Who we are

Who we are
Roman has been designing and manufacturing showering solutions for over 30 years, and is home to the UK's largest shower manufacturing plant. Roman's diverse and versatile collection of products encompasses something for every style and shape bathroom - no matter what the budget.

Highest Quality Materials
We carefully fabricate and anodise all our aluminium profiles. We use aluminium because it is; light, strong and requires minimal maintenance. The anodising process increases corrosion resistance, product durability and further enhances the material properties. Our specialist anodising offers a bright chrome like finish which is significantly in excess of standard aluminium finishing.

Glass
All our enclosures feature toughened safety glass. This is a heat treatment to increase the glass strength to make it around 5 times stronger than normal glass. If the glass were to break due to impact, it would shatter into lots of small pieces which are much less dangerous and will help you avoid any cuts or injury. All glass is strictly tested in accordance with EN14428.

Products Designed for All
Our products are carefully designed for all. We consider different users' needs to give totally effortless entry to the entire family. Whether you would like door-less entry, level access, handles that can be used with a flat hand, or a wider aperture, we have something that will work with your space all finished with a stylish designer look.

Branding
Roman is a reputable and well established UK Brand, now supplying showering products all over the World. Our foundations are strongly rooted in; innovative design, manufacture, quality and customer service. Our products are used in some of the finest hotels Worldwide.

Customer Service
Roman has invested in a complete customer support network which is there to support each purchase at every stage; from initial enquiry through to after sales care advice. Roman employs over 20 full time members of staff in our Customer Support Centre, who all receive comprehensive training on the manufacture and installation of Roman's collection of products.

ROMAN BIM

For project applications Roman products are available as a BIM file download from www.roman-showers/available-downloads.com for more details please see page 21.

UK Manufactured

Roman products are designed and created in the UK, offering the ultimate in quality, precision and craftsmanship. All Roman's manufacturing processes are carried out at our UK Manufacturing Plant and Headquarters and meet and exceed approved UK and European testing standards.

Award Winning Product for Design & Innovation

Innovation and exceptional product design differentiates Roman from the competition. Our products and ranges have won multiple awards for innovation and design. Roman employ a dedicated in-house Design Team who are based in our Design Centre. To add flexibility to our research and development and to ensure control of our tray supply, Roman opened a Tray Plant in 2005 to manufacture solid surface level access trays.

Lifetime Guarantee

For complete peace of mind, all Roman Shower Enclosures and Bath Screens are accompanied by a fully service backed lifetime guarantee.

Glass Protection

Winner of the House Beautiful 'Best Cleaning Product' Award 2009 Roman's award winning Ultra Care system gives the care and protection your shower enclosure deserves to keep its long lasting sparkle. Roman Ultra Care is pre-coated onto your enclosure or bath screen to protect the glass. It is also then available in a bottle so you can top up this protection as part of your cleaning routine. The more you apply the formula, the more you protect your shower enclosure. Roman Ultra Care cleverly and effortlessly repels the build-up of grime, lime scale and stains. It has been designed to maintain the sparkle of the glass for long term optical clarity.

A three step restoration and cleaning kit is now available from Roman. This kit is designed to restore your bathroom and shower to look like new!

Helping you to design your bathroom

Roman products are available on the 2020spaces design service.

2020 Design is used the world over by kitchen & bath retailers, home builders & remodelers, home improvement centers, independent designers, architects and even students! In fact, 2020 Design can be used by anyone wishing to bring their design ideas to life, with an easy-to-use CAD solution.

What is 2020 Design?

2020 Design is the industry-leading, easy-to-use CAD (computer-aided design) software that lets you easily design, plan and visualize kitchens and baths using thousands of flexible products from manufacturer catalogs and stunning 3D renderings.

This feature-rich design software brings realism, speed and accuracy to space-planning, allowing designers to retrieve data with one click. The dynamic functionality of 2020 Design helps you through the design process, clearly communicating design ideas in floor-plan or elevation views with 2D/3D shapes, and transforming customer wish-lists into reality.

For more information on any of the above information contact Roman Customer Relations on +44 (0) 1325 327989.
SHOWERING REDEFINED

Introduction to door styles
Quadrant – The Quadrant shaped enclosure will sit beautifully in the corner of your bathroom, making it an ideal solution for the smaller bathroom. It incorporates unobtrusive sliding doors.

**Sliding Door** – The sliding door action offers wide and easy access, with no protrusion into the bathroom or showering area.

Neo-Angle – This flexible design allows for inward or outward opening door entry. It presents a unique footprint, to work around existing fixtures and fittings.
Bi-Fold Door – Inward opening door presents a flexible space saving solution. Avoids existing fixtures and fittings in the bathroom area.
Pivot and Inswing Doors – Outward opening door, takes up minimal external space due to the positioning of the hinge point, meaning it protrudes less into the bathroom space.
Hinged Door – Smooth outward opening door, featuring soft self-close hinges for a superior finish.
Corner Entry – Two sliding doors allow easy access in a confined space.

DECEM

Latin for 10, Decem^X the 10mm thick glass range has been meticulously designed and engineered by our Roman Design experts. Components of the highest quality have been brought together. With 10mm thick toughened glass. Chromed Brass Hardware. Minimalist framing for a design perspective. Standing majestically at a height of 2000mm. Hardware and handle options available on selected products so you can create your desired effect. Ultra Care Glass Protection Pre-coating included as standard. All combined to create a stunningly visual range which is guaranteed for life. We have combined everything we have learnt about showering over the last 30 years to create this unparalleled range, which for the first time presents a series of design options for selected products.

