

DaySpa Showers.
You've never
felt water like
this before.

**Finally, water
shows us what
it can do.**

The first shower for every time of day.

Water is a very special element. It can flow, bubble and surge. It can form raging rivers or tranquil ponds, massive oceans or placid lakes.

Most recently, it has acquired a new skill: Depending on your needs and the time of day, it can be invigorating and refreshing, or warm and relaxing like a bath. TOTO DaySpa showers are the perfect companion for your day – from the moment you wake up to bedtime. Because water is our most valuable resource, TOTO has created innovative shower experiences that use it sparingly:

For you to enjoy!

**The shower for
every day – and
every time of day.**

Revitalised into your day. With Active Wave.

Life can be so beautiful – if only there were no alarm clock! But sleeping in isn't an option: It's time to make breakfast, get the kids ready for school, pick an outfit for the day. All of this is so much easier after an incredibly invigorating morning shower!

“My shower awakens
my body and spirit!”

Regenerated after exercise. With Comfort Wave.

Working out after work is the perfect way to combat stress. Jogging, sprinting, sit-ups, breathing fresh air, eventually feeling every muscle in your body. Enjoying a shower after your workout is the ideal way to recover.

"I give every workout 100% –
and there's nothing better than the
shower I've earned afterwards."

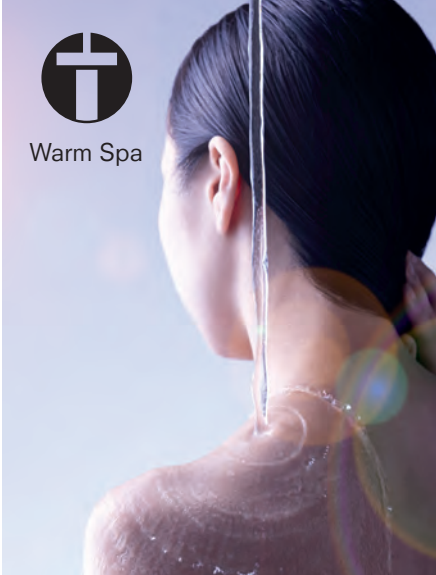

Relaxed into the evening. With Warm Spa.

Long days at work. Stressful meetings. Running errands and shopping on the way home. Taking care of the children, of course. It's finally time to think about yourself – the ideal time for a Warm Spa shower. It keeps your body warm for an extended period of time, delivers total relaxation, and even helps you fall asleep.

“Some days are really tough – that’s why I have my Warm Spa shower.”

TOTO shower technology. Get clean with all of the water.

Invigorating. Calming. Inspiring.

Experience first-hand why the new TOTO showers are called “DaySpa” – and enjoy every minute. The DaySpa shower has the type of shower you need at every time of day. The different types of sprays will invigorate or relax, depending on your personal needs – and will never fail to inspire.

Active Wave

Ensures an invigorating, stimulating shower experience. The powerful stream of water gives you an energising start to your day.

