# Our top TRENDS

Our UK design team keep a close eye on the top trends to make sure our product collections are right up to date.

## MAXIMUM FUNCTIONALITY

Spatial planning will be a key trend for bathroom design this year with the focus on optimising the bathroom space and increasing functionality. As part of this bathroom trend, trough sinks work well due to the fact that their wide, deep rectangular shape gives plenty of room for washing your hands or face but also offer a practical ledge along the back for housing your soap and other toiletries.

## Boutique style

Relaxing in a luxurious hotel bathroom can seem a million miles away from the hustle and bustle of everyday life. Bring this feeling into your own bathroom with the ultimate showering experience including invigorating body jets.

## INDUSTRIAL CHIC

If you're looking to make a style statement, then a tap with defined, angular lines is one option. Inspired by industrial environments, pair this type of tap with a minimalist bathroom to make the tap the star of the show.

## Water Labels

Throughout the brochure you'll find the Water Label's Flow Rate Indicators to help you find out which products are registered and what the flow rates are. A green rating indicates higher water efficiency. A red rating indicates higher water usage, but gives you a greater flow from your taps and showers for a faster filling sink and more invigorating showering experience.