Water Safe System
Our unique Water Safe System has been engineered to offer the maximum water integrity available for a minimalist designed enclosure. The system will guide the water back into your showering area, to enhance performance. It creates a water barrier to eliminate this as a traditional weak spot.

Bracing
An optional chromed brass bracing arm is supplied as standard with many of our products, to give additional support if required. The bracing arm has been intricately designed to sit discreetly on the product, offering a minimalist finish, whilst providing maximum support.
Total height including bracing is 2030mm.

Hinges and Handle
Self-closing hinges offer a superior action and create a positive seal for the door. Made from chromed brass components to give a quality finish and long lasting performance. On selected products choose between curved or square hardware to suit your taste.
Our chromed brass handle is available in a curved or square finish to suit your taste. The feature handle looks stylish, whilst being suitable for all users. It can be operated with a flat hand for easy opening.

Detailing
To ensure the Decem range is sublime, our Design team focussed in on the detail. From the enhanced product adjustment, to our Water Safe System. From the chromed brass branding badge, to the 10mm thick toughened glass. From the pre-coated glass protection, to the increased glass height of 2000mm. We have selected the best materials to craft exceptional components, to offer a superior showering experience.

Printed Glass Technology
Introducing our digitally printed glass wetroom panels, featuring three design options: Distressed Brick; Glass Block; and a Rainforest image. This is a technology breakthrough, which has been achieved by collaboration of technologies with digital print specialists Dimax.

2 Sliding Door DXT17L and Side Panel DX2R8. Shower Tray RLT178. Shower Basket RSB01.

1 Sliding Door DXT12AL. Grey Shimmer Shower Tray IAG129G.

Sliding Door
for Corner or Alcove fitting

This sublime Sliding Door features a soft close door system, to present a silent and ultra-smooth running door action. Its minimalist styling, chromed brass square handle and bright silver frame come together to create a truly opulent design. The minimalistic enclosure incorporates Roman's Water Safe System to direct the water back into the showering area. Install into an alcove or into a corner situation with a Side Panel.

Features and Benefits:

■ 2000mm high (wall profile height)
■ 2020mm high (to top of door glass)
■ 10mm glass
■ Silent and ultra-smooth running roller bearing system
■ Luxury 'soft close' door system
■ Chromed brass machined components
■ Chromed brass feature handle
■ Low profile PVC seals
■ Bright silver frame
■ 15mm of adjustment in each profile
■ Suitable for installation onto tray or wetroom floor
■ Integrated 'tray or floor' Water Safe System
■ Alcove and corner options
■ Please indicate handing (RH or LH) when ordering
■ Available with square hardware

Project Specification Guide

Roman's Project Specification Guide has been developed specifically for architects, designers and specifiers working on significant projects such as Hotel and Major Housing developments and Condominiums. Uniquely it allows you to pick and choose every single part of your showering solution, from your hinges and handle, to the bracing, seals and glass design allowing you to build a showering concept to totally suit your individual project.

This Project Specification Guide offers a small sample of the options available to you. If the component you are looking for is not explicitly featured in this guide, please contact us as we have an almost infinite range available and are confident that we will be able to meet your needs.

Roman is a leading international shower manufacturer and as such we are experienced in large Project work and frequently create bespoke solutions to suit individual customers' briefs. We have worked on projects Worldwide, most notably across Europe, the Americas, Asia, Australasia and the Middle East. Our products are manufactured in our UK headquarters and we also have a showroom and manufacturing facility set up to serve the Asian and Australasian market, Roman (Asia), which is based in Kuala Lumpur. An impressive array of job references are available upon request.

As an established manufacturer we hold ISO9001 and ISO14001 accreditation. All our products conform to and exceed European Standard EN14428 for Shower Enclosures and Bath Screens.

Solid Surface Technology

Roman has been at the forefront of Solid Surface technology for 15 years. Roman has a long established Solid Surface (engineered Stone) Moulding Plant on its main Manufacturing Site in Newton Aycliffe. This facility includes rapid prototyping; CNC precision mould making; a large variety of different moulding methods for different products; and a huge oven and fabrication area for the highest quality finishing. Having the mould manufacturing in-house gives huge flexibility in terms of lead-times and costs of moulds - depending upon the particular application and volumes.

Since 2014 Roman has added Solid Surface fabrication to this facility. This allows precast Solid Surface sheets (of any thickness required) to be fabricated to precise Project requirements. This includes hidden joints, hidden fixings and any corner or finishing details required. These fabrications can be designed to suit any requirements and the fabrication can be as flexible as the material itself. Any structural or reinforcement requirements can also be supplied in whatever material and whatever strength specified.

The range of finishes and colours is vast and the finished effect moves interior design specification to a new level. If you submit drawings, or simply ideas, we would be delighted to offer you bespoke quotations and design ideas to suit your specification and ambitions.

Glass Options

You can choose any glass finish you would like including clear, frosted and patterned glass. If you are looking for a specific pattern or motif to be added to the glass, we can accommodate this. We can also offer low iron, or heat soaked glass. A large variety of coloured glass "tints" can also be produced if desired.

Let us know what glass thickness you would like. The standard on these styles of products is 10 and 8mm thick, but we can work within your requirements. Across our series of standard enclosures we offer 4 – 10mm thick glass products, so we regularly work with all of these thicknesses. We can advise as required.