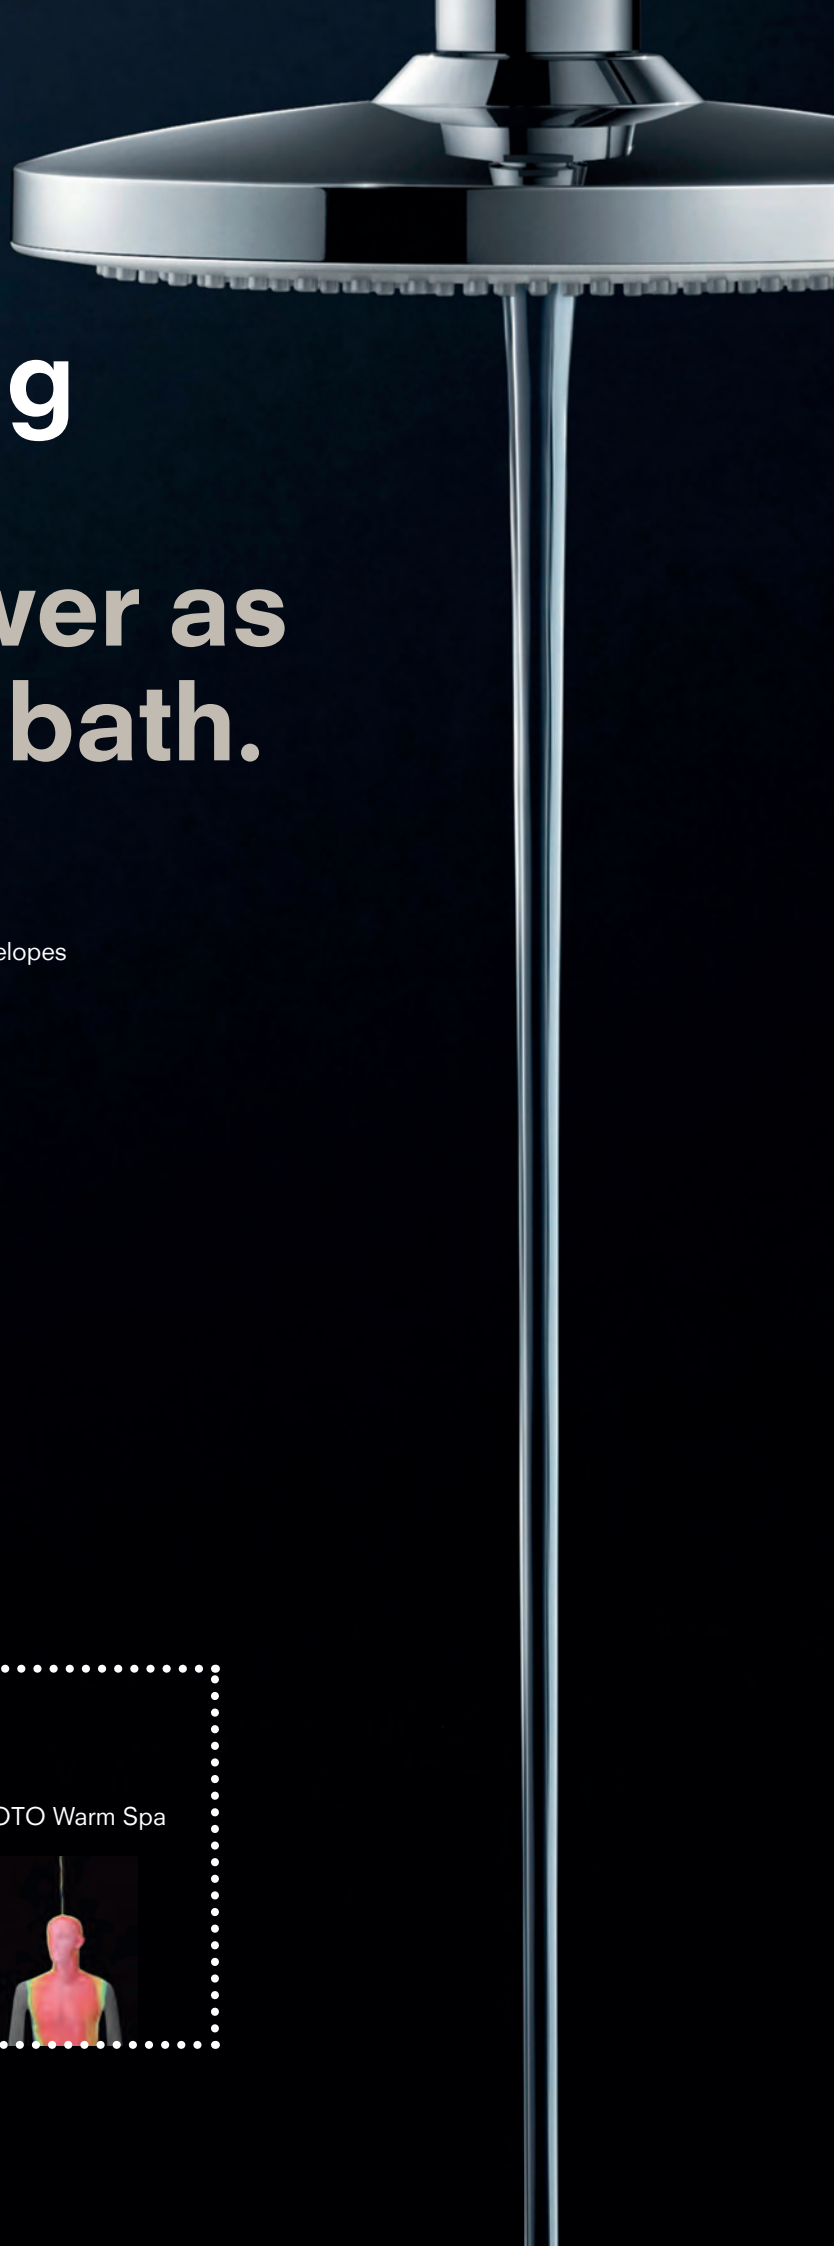

Comfort Wave

The standard feature in all TOTO showers. This rejuvenating shower creates a very comfortable shower experience while using very little water.

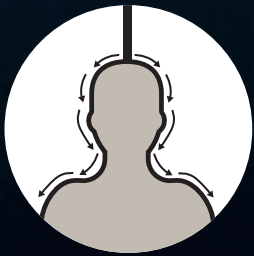

Warm Spa

The water keeps the entire body equally warm, for a luxurious, comforting shower experience that allows you to completely relax – and even helps you get a good night's sleep.

The innovating Warm Spa. The first shower as relaxing as a bath.

Warm Spa

A single stream of water gently envelopes the body like a second layer of skin.

The heat image shows:
TOTO technology evenly and equally warms the body.

Conventional shower

Water from the hose

TOTO Warm Spa

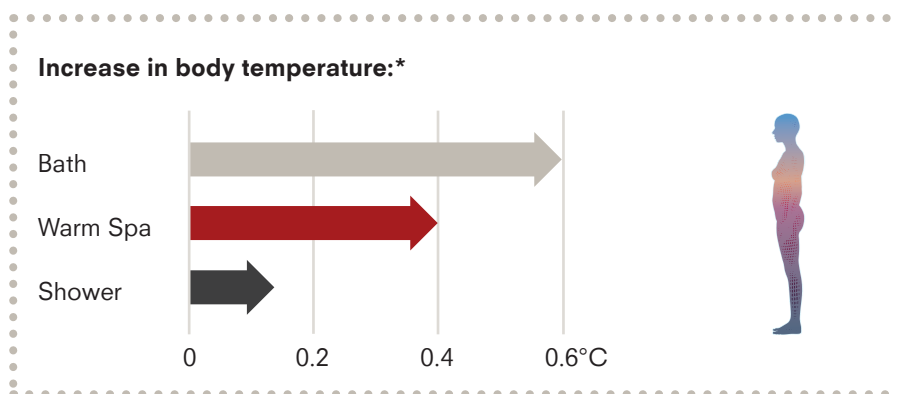

The warmth of a bath.

Now available in the shower.

Do you enjoy taking warm, soothing showers? Get ready to fall in love with our new Warm Spa technology. Warm Spa is a single stream of water that gently envelopes the body like a second layer of skin, with practically no splashing. The water keeps the entire body equally warm, for a luxurious, comforting shower experience that allows you to completely relax – and even helps you get a good night's sleep.

