

# Choice is important.

Don't touch anything you haven't chosen yourself.

## It's not just any bathroom, it's your bathroom.

You select the tiles that reflect your style. You refuse to compromise in the selection of the tap for your washbasin. And here you will find just the right flush plate for the WC to give your bathroom the crowning touch and pamper you with comfort functions. Because Geberit combines visual elegance with innovative functions.

### Why not try out your own design?

We have included actual-size illustrations of various flush plates in the brochure for you. Fold back the left-hand side of the brochure, hold the design up to the wall and let your imagination run wild! Use these actual-size samples to select the flush plate that appeals to you.

# Your bathroom, your design.

Select the flush plate that appeals to you.

Efficiency at a glance.

# Make it your own.

Demand uncompromising aesthetics and function.

Geberit ensures unobtrusive yet reliable functions, supreme convenience and durability, all from behind the wall. All that remains visible is the interface with the technology: the flush plate. The selection of flush plates is important because you will live with your selection for years. Choose the flush plate that best suits you and your bathroom from a wide range of options.

# The perfect shape: the circle.

Aesthetic curves for a relaxing bathroom experience.

It is impossible to improve on circles; they can only be restaged and rearranged. Geberit flush plates use new interpretations of round forms to adapt to today's trends. With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another. And the result is always well rounded.

# Geberit Sigma01.

Looks good all the way round.

# 83 %

Shown in actual size = 83% smaller than a Geberit flush plate Sigma10.

# No-touch flush. Electronic hygiene.

Recent surveys have revealed that fewer and fewer bathroom users are happy to actuate the flushing process manually – instead, they are increasingly looking for sanitary technology that features touchless operation. By offering electronic WC flush actuators using IR sensors, Geberit has a solution to meet this growing demand. And while it requires your toilet to have an electrical connection, this is a feature that is fast becoming the norm anyway.

# Geberit Sigma80.

## A shining example.

- Two colour variants.
- Water-saving dual flush actuation.
- Touchless flush actuation (see page 64).
- Surface made of high-quality glass.
- Durable LED lighting in five colours.
- Sensor-controlled switch-on function.
- Multiple award-winning design.

### A colour scheme to suit your mood

When you approach the toilet, two light bars in five selectable colours display the position of the flush actuations.

# Custom-designed.

Your bathroom,  
your bespoke design.

Create a bathroom like no other and a design that's entirely yours. Make your bathroom your own with an entirely individual selection of product materials or motifs. You can personalise the surface of Geberit Sigma50 and Sigma70 flush plates. Use materials that are perfectly matched to your bathroom or pick out your favourite motif. Your creativity has no boundaries.

→ Bespoke

# Geberit Sigma50. Perfectly individual.

**Geberit Sigma50 flush plate**  
Make your bathroom unique. Personalise  
the surface of the Sigma50 and enjoy all the  
advantages of the flush plate.

# Geberit Sigma70. Select variety.

**Geberit Sigma70 flush plate**  
Play with product materials and designs.  
As the Geberit Sigma70 has no buttons at all,  
it opens up entirely new possibilities for a  
bespoke design.

# Seamless design. Geberit design family.

Toilet and urinal flush control actuation featuring a coordinated design: the result is a single design thread running through the whole bathroom. The flush actuators for urinals, which match the flush plates for toilets, can either be actuated by hand (pneumatic) or via touchless technology (electronic, by means of infrared detection).

**Your style.**  
The choice is up to you.

\* Our recommended design, which matches the product family visually.

# Choice is important.

## Intelligent functions from Geberit.

If you can start your toilet flush without touching it, if elegant colour effects add atmospheric moments to the time you spend in your bathroom, or if unpleasant smells are efficiently extracted even before anyone notices them, then this means your plumber has installed state-of-the-art Geberit sanitary convenience in your new bathroom. And because durability and reliability are as much a part of Geberit as good design, you will enjoy your selection for years to come.

# Think outside the box.

## Geberit remote flush buttons.

→ Remote flush button

### Touched a thousand times.

The pneumatics of the Geberit remote flush plate type 01 and type 10 have been endurance tested to simulate years of use. The reliable technology is based on air pressure (not on electrical current).

### A touch more refined.

Thanks to the hydraulic servo lifter, just a gentle touch is sufficient for flush actuation with the Geberit Omega70. No electrical current is required for this.

### Quite discreet in fact.

Available as they are in a variety of colours and product materials, the Geberit cover plates open up new design opportunities. A tile-bearing version is available for a particularly discreet appearance.

Regardless of the construction situation, using a remote flush button can be the optimal solution. For instance, in order to place the flush button in a different location, if the design for the WC flush control calls for small but elegant, or if using a Geberit Omega concealed cistern with low construction height causes contact between the WC lid and the flush plate. For such cases, Geberit offers various remote flush buttons with pneumatic force transmission, which can be placed anywhere within a 1.70 m radius of the concealed cistern.