Hinges

Manufactured from chrome plated brass, our collection of hinges ensure a high quality finish and smooth opening action. Our range of hinges include; glass-to-glass options; glass to wall; 180° functionality (both inward and outward opening); inward opening; and outward opening. All are presented in a variety of shapes and sizes to help you achieve the look you aspire to – many options feature self-closing sprung hinges.

We offer hinges in a chrome or jet black finish, but if the hinge style and finish you are looking for is not pictured here, please contact us with your requirements as this is only a small sample of what we have available.

Glass to Glass fixings

Our Glass to Glass Fixings are manufactured from high quality chrome plated brass, ensuring quality right down to the finer details. These are finished in chrome or jet black, but for volume orders we can accommodate any colour you would like. If the fixing style and finish you are looking for is not pictured here, please contact us with your requirements as this is only a small sample of what we have available.

Handle Options

Whether you would like a "statement" handle or are looking for something a bit simpler, with our range you can pick something to perfectly complement your specification. For a totally minimalist look, we can even completely eliminate the handle and leave a designer hole in the glass as an alternative. Our handle range also includes options that double up as a towel rail – perennially popular in the Hotel sector.

Our selection of handles are manufactured from high quality chrome plated brass and are finished in chrome, white or jet black. If the style and finish you are looking for is not pictured here, please contact us with your requirements as this is only a small sample of what we have.

Aluminium Wall Profiles

If you are looking for a totally minimalist finish, or alternatively would like a quick and straight-forward installation, then the wall profile you pick can be crucial. We offer a variety of profiling systems; from angled profiles, for angled glass; through to profiles that can be channelled into the wall so only the glass is visible. Our Wall Profile Systems offer options to suit a variety of door styles including, hinged and sliding doors, along with wetroom panels.

We always recommend the use of our discreet profiling to enhance performance and offer on-site adjustment.

Bracing Systems

Our selection of Bracing Systems allow you to keep your Shower Enclosure, Bath Screen or Wetroom Panel sturdy, with a look and overall finish that suits your space. We provide the bracing bars to your exact sizing specification and these can be trimmed to size on site (standard size illustrated.) The bracing bar systems are all manufactured using chromed brass. Largely we supply these with a chrome finish, but if you would like a specific colour we are able to accommodate this for volume projects.

Sliding Door Systems

Our Sliding Door Systems allow you to create the look you seek, with a smooth action door that glides with ease with a "soft close" style sprung stop. The components are manufactured from chromed brass and are available in a chrome finish. If the Sliding Door System style and finish you are looking for is not pictured here, please contact us with your requirements as this is only a small sample of what we have available.

Sealing Systems

We offer a range of Sealing Systems to suit whichever enclosure style you choose. We will recommend which seal is compatible with your chosen product type, whether it is a hinged door or sliding door configuration that you choose. The more popular options are showcased in this section – many other options are available as required. The new Water Safe System (pictured) allows frameless Enclosures to now offer water integrity that has traditionally only been offered by standard Enclosures with no caveats regarding water pressure or direction.

Solid Surface Shower Trays

Our collection of Solid Surface Shower Trays offer a stylish finish, with a solid surface waste cover to discreetly hide the waste. This gives a seamless finish. The low profile trays are self-reinforcing so can be laid directly down to joists and then tiled up to, achieving a level access wetroom look. They are available in white, with either a matt or a gloss finish. For volume orders we can accommodate a variety of colour finishes and sizes to your specification, including stone effect and shimmer effect finishes to coordinate your bathroom design.

Order Process:

■ Ordering your showering solution is simple:

■ Select the specific components you require*

■ Send us these specifications and volumes along with your dimensions (and preferably CAD drawings) by e-mail either to: international@roman-showers.com

■ We will then send you a CAD line drawing of your design, quote and indicative lead time
BIM is an acronym for Building Information Management, or Building Information Modelling. It is a digital representation of physical and functional characteristics of a facility. BIM creates facilities models within a computer and because they are digital and computer based models of building elements, in Roman's case Shower Enclosures and Shower Trays, they are far more useful than hand or computer drafted drawings.

Coupled with the visual representation of the product very importantly it also gives products their provenance and standards. The provenance being the manufacturer's details, for example, the range, door style, code etc. and very importantly all relevant standards, such as EN standards and CE marking. If the product is substituted for an inferior or non-conformant product in any stage of the design plan this will be highlighted to a client as being non-conformant.

Building Information Modelling describes the development of designing a building collaboratively using one coherent system of computer models rather than as separate sets of drawings. BIM presents a number of advantages such as; saving crucial time, much more accuracy in estimation, and the avoidance of error, alterations and rework due to information loss.

Made to Measure Service

Features and Benefits:

- Over height available up to 2.7 metres
- Angled glass available
- Frosted glass available
- Hardware options of curved or straight available
- Made to measure items which fit almost anywhere
- All products made in accordance with your own measurements
- We endeavour to provide fast and efficient answers to all your questions

Enclosures cleverly designed to maximise space

Peekaboo bathrooms a speciality

Bath Screens designed with easy access for cleaning and to avoid fittings

Liber8
COLLECTION

The new Liber8 Collection is freed from the shackles of traditional bathroom design, with its ultra-modern and minimalist focus.

This exceptional selection of frameless hinged door products presents an array of sizes and configurations to fit in with most bathroom layouts.

The striking minimalist look is captured with options such as the door hinged straight from wall with clear seals.

