## PRODUCT OVERVIEW

### THE SYSTEM BEHIND THE HOTTEST NEW BATHROOM STYLES

The Francis Pegler range of (pre-wall installation systems) offers a solution to meet every type of bathroom construction – solid walls, plasterboard or prefabricated – and eliminates all the constraints of floor-standing sanitaryware, thus greatly enhancing perceptions of spaciousness, style, harmony and functional efficiency.

A robust supporting bracket with spare load capacity exceeding the required 400 kg guarantees the high rigidity of the toilet connection to the wall and prevents condensation forming on the surface of the cistern.

The choice of mounting frame modules and flush plates satisfies every conceivable need.

For more information visit [www.pegleryorkshire.co.uk](http://www.pegleryorkshire.co.uk)

### FEATURES

- + Fast and easy installation
- + Polystyrene filler between the tank and console
- + Wide range of height variations
- + Wide range of flush plates available
- + Can be adapted for corner installations using corner brackets in our accessories
- + 10 year guarantee (terms and conditions apply)

### WC FRAMES

### FRANCIS PEGLER FLUSH PLATES

The valves inside the tank are accessible through the maintenance opening behind the flush plate. The use of installation modules in bathrooms and toilets is getting increasingly more popular.

The reason is not only strict compliance with exact connecting measurements for fitting objects, but also the installation speed. The modules represent a whole range of improvements that increase their functionality and reliability.

### ONE-PIECE CISTERN

- 100% pressure control of every component.
- Long life-span.
- Resistant to temperature changes.

### ACCESSORIES

- Elegant flush plates designed by renowned designer Barbora Skorpilova.
- Wide range of accessories and spare parts.

### FLUSH VALVE

- Quiet, fast and precise.
- The construction is designed to ensure long term functioning, even in the presence of lime scale.

### POLYSTYRENE FILLER ENCASING THE CISTERN

- Protects against condensation.
- Improves sound reduction.

### ISOLATION VALVE

- Isolation valve for ease of maintenance.

### INSTALLATION SHROUD

- Easy to cut around along the grooves.
- Covers the opening of the module during installation and thus prevents any debris from falling into the cistern.
- Ensures appropriate fitting.

### FLUSH PLATE FITTING

- Easy and fast to dismantle.
- Cistern easy to access without the use of tools.

### ADJUSTABLE FLUSH

- Cistern is pre-set for 4/2.6 litre dual flush.
- Sliding mechanism adjusts instantly to 5.5/3 litre dual flush. (Accessible before and after installation).

### FRAME

- Easy to install for one person.

## INSTALLATION

1. Position and level the frame, mark the holes.

2. Remove the frame, drill holes into the wall, place dowels.

3. Get the frame into the final position and fix it to the wall with screws.

4. Connect to in/out water pipes, put on blind covers and fix the WC.
