleasing to the eye and not made out of plastic. Exposed Plug and Chain 7404, exposed Pop Up waste 7405 and exposed Click Clack 7406 are examples of exposed wastes.

Click Clack Wastes

This waste is opened or closed by pressing on the waste cover. The Click Clack wastes are available in exposed and non exposed options.

Pop Up Wastes

This waste is opened or closed by simply turning the overflow. The Pop Up wastes are available in exposed and non exposed options.

P Trap

P traps are fitted to the waste tail underneath the bath. It releases the water out of the bath and down to the outlet pipe, the P shape allows a little water to remain in the bottom of the trap to stop any foul smells venting back up into the bath from the soil pipe. This comes supplied only as an exposed version, in either shallow or ultra shallow format.

Exposed L Pipe

This is an exposed outlet pipe which connects to the P trap and goes underneath the floor to connect to a plastic outlet pipe. The pipe is for exposed use and fits with all the other exposed waste pipes.

Pipe Shrouds

There are two different types of pipe shroud we provide. Telescopic 7411; these pipe shrouds are used when tap holes are drilled in the bath. Over edge pipe shroud 7412; these pipe shrouds are used when there are no tap holes in the bath.

Exposed Telescopic Pipe Shroud Kits

The Pipe Shroud Kits (7414 & 7415) are both exposed versions and include an exposed waste, telescopic pipe shrouds and a P trap. The difference between the two is that one kit has a plug and chain waste and the other kit has a pop up. These kits are a complete set, instead of ordering everything separately.