The hinged door or in-line panel can be tailored to suit your specific bathroom layout. It can be installed to open outwards into the bathroom or inwards into the enclosure itself. The hinged door can be fitted in multiple configurations; independently in an alcove or with added side or in-line panels.

The Liber8 Collection has been designed to be the cutting edge of design and due to its stylish frameless nature it must only be installed on walls and floors that are completely level.

This leading collection of design led shower enclosures is perfectly completed with the frame finish options of either a bright silver chrome or a warm brushed nickel finish on all components.

Features and Benefits:

- 2000mm high
- 8mm glass thickness
- Hinged from wall or glass panels
- New clear and minimal seals
- New minimal easy fix wall profile system
- Adjustable hinges
- The option of a bright silver chrome or warm brushed nickel finish on all components
- Unique sealing tape system technology to reduce the need for silicone
- Designed for installation to straight vertical walls
- Integrated 'tray or floor' Water Safe System
- Liber8 Bespoke service available

Liber8 900 x 900mm Hinged Door for Corner with Chrome finish KL913CS and KR913S. Shower Tray RLT90. Shower Basket RSB01.

Hinged Door
with Side Panel

Style your bathroom with a statement frameless shower enclosure from the Liber8 Collection. It is installed with an outward opening door. It presents you with the choice of a brushed nickel or silver chrome finish on all components including the elongated sleek hinges, designer handle and bracing bar.

Features and Benefits:

■ 2000mm high

■ 8mm glass thickness

■ Hinged from wall

■ New clear and minimal seals

■ New minimal easy fix wall profile system

■ The option of a bright silver chrome or brushed nickel finish on all components

■ Unique sealing tape system technology to reduce the need for silicone

■ Integrated 'tray or floor' Water Safe System

■ Designed for installation to straight vertical walls

Lumin8 COLLECTION

This compelling, inventive and contemporary collection of showering solutions meets all your requirements, whilst bringing an inviting touch of luxury into your bathroom and helping to illuminate your showering experience.

Meticulously designed to solve a variety of space restrictions in the bathroom, whilst providing an effortless showering experience for the whole family. Delivers both inward and outward opening doors and sliding doors. A collection of intricately designed power shower approved bath screens and walk-in enclosures. The diversity of designs and sizes available provides something for every bathroom.
Glass Height and Thickness
Lumin8 stands elegantly at a height of 1950mm with toughened 8mm thick glass. The weight of the 8mm thick glass provides smooth action operation, long-lasting durability and safety. Walk-in options now offer curved frameless 8mm thick glass with minimal bracing.

Detailing
Detail is fundamental with the Lumin8 range to create a unique style with the highest quality. From the individual 'wrap around' chromed top caps, to the robust 8mm thick glass. From the pre-coated glass protection, to the elegant height of 1950mm. From the clear, low profile seals and magnet seals, to the bright silver profiles for a modern finish. Smooth running 'quick release' roller bearings provide easy access cleaning. We have handpicked the finest materials to craft exceptional components, to provide an exclusive showering experience.

Handle and Hinges
Features new ergonomic chromed brass handle with a curved underside for easy operation. This square finish contemporary handle creates a stylish feature, whilst being suitable for all users. It can be operated with a flat hand for easy opening. The chromed brass hinges add to the contemporary feel of the range.

Installation
We not only provide the highest quality of products but these products are also designed for ease of installation and we ensure outstanding after sales service. The design incorporates clear glass and bright silver profiles with square edges to provide a modern finish. The highest grade of aluminium is used to deliver a polished and unparalleled finish. Our products include enough discreet adjustment to ensure they fit into the vast majority of bathroom sizes and styles. Adjustment of 25mm is available per profile.

Made To Measure
We offer custom made design and fitting services for this range.

900 x 1200mm One Door Offset Quadrant V8SQ91213S. Roman Tray RLQ129R. Shower Basket RSB02.

One Door
Quadrant

An ideal solution for smaller bathrooms as it will sit beautifully in the corner of your bathroom, with an unobtrusive sliding door. A 'quick release' door system is included for easy access cleaning. Also available in an offset shape for a larger showering area where space allows.

Features and Benefits:

- 1950mm high
- 8mm glass thickness
- Chromed brass handle
- Bright silver frame
- 'Minimal' low profile seals
- Chromed top caps
- Smooth running 'quick release' roller bearings
- 25mm vertical adjustment in each profile
- Tray Compatibility: Tray or straight to floor using Roman Shield Wetroom System

Roman Shield System	81

900 x 900mm Bow Fronted Quadrant V8BQ913S. Roman Tray DQT9. Shower Basket RSB07.

Offset Bow Fronted Quadrant V8BQ1113S. Roman Tray DQT3-R. Shower Basket RSB06.

Bow Fronted
Quadrant

This cleverly shaped Bow Fronted Quadrant will make the most out of your available bathroom space. The weight of the 8mm thick glass presents a smooth gliding door action; the sliding door avoids obtrusion into the bathroom space and into the showering space, making it ideal for the smaller bathroom. The clever sizing of the 650mm x 1150mm tray takes up minimal wall space but delivers a showering area of 1200mm x 1000mm to maximise the showering area.

Features and Benefits:

- 1950mm high
- 8mm glass thickness
- Chromed brass handle
- Bright silver frame
- 'Minimal' low profile seals
- Chromed top caps
- Smooth running 'quick release' roller bearings
- 25mm vertical adjustment in each profile
- Tray Compatibility: Suitable for dedicated tray or straight to floor using Roman Shield Wetroom System

1000mm Pivot Door V8F1013S. Roman Tray RLT100. Shower Basket RSB06.

