Bathroom design redefined.

Geberit Monolith sanitary modules

—
New
—

A timeless design language for your bathroom.

There are many different designs you can follow to give shape to your new bathroom. The Geberit Monolith sanitary module for washbasins and WCs lets you create a bathroom using clear, well-designed products. While they might look simple at first glance, these sanitary modules offer much more, thanks to their refined combination of function and design. They can be used together with many readily available taps and ceramics. What's more, in most cases they can be quickly connected to existing pipework without any structural changes – a real advantage in major renovations. The Geberit Monolith sanitary modules give you freedom to realise your own design without the hassle.

The Geberit Monolith sanitary module for washbasins unites functionality with a clear, strong design language. The unit is made of high-quality, low-maintenance materials such as glass and aluminium and contains Geberit's proven sanitary technology as well as flexible interfaces that make for quick and secure installation with existing connections. And of course, the Monolith can be combined with a great variety of taps and washbasins from many different manufacturers.

Geberit Monolith for washbasins.

Functional design with style.

1 Drawer

You can opt to integrate drawers into the Geberit Monolith sanitary module for washbasins – giving you extra storage space for bathroom products just where you need them, in an attractive unit that fits right into the décor and hides them away.

2 Double towel rail

The Geberit Monolith sanitary module for washbasins comes as standard with a track that can be fitted with a matching towel rail. The double towel rail is available in two different lengths – just one example of shapely design combined with high functionality.

Less work.
More bathroom.

New bathroom

Old bathroom

Geberit Monolith sanitary modules gives you lots of freedom of choice when renovating a bathroom. Installation of a Monolith module creates hardly any mess because the walls do not need to be opened up and the existing water and drainage connections can be used. Work is kept to a minimum. Give your bathroom a new look with a timeless and beautiful design.

More space.
Many options.

The Geberit Monolith sanitary module can be combined with ceramics and taps from many manufacturers. Whether you install only one or multiple Monolith modules, you have a great deal of choice in the design and installation of your bathroom. Choose from three different colours for the glass front panel – another way to personalise your bathroom's design.

Geberit Monolith for bidets.

Uncompromising design.

The Geberit Monolith sanitary module for bidets completes the Geberit Monolith family range. Installation is as easy as it is with the Monolith for WCs. A great variety of bidet ceramics can be installed on the module, which includes a matching towel rail.

New size.
Matching Monoliths.

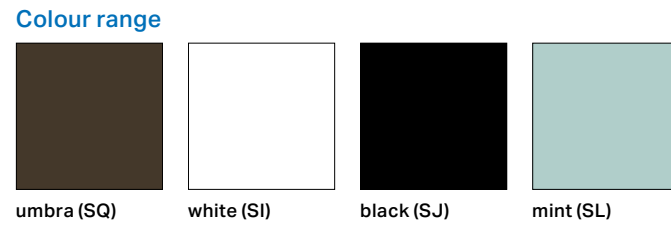

The Geberit Monolith for WCs is now available in a 114 cm height, the same height as the Geberit Monolith sanitary module for washbasins creating an ideal partnership. The Monolith WC's new dimensions are also a perfect match for the Geberit AquaClean, the WC that cleans you with water.

Easily installed.

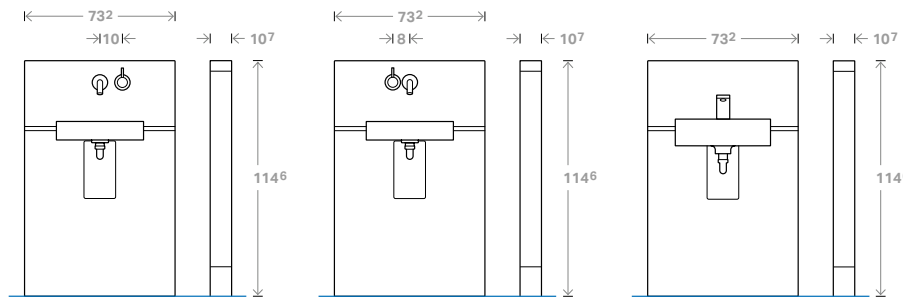

Monolith sanitary module overview.

Don't leave anything to chance when creating your dream bathroom. This simple overview is all you will need to help you in your planning.

Geberit Monolith for Washbasins

The Geberit Monolith sanitary module for washbasins combines the most modern sanitary technology with an extremely functional piece of furniture – all packaged into a beautiful and timeless design. Includes multiple storage shelves and a pre-installed track for a towel rail. The Monolith sanitary module for washbasins can be combined with a variety of ceramics as well as wall or deck-mounted taps.
