Unique Air Massage System

WATER OZONATION

This is a highly unique selling feature as NO other manufacturer in the UK provides this level of health and hygiene as standard in the product:

- As the air is passed through the air compressor it passes through the OZONE generator.
- Inside the OZONE generator is a high intensity UV light and as the air passes through the UV light it is charged with a strong electronic pulse which converts the AIR atom structure from O₂ to O₃.
- When the O₃ air hits the water it forms millions of tiny air bubbles which as it travels through and mixes with the water it attaches to molecules present such as bacteria 'oxidizing' them. In laymen 'eating up the harmful molecules' so the bathing water is sanitised and totally bacteria free!

TOTAL HYDRO HYGIENE THROUGH OZONATION

WHY AIR MASSAGE?

The unique Pool Spa air system assists the body in re-oxygenation as millions of pressurised oxygen air bubbles generated by the heated 'Air Blower' blanket and envelop the entire body. Unlike no other air massage system in the UK the Pool Spa air experience provides the user with the most sanitised bathing experience available through 'ozonation'. This highly advanced technology converts the AIR atom being compressed into the water from O₂ to O₃, which when present in the water 'oxidises' ALL bacteria and PURIFIES the water!

- Ozonation purifies the water
- Encourages Skin regeneration
- Combats Cellulite
- Reduces fine stretch marks and visibly dark veins
- Induces a deep state of relaxation
- Counters the harmful effect of stress
- Aids in weight loss