1000mm Pivot Door V8F1013S and 800mm Side Panel V8GL813S. Roman Tray RLT108. Shower Basket RSB06.

Pivot Door

This outward opening door takes up minimal external space due to the positioning of the hinge point, meaning it protrudes less into the bathroom, which allows for the close positioning of bathroom fixtures and fittings. The simplicity of the Pivot Door creates a supremely efficient space saving solution. The door can be installed into an alcove or with a side panel for the corner situation.

Features and Benefits:

- 1950mm high
- 8mm glass thickness
- Chromed brass hinges and handle
- Bright silver frame
- 'Minimal' low profile seals
- Chromed top caps
- Pivot Door must be hinged from the wall
- 25mm vertical adjustment in each profile
- Reversible for right or left hand fixing
- Tray Compatibility: Tray or straight to floor using Roman Shield Wetroom System

Pivot Door
with In-Line Panel

This outward opening door when used with an In-Line Panel allows a larger enclosure to be created with the simplicity of the Pivot Door which creates a supremely efficient space saving solution. The Pivot Door and In-Line Panel can be installed into an alcove or with a side panel for the corner situation.

Features and Benefits:

- 1950mm high
- 8mm glass thickness
- Chromed brass hinges and handle
- Bright silver frame
- 'Minimal' low profile seals
- Chromed top caps
- Pivot Door must be hinged from the wall

Lumin8 1000mm Inswing Door V8K1013S and 800mm Side Panel V8GL813S. Shower Tray RLT108. Shower Basket RSB02.

Inswing Door

This cleverly designed Inswing door features a large opening without significant protrusion into the bathroom space. The unique opening mechanism allows for existing bathroom fixtures and fittings. The stylish look is completed with a bright silver frame, chromed brass machined components (including soft close mechanism) and an elegant feature handle. The 1200mm option eliminates the need for a separate in-line panel as an integrated frameless panel is included.

Features and Benefits:

- 1950mm high
- 8mm glass thickness
- Chromed brass hinges and handle
- Bright silver frame
- Chromed top caps
- Inswing Door must be hinged from the wall
- Reversible for right or left hand fixing

Lumin8
Bespoke Service

Simply choose which product you would like, then follow these six easy steps:

1. Take your drawings to your nearest retailer who will fax them to Roman. For your nearest retailer contact Roman International Sales on +44 (0) 1325 327989 or visit **www.roman-showers.com**

2. Roman will then send a quotation to your retailer for them to discuss with you.

3. If you are happy with this quotation Roman will produce a drawing to illustrate what your final product will look like.

   Note: Roman will make all drawings in accordance to your measurements and unless otherwise requested, an adjustment allowance will be included. Please specify your adjustment allowance prior to ordering.

4. Roman will then fax the drawing to your retailer who will pass this on to you. This drawing will be in the form of a fax back agreement for you to sign*.

5. Once Roman receives the agreement, work will begin on your product.

6. You will receive your product within 5-6 weeks - lead times vary for International orders.

* Once this agreement is signed you will be liable for any charges should you cancel your order.

Haven

Roman's Haven range of Showers offers you all the qualities you would expect from the Roman Brand - for complete peace of mind. The innovative and affordable Haven designs are backed by Roman's 30 years of showering experience, offering high quality products complete with a comprehensive after sales service.

All Haven products are designed by Roman's in-house team of Designers to offer a diverse range of contemporary products, at an affordable price. The Haven collection encompasses an array of quadrant, bi-fold, pivot, sliding and corner entry enclosures, a selection of side panels and in-line panels, stylish bath screens and wetroom panels. Haven enclosures and bath screens feature toughened safety glass and bright silver framing, which effortlessly and seamlessly complement all bathroom shapes and styles. They are all pre-coated with Roman Ultra Care glass protection.

1200 x 900mm Quadrant H2SQ129CS. Shower Tray RLQ129R.

One Door
Curved Quadrant

The polished sliding door design of this Haven Quadrant presents a stylish and perfect space saving solution for the bathroom. The smooth gliding door allows for existing bathroom furniture, whilst also providing a luxuriously large showering area. The Quadrant features 'quick release bearings' to enable easy cleaning of the enclosure. It is available in five different size configurations including offset versions for bathrooms that have more space on one wall and less on another.

Features and Benefits:

- Height: 1850mm
- Glass Thickness: 6mm
- Tray Compatibility: 550mm radius
- Smooth running bearing assemblies in the top and bottom rails
- 'Quick release bearings' in the bottom rail
- Full length colourless PVC and magnetic seals
- Chromed brass handle
- Chromed plastic top caps
- Easy Installation
- Reversible for left or right hand tray

N.B. The smaller panel will always be on the short side of the tray

760mm Corner Entry H2C76CS.

Corner Entry

The Haven Corner Entry is an ideal showering solution for when entry through the diagonal is more practical, but without the compromise on showering space. The 'quick release' system on the bottom of each door allows quick and unobstructed cleaning. The Corner Entry is available in a range of sizing options, including offset versions.

