Tomorrow's shower, today

“ This range is definitely our most exciting current development. Keeping ahead and making sure we are ready for The Internet of Things, at the same time as keeping up with the latest trends while respecting changing environmental pressures is a challenge we've risen to. We are very proud of this range and careful attention to detail is evident in every aspect of the design. The quality is right and the aesthetics are what you would expect from Tissino - simply stunning. We have selected the finest quality components to make certain these products will enhance any bathroom environment for years to come.

”

Fabio D'Amato

Control Interface (locate in shower)

Intelligente App

Powered by SmartTap, Intelligente has been developed to harness the very latest technological advances. The app allows the user to access, monitor, adjust, control and care for the system from anywhere in the world.

The shower can be operated from any Android enabled phone or tablet.

You can pre-prepare your shower using your smartphone or the optional remote module.

Intelligente E-valve

The E-valve is a state-of-the-art digital water valve, manufactured using the highest quality components. The valve unit is made in Germany by Flühs, a leading supplier of turn and valve technology.

The E-valve represents a major breakthrough in water ecology and usage efficiency, constantly regulating and controlling the water flow to the shower unit.

Unique software ensures the system is constantly up to date as developments continue.

Large multiple users have proved they can dramatically reduce water and energy consumption

Can run 1, 2 or 3 outlets, including bath filler wastes

Settings can be personalised for 1, 2 or 3 users

Highly accurate water management for complete flow and temperature stability, whatever the external influences

Intelligente Control Interface

The Control Interface is the only visible part of the system. Easy to use and looks stunning.

The twin dial Control Interface is located close to the shower, however an optional single dial Remote Interface can be located elsewhere for added convenience.

Available in Black or White, the Remote Interface allows maximum control and convenience. It can be located by the bathroom door or in the next room.

You can pre-prepare your shower using this optional remote module or your smartphone.

Intelligente Showering

Intelligente is compatible with all conventional brassware ranges and works well with the Mario Series from TISSINO.