# Insert for in-cistern block.

## Hygienic freshness for weeks.

Fold out the flush plate, insert the block, then close the plate. That's how easy it is to ensure weeks of hygienic freshness with the insert for in-cistern block. The optional insert is suitable for most Geberit actuator plates in the Sigma range and can even be installed by a plumber at a later date. It guides the in-cistern block down a chute to a fixed position below the surface of the water in the cistern. Once there, the block dissolves slowly and ensures hygiene and cleanliness with every flush throughout the entire WC ceramic appliance, as well as providing a fresh fragrance.

→ Insert for in-cistern block

- 1 It doesn't get any simpler than this: pull the flush plate forward.
- 2 Drop the in-cistern block into the insert behind the plate.
- 3 Close the plate and enjoy freshness with every flush.

# Fresh air for everyone.

## Odours extracted, air cleaned.

→ Odour extraction

The active carbon filter and insert for in-cistern block are easily accessible via the flush plate.

The air is cleaned thoroughly in an active carbon filter.

A quiet fan conveys the cleaned air back into the room.

Unpleasant odours are removed right at the source.

92% of people say that smells influence their moods.

That's a good enough reason to ensure your bathroom always smells fresh and inviting. The solution has long been a standard in modern cooker hoods and is now taking hold in toilets too: an effective odour extraction unit. Ultimately, opening windows in winter, burning matches or covering up odours with fragrance sprays just isn't convenient – so Geberit DuoFresh takes a different approach by simply extracting odours right at the source: directly from the WC ceramic. The air is cleaned thoroughly with an active carbon filter. A quiet fan, meanwhile, allows clean fresh air to flow back into the room. The active carbon filter itself indicates when it needs to be replaced – and this is something that can be done quickly, with just one click that lets you access the area behind the fold-out flush plate.

**Touchless function.**  
Aesthetically hygienic.

You're looking for hygiene and freshness without compromise. We offer you flush buttons that fulfil your needs without pressing a button. Without a touch. And therefore always perfectly hygienic.

→ Touchless

Touchless flush plates for WCs and urinals are available in matching designs.

# Today's toilets are moving with the times.

Electrical connections now come as standard.

An electrical connection for the toilet is a feature that is included as a matter of course nowadays; after all, you expect your bathroom to reflect your changing needs as well as the lifestyle trends that the future is likely to bring. With Geberit WC installation elements, you'll find everything is ready for the future – so they can accommodate any changes you may want to make further down the line, like retrofitting a Geberit AquaClean shower toilet or installing a touchless Geberit Sigma80 flush plate.

- 1 Convenient Geberit AquaClean Sela shower toilet with Geberit Sigma50, white glass.
- 2 Touchless Geberit Sigma80 flush plate, glass reflective.
- 3 DuoFresh odour extraction unit with Geberit Sigma40 flush plate.

These days, flushing technology can be hidden behind the wall – a solution that is more hygienic and on trend whilst offering unbeatable stability and quality. Geberit installation systems make all this possible – so you can create your own dream bathroom.

- 1 Integrated conduit pipes for hidden water supply of a Geberit AquaClean shower toilet. Perfect for retrofitting.
- 2 Branch fitting for Geberit DuoFresh odour extraction unit.
- 3 Modern flush valve for a water-saving dual flush.
- 4 Practical insert for in-cistern block.
- 5 Designed to accommodate electrical connection.

# For any application.

## Geberit cisterns Sigma and Omega.

So that everything matches: used in combination with the matching concealed cistern, Geberit flush plates in the Sigma range cover a wide variety of applications and comfort functions. The Geberit flushing system Omega offers great flexibility and particularly small flush plates. Both flushing systems are guaranteed spare parts availability for 25 years.

You therefore have a wide selection of both Geberit flush plates and reliable Geberit installation elements for installation behind the wall. Geberit flush plates bear the name of the suitable cistern so that you can be certain that everything will match.

Geberit Sigma concealed cistern

- Construction height 112 cm
- Front actuation
- Barrier-free and height-adjustable models available

# WELL – Quality mark for resource conservation.

## Recognise efficiency at a glance.

What has long been the standard for household appliances has now become the standard in sanitary technology: the new WELL Water Efficiency Label makes it easier for you to select more efficient, water-saving taps and sanitary equipment. Now you can tell at a glance which products live up to today's standards for conserving our valuable water resources. The marking on the labels is based on the familiar EU energy labels for household appliances. Several Geberit products have already been classified with the Water Efficiency Label. Products designed for private users are expected to offer additional benefits by both providing comfort functions and making water available for wellness applications in the home. This label is a response to the growing environmental awareness of consumers and will make it much easier to quickly choose the right products for your own needs in future.