Features and Benefits:

- Height: 1850mm
- Glass Thickness: 6mm
- PVC / magnetic seals
- Chromed brass bolt through handles
- Chromed plastic top caps
- Smooth running bearing assemblies in the top and bottom rails
- 'Quick release bearings' in the bottom rail
- Extension profiles available to take up to 800mm size if necessary depending upon installation
- Reversible for left or right hand fixing

Roman Shield Wetroom System
Installing a Wetroom

Wetroom shower panels are a more open alternative to a shower enclosure, which usually consist of just one glass panel. This can either be positioned in a corner or on a straight wall. Wetroom panels can be installed onto a shower tray, or installed straight down to floor. When wetroom panels are installed on to a low level shower tray it simulates a wetroom look removing the traditional step up into the showering area and offering level access entry. When installing straight to floor, your floor and walls must be waterproof (tanked). You can use a system such as our Roman Shield to tank your space, which includes everything you need to tank a room, including complete wetroom kits to make the process easy.

The Roman Wetroom Collection offers a variety of heights, shapes, glass thicknesses and price points – with a multitude of design options to choose from.

Expressions
printed glass technology

Decem^X Expressions, a significant innovation in digital glass printing on wetroom panels – it is an exclusive technology to Roman.

This breakthrough has been achieved due to a collaboration of technologies with digital print specialists Dimax.

Unlike all current printed glass this new technology allows any images to be printed directly on to the glass, whilst all other areas of the glass remain transparent and crystal clear. The colours are directly printed on to the glass; this is done with a specific thermo-procedure.

This unique digital printing process also provides the option of a Satinato finish, which was not digitally possible before. Roman can control the colour and level of opaqueness desired on the glass design.

Importantly this exclusive digital glass printing is both water resistant and protected against abrasion, which makes it ideal to use in the bathroom.

Decem^X Expressions with three glass design options – Distressed Brick; Glass Block; and a Rainforest image which all carry a lifetime guarantee.

Shower Basket RSB06.

DECEM
Expressions
printed glass technology

Features and Benefits:

- Glass Height - 2000mm
- Panel height with brace bar - 2029mm
- Decem surface mounted profile
- Decem bracing bar for optional usage supplied as standard
- Suitable for installation onto tray or wetroom floor
- 15mm of adjustment in each minimal wall profile for easy installation
- Optional 'L' shaped return panel

In order to assure quality, regular Cross Hatch tests (EN1S02409, ASTM0870 and AS TM D2247) are conducted and documented to prove the durability of prints. They are warranted to CE Marking: EN12150 and EN14428.

Project Applications

Roman has initially launched Decem^X Expressions with three glass design options – Glass Block; Rainforest and Distressed Brick. Whilst these three are on 'trend' and designated for the higher end of the interior design led retail bathroom market, the process lends itself perfectly for the Project market. Designers can now easily link up other design themes through a Project directly onto a larger and visible position within the bathroom via the glass and there are no restrictions on colour or resolution.

Panel ③, Brace Bars LBBK4590 and LBBK4510

Select
Fixed or Pivoting
Deflector Panel

Deflector panels can be added to your wetroom panel to increase the water integrity for your wetroom. The Pivoting Panel rotates through 180 degrees allowing you to fold it inwards for wider entry access and it can be positioned inline to add more length to the wetroom panel, adding increased water integrity. The Fixed Panel is placed at the end of the wetroom panel and is static to help guide the water back into the showering area, to help keep the outside of your wetroom area drier. An adjustable panel foot is also supplied with the Fixed Panel.

Features and Benefits:

■ Panel Foot adjusts from 4mm to 29mm to accommodate high and low level trays

■ Panel foot is chromed brass with soft rubber base

■ Panel foot is cut down on site to suit the shower tray

Brace Bars

Roman provides a number of different styles of bracing bars, which can be used with 8mm and 10mm glass thicknesses. We offer all configurations that may be required and they can be cut and trimmed to the size required during installation to allow maximum flexibility and use of space. Bracing kits are used to provide added support for the glass and ensure that it is securely fitted in place.

Our bracing bars range from Ceiling Bracing Kits to 45 Degree Angle Bracing Kits and from Curved Bracing Kits to Floor to Ceiling Bracing Kits. We have something to suit the enclosure style, your bathroom area and your preference, to present the highest level of stability.

Constructing a Wetroom

Roman presents the all in one wetroom solution with Roman Shield. The Roman Shield Wetroom System includes everything you need to tank a room, including complete wetroom kits to make the process easy. We have a range of kits to choose from including those which contain our Pre-formed Shower Floor. The Solid Surface Shower Floor is designed to be installed onto your joist and then tanked and tiled over – it creates a natural fall towards the waste so you don't need to use a levelling compound, and it also gives the added reassurance of a tray beneath the tanking system, for total water integrity.

Bath Screens

Bath Screens continue to be a very popular choice for showering facilities over the bath, due to the shrinking size of bathrooms and the growing popularity of multiple bathrooms in the family home.

Many homes now have two or three bathrooms, which tend to be smaller and more compact as opposed to a spacious family bathroom. Due to this, Bath Screens have increased in popularity as they are often specified for the main family bathroom to give an additional showering facility, which helps to overcome the morning rush to the shower. Combi-boilers and higher pressure plumbing systems have now created a demand for power shower approved bath screens.

Roman's extensive range of Bath Screens offers something to suit everyone's requirements and style of bathroom. We offer a range of sizes, shapes, glass thicknesses and styles designed to fit around any existing bathroom fixtures and fittings. Our range includes power shower approved bath screens for a superior showering experience, which incorporate a unique seal system for added water integrity.