Long-lasting warmth

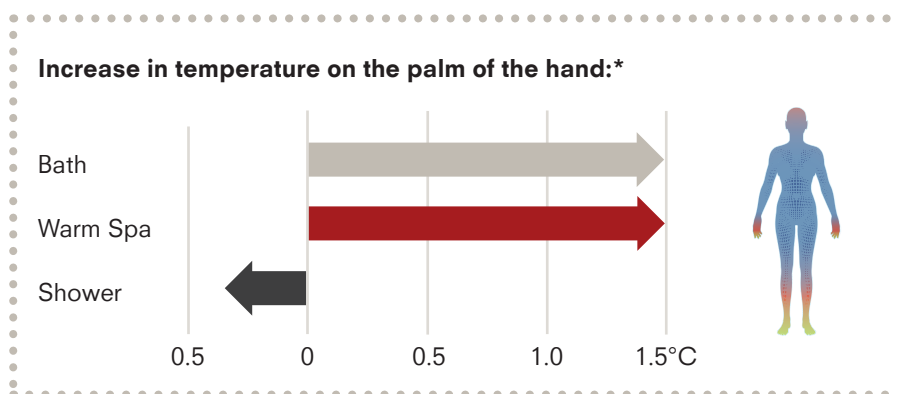

Measurements objectively show the effects of our Warm Spa technology.

*Temperature increase measured one hour after the bath or shower.

The values in the graphic show the increased body temperature after an hour. A bath raises the body temperature by a maximum of 0.6 degrees, while a shower featuring Warm Spa technology warms the body by a maximum of 0.4 degrees. A conventional shower does not warm the body for an extended period of time.

The results are similar when the temperature is taken on the palm of the hand: A bath and shower featuring Warm Spa technology increase the temperature by up to 1.5 degrees. In contrast, the palm of the hand starts to cool off an hour after a conventional shower. The data show that TOTO's Warm Spa technology warms the body practically just as well as a bath.

*Temperature increase measured one hour after the bath or shower.

Wellness at the touch of a button.

Comfort Wave

Warm Spa

Overhead shower

A click of the button is all it takes to switch between the fully warming Warm Spa and rejuvenating Comfort Wave.

Comfort Wave

Active Wave

Warm Spa

Hand shower

Simply click the button on the hand-held unit to switch between the rejuvenating Comfort Wave to the invigorating Active Wave or body-enveloping Warm Spa and back.

Because every drop counts.

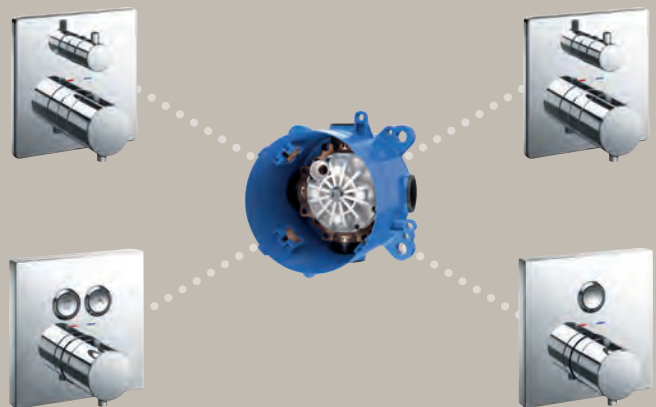

Enjoy – while saving water

TOTO technologies create extraordinarily luxurious shower experiences while using our most valuable resource very sparingly. All showers are equipped with a water flow limiter. Even the special shower features in our DaySpa series are extremely efficient – without giving up a full shower experience.

- Large drops of water create a full, luxurious shower experience
- It is easy to wash shampoo out of long hair
- You'll only notice the water you save on your water bill

TOTO installation. Conscious design – even behind the scenes.

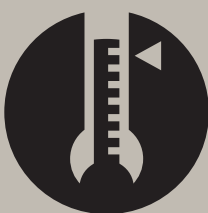

TOTO concealed box – extensive planning flexibility

The TOTO Mini Unit provides the flexibility you need for every shower. Builders and renovators can install the unit during construction and choose their favourite TOTO fixture later on. All TOTO shower mixers currently available are compatible with this practical concealed box. This also makes it possible to replace fixtures in the future without needing to open up the wall.

Elegant design and smart technology

TOTO's thermostatic shower mixers have a stunning, streamlined and minimalistic look. The compact design of the concealed shower mixers offer more freedom of movement in the shower and are easy to use – whether you choose the version featuring the push button or turning handle.

Constant temperature

These fixtures also ensure a constant water temperature, even if the temperature of the water supply changes or someone is using water elsewhere in the house.

The TOTO shower collection.