V8CC213S	243 - 257

V8CC213S

Lumin8
Mini Fixed
Bath Screen

Provides greater water integrity when using a shower curtain. The screen provides protection at the showering end of your shower curtain. It directs the water back into the showering area   to improve this traditionally weak spot. The curved rail cleverly bows out to move the curtain away from the showering area to give a more comfortable and spacious showering experience.

Features and Benefits:

- Height: 1500mm
- Frame: Silver
- Glass thickness: 8mm
- Suitable for all standard bath mixer and electric showers (non-pumped)
- Reversible for left or right hand fixing
- To be used in conjunction with shower curtains (no hooks or curtain supplied)
- Curved rail to increase showering comfort with a curtain

Haven
Bath Screens

There are four stylish bath screens available in the Haven range - each offering a perfect and unique over the bath showering solution. The Angled Bath Screen comes complete with an integrated towel rail for the ultimate style statement, and features a rising hinge system which enables the screen to be raised slightly during cleaning and to be lowered during use for a stronger seal mechanism. The Curved Bath Screen offers a new take on the contemporary bath screen; its curvaceous lines create both a practical and stylish screen.

Angled Bath Screen

Features and Benefits:

- Height: 1500mm. Width: 850mm
- Glass Thickness: 6mm
- Frameless with radius glass
- Reversible for left or right hand applications
- Suitable for all standard bath mixer and electric showers
- Not recommended for use with pumped or pressurised systems
- Bright silver aluminium towel rail

Code	Description	Size (mm)	Adjustment (mm)
H2D1CS	Angled Bath Screen	1500 x 850	850-875

Curved Bath Screen

Features and Benefits:

- Height: 1360mm. Width: 820mm
- Glass Thickness: 5mm
- Frameless with radius glass
- Reversible for left or right hand applications
- Suitable for all standard bath mixer and electric showers
- Not recommended for use with pumped or pressurised systems
- Rotates through 180° for access

Code	Description	Size (mm)	Adjustment (mm)
H2D2CS	Curved Bath Screen	1360 x 820	810-825

Standard Bath Screen

- Height: 1360mm. Width: 820mm
- Glass Thickness: 5mm
- Frameless with square glass
- Suitable for all standard bath mixer and electric showers
- Not recommended for use with pumped or pressurised systems
- Rotates through 180° for access
- Reversible for left or right hand applications

Glass Protection

The Ultimate Bathroom Protector on glass

All Roman's enclosures and bath screens are pre-coated with Roman Ultra Care, our own unique glass protection system. Pre-coated glass protection systems will always diminish in their effectiveness over time, depending on how often the shower is used and how often it is cleaned. Unlike other systems, Roman Ultra Care in a bottle can be used in tandem with the pre-coat to build up the effectiveness and make it stronger the more you clean.

Roman Ultra Care is an award winning bathroom protector and has a 10 year track record for successfully protecting Roman's extensive product range. When applied to the glass of an enclosure or bath screen it creates a chemical barrier which provides protection against the build-up of grime, limescale and stains. The protective barrier means water glides off the glass with ease. This results in the protected surface remaining easy to clean by simply applying a mild detergent and wiping with a damp cloth or using a Roman Shower Blade.

By topping up the glass protection system with Roman Ultra Care in a bottle every time you clean, you can significantly reduce the amount of time required to clean your enclosure and bathroom surfaces. Most importantly, you can considerably prolong the life of your Roman product and at the same time do your bit for the environment by eliminating the use of harsh and damaging cleaning products.

Winner of the House Beautiful
Best Cleaning Product Award 2009

Simulation of glass surface magnified
All glass surfaces have a non smooth finish which can attract the build-up of particles. Roman Ultra Care provides an invisible protective film which seamlessly seals the surface to ensure this build-up does not bond to the glass and the glass retains its optical clarity for lasting sparkle.

Before coating
After coating

Ongoing After Care

To maintain the long lasting sparkle of your Roman enclosure or bath screen and aid the Ultra Care pre-coated glass protection; Roman Ultra Care can be purchased in a user friendly 750ml sized bottle. This can be purchased for only £14.95 from your local Roman Bathroom Retailer, or alternatively from **www.romanathome.com**

Roman Ultra Care is not limited to the cleaning and protection of your shower enclosure or bath screen, it can also be used to protect other bathroom surfaces, which are not pre-coated, including glass, tiles, aluminium frames, taps, trays, sinks and baths.

Simply wipe down your bathroom surfaces after use and apply Roman Ultra Care with a soft cloth.

Roman Ultra Care can be used weekly as part of your bathroom cleaning routine.

The more you apply Roman Ultra Care the more protection you create for your enclosure, therefore your enclosure will maintain its high quality finish for longer. Without using Roman Ultra Care, your pre-coated glass protection will diminish over time.

Important information to help you maintain your Roman product:

Ensure you clean your product using a mild detergent diluted in water and then polish off using a soft damp cloth. Apply a coat of Roman Ultra Care after each clean to build-up the protective film on the surface.

If you live in a hard water area, periodically clean your product using a 50/50 solution of white vinegar and water. The solution should be left on the enclosure for approximately 5 minutes then rinsed off using warm water.

1. Do not use acidic based products which are unsuitable for cleaning enamel surfaces.
2. Do not use abrasive cleaners or cleaners containing bleach or solvents, these products will adversely affect the finish of the aluminium profiles.
3. Do not use scouring pads, powder or any sharp instruments when cleaning your Roman enclosure.

Trays

Our diverse range of trays and wetroom solutions offer the user a choice of installations depending on the desired finish. Our range of level access shower trays is manufactured from solid surface material, and cleverly create a simulated wetroom look. These solid surface trays are available in a range of sizes, and incorporates our Infinity Tray range which has a single angle flow to waste with a stylish load bearing solid surface waste cover. Our Infinity Tray collection also presents true originality with our low level Shimmer Trays, featuring a stunning shimmer finish. These unique designs include radiant black, glittering grey and twinkling white shimmer finishes.The standard acrylic capped stone shower trays are also available in a selection of heights, shapes and sizes.

Types:
- Infinity Trays
- Neo Angle Trays
- Lumin8 Trays
- Gloss Trays
- Roman Low Level Trays

Level access
Infinity Trays

To create the ultimate modern minimalist look Roman introduce the Infinity Tray range which is available in the choice of a matt or gloss finish. Our Infinity Trays offer a breakthrough in technology as they can be installed straight to joists so that once the floor tiles are laid it creates level entry access into the shower area. Manufactured from Roman Stone, the Infinity Trays are strong and durable. They achieve their level access feature due to them being only 40mm nominal height. This product provides the added reassurance of a tray, with the minimalist design and level access of a wetroom. The flawless styling of the Infinity Trays has been designed with a single angle flow to the waste. The waste is suitable for power shower systems and carries away 25 litres of water per minute. This exclusive chic look is completed with a stylish load bearing solid surface waste cover which still allows access to the waste for cleaning.

Features and Benefits:

- Ultra low profile
- Gloss or Matt* finish available in white
- Shimmer options in gloss only
- Manufactured using Roman Stone Solid Surface Technology
- One angle of slope to waste to maximise flow rating
- Fast flow waste included, fully concealed with solid surface cover piece
- Due to the nature of the product water integrity cannot be guaranteed when fitting with a wetroom panel. Please consult your installer.

Code	Description
RTAS01	Anti Slip Coating Pack

* Left or right handing must be specified

Roman
Anti Slip
Roman Anti Slip Coating now available in a pack.
This kit allows for an anti-slip coating to be applied only on Acrylic Capped Roman Stone shower trays which will aid the prevention of slips and falls in wet & dry conditions.
This product confirms to BS7976-2:2002 achieving a low slip potential within wet conditions and conforms to DIN 51097 with a class C slip rating.
Independently UK tested and approved.

Anti Slip Advantages:

■ Added reassurance in wet showers

■ Easy to apply

■ Hygienic and low maintenance

■ Resilient and durable

■ Solvent free

■ Colourless

Possible Areas of Use:

■ Shower trays

■ Retirement homes and nursing homes

■ Clinics and rehabilitation facilities

■ Only for use with Roman Acrylic Capped Stone Trays

Please Note: Anti Slip Trays
Roman Solid Surface Matt Trays have been tested to:
BS7679-2:2002+A1:2013 –Slip potential – low DIN 51097:1992 Class C

Protecting the Environment

Roman is committed to caring for the environment and as a reflection of this commitment we became fully accredited with ISO 14001 certification in 2009. We see looking after the environment as an important part of being a UK business and UK manufacturer. As a business we care for the environment in two ways - by improving our systems to reduce our carbon footprint and impact on the environment. We strive for continual improvement in this area. For more information on how we are taking care of the environment visit our website: www.roman-showers.com and view our full list of ecodentials.

All Roman Shower Enclosures and Bath Screens and Trays are manufactured in the UK.

EMS 523823

As well as considering the environment during the manufacture of our products, we are also mindful of how our products can impact on the environment after they leave us. The addition of our Ultra Care Pre-coated Glass Protection means that dirt, grime and soap scum are washed away during the shower use. This means the use of harsh chemicals during the cleaning process can be eliminated and less water is required during the cleaning process.

All Roman Shower Enclosures, Bath Screens and Trays are manufactured in the UK.

All vehicles with Euro 5 compliance engine vehicles saving 22% on emissions.

Company car policy has been updated so only vehicles with less than 125 grams of CO_2's per Kilometre can be used in the fleet.

Overall company CO_2 reduction since 2009 is 20%.

Roman brochures are printed on stock sourced from sustainable forests.

All waste is segregated into recyclables and non-recyclables. 93% of all waste is recycled - landfill reduced to 7% of total waste generated.

Make cleaning your bathroom easy with our

Shower, Tile & Bath
Restoration and Maintenance Kit

Restore discoloured glass and maintain the sparkle of your bathroom

CLEAN & PROTECT YOUR SHOWER IN MINUTES

ELIMINATES HARD WATER & SOAP SCUM BUILDUP

For details of your nearest stockist please contact Roman International on **+44 (0) 1325 327989**

3 Step System includes:

Ultra Scrub *Surface Stain Cleanser*
Designed to effectively and easily clean your bathroom surfaces, including Glass, Porcelain, Ceramics and other hard surfaces.
Developed to remove the build-up of minerals, rust, soaps, oils and limescale but without damaging the surface.

Ultra Shield *Glass and Surface Treatment*
Formulated to clean and protect. Ultra Shield can be used on your bathroom surfaces to create a water, soil and stain repellent barrier coating which prevents water, soil and grime from sticking for easier cleaning. This barrier is renewed with each use.

Ultra Care *Glass & Surface Protector*
For a long lasting sparkle on bathroom and shower surfaces. Ultra Care is the ultimate surface protector that repels the build-up. Also available in large bottle for ongoing aftercare.
